STATEMENTS.

No.

I.—Analysis of chief statistics.

II.—Cultivating occupancy of land.

III.—Owned and mortgaged land.

IV.—Incidence of revenue.

V.—Fixed land revenue (including service commutation), demand, collections and balances.

VI.—Amount of land revenue held under suspension.

VII.—Alterations in the fixed land revenue demand.

VIII.—Collections and balances of fluctuating and other revenue.

IX.—Alluvion, diluvion and destructive inundation.

X.—Land revenue assignments.

XI.—Coercive process for collection of land revenue.

XII.—Progress made in re-measurement and attestation (General).

XII A.— Ditto ditto ditto (Killabandi).

XIII.—Progress made in re-assessment.

XIV.—Duration and cost of settlement operations.

XV.—Enhancement or reduction of cash rents.

XVI.—Ejectment proceedings under the Tenancy Act.

XVII.—Disbursements, collections and outstandings on account of Act XIX of 1883.

XVIII.— Ditto ditto ditto Act XII of 1884.

XIX.—Remission orders and certificates of exemption.

XX.—Account of Local Government with agriculturist borrowers.

XXI.—Loans made under the Land Improvement and Agriculturists' Loans Acts.

XXII.—Result of loan operations to Local Government.

XXIII.—Area and income of unclassed forests and of other Government lands.

XXIV.—Sales, mortgages, redemptions and other transfers.

XXV.—Abstract of mortgages, sales and redemptions.

XXVI.—Sales of land.

XXVII.—Mortgages of land.

XXVIII.—Work done by Revenue Officers.

XXIX.—Appellate and revisional work of Commissioners and Financial Commissioners.

Proceedings of His Honour the Lieutenant-Governor of the Punjab in the Department of Revenue and Agriculture (Revenue), No. 51, dated 31st March 1916.

READ—

The Annual Report on the Land Revenue Administration of the Punjab for the year ending 30th September 1915 forwarded with letter No. 190, dated 25th February 1916, from the Junior Secretary to the Financial Commissioners, Punjab.

REMARKS—

THE favourable climatic conditions of the year are reflected in the very large sown and matured areas of both harvests. The monsoon of 1914, in spite of a long break in August, was on the whole ample and well distributed, over nearly the whole province, and though rain in the late autumn and early frosts did some damage to cotton and sugarcane and reduced the outturn of food crops, the kharif crop as a whole was slightly above the average. The area sown for the rabi was extraordinarily high and the winter rains though late were plentiful. The result was a matured area more than 4 million acres in excess of the normal, but again the outturn was to some extent reduced by stormy weather in March and April and by the excessive temperature when the crop was maturing and being reaped. There was a sharp fall—which has since been made good—in the price of cotton, but with wheat selling at Rs. 3-8-0 per maund and other food-grains at similarly high rates, the year was a distinctly favourable one for the cultivator. This is corroborated by the statistics of revenue collections: less than Rs. 50,000 of the fixed demand for the year were remitted, chiefly on account of damage by floods in the kharif and hail in the rabi, while suspensions amounted to only about 1½ lakhs as compared with an average of 5 lakhs, while over 7½ lakhs outstanding from previous years were collected. The total amount outstanding at the close of the year (30th September 1915) has fallen to less than 4 lakhs, a figure only reached once in the last decade. This happy state of affairs was but of short duration, for the extremely unfavourable agricultural conditions of the current year are producing large balances and considerable suspensions.

2. Re-assessments in Ferozepore, Lahore, Amritsar and Sialkot, and deferred enhancements in Rohtak, Gurgaon and Karnal resulted in an increase in the fixed demand by nearly 4½ lakhs to 217 lakhs. The fluctuating demand, apart from revenue erroneously excluded from the fixed rent roll, also rose by over 10 lakhs to 128 lakhs, in spite of a reduction in three of the western districts owing to local calamities. The enhancement was mainly the result of the extension of irrigation from the Upper Chenab and Lower Bari Doab canals, while an increase of over a lakh in Mianwali was due to the great development of gram cultivation in the Thal. Though receipts from the sale of waste lands and town sites, principally in the Lower Bari Doab colony, and from single harvest leases showed considerable improvement, recoveries on account of purchase of proprietary rights by colonists on the Lower Chenab canal were naturally much lower than in the previous year. They declined by about 16 lakhs, and the net result was a decrease of about 7 lakhs under the head "Other Land Revenue." Receipts under this head totalled over 42 lakhs, while the demand for land revenue proper, both fixed and fluctuating, exceeded 352 lakhs, or 22 lakhs more than in the previous year, the main causes of the improvement being (*a*) extension of canal irrigation, (*b*) reassessment operations in certain districts, and (*c*) the generally favourable character of the season.

3. Although the year was thus one of general prosperity the number of coercive processes issued rose by nearly 44 per cent. to 17,952, of which the Multan Division was again responsible for more than half. The large number of processes issued in Muzaffargarh and Dera Ghazi Khan was the subject of comment in last year's review, and the Financial Commissioner having made special enquiries, is satisfied that it is the dilatory habits of lambardars and of revenue-payers and not inability to pay that are the cause. He also

accepts the explanation that the efforts of Collectors to remedy this unpunctuality are responsible for the issue of larger numbers of processes in recent years in both the Multan and Lahore Divisions, and if these efforts are as successful as they were in Attock a very considerable decrease in the number of processes required may be expected in the near future. It is probable, however, that in the south-west Punjab the foolish rumours which prevailed at the outbreak of the war caused a contraction of the accommodation which revenue-payers usually receive from the village bankers, and this was aggravated by the absence in those districts of the Co-operative Credit Societies which help to finance agriculturists. A satisfactory feature of the returns is the fact that in more than two-thirds of the cases of default a writ of demand resulted in payment. More severe measures have seldom to be employed.

4. Settlement operations were in progress in ten districts at the beginning of the year, and were started in Simla during the year. In Dera-Hamirpur and Ferozepore operations were concluded and satisfactory progress was made elsewhere, and by the end of the year assessment reports remained due from only three districts and measurements and record work were uncompleted in only four districts.

In Gujrat, Lahore, Dera-Hamirpur and Kangra the cost of resettlement has exceeded, or is expected to exceed, that anticipated in the forecasts, and operations have lasted somewhat longer than was first expected. The Lieutenant-Governor considers that the extra cost is more than compensated for by the greater thoroughness and precision with which the work is being completed. On the other hand the financial results have in nearly all recent settlements also exceeded the forecasts, and the Lieutenant-Governor is satisfied that the work of the Settlement Department has throughout the period of Mr. Diack's supervision been carried out with all possible economy and with reasonable despatch. Reference is again made in the report to the congestion of establishment caused by the reduction in the number of districts under re-settlement. The measures taken by the Financial Commissioner, though possibly in some cases hard on individuals, are obviously demanded by the situation. The rates of pay of Naib-Tahsildars were substantially improved during the year, but the prospects of appointment for candidates are at present anything but bright, and the Lieutenant-Governor would be glad if the Financial Commissioner would consider the possibility of deputing selected Naib-Tahsildars to clerical or *quasi*-clerical work under the military authorities, such as the supervision of store depôts. As regards kanungos they should be given preference in making selections for those appointments on the district staff for which they are eligible.

The winding up of so many settlements in recent years has resulted in a considerable fall in the year under review in the amount of litigation between landlords and tenants, and suits for the adjustments of rents of occupancy tenants were less numerous than in any year since 1906. Generally speaking conditions in the province enable the tenants to secure a reasonable share in the increased profits that are being derived from agriculture.

5. Traverses for field surveys in parts of the Sutlej and Chenab riverains were carried out by the Survey Department, and survey operations under the settlement staff were also in progress in Kangra and Simla. With a view to the determination of the inter-provincial boundary on the Jumna two officers were deputed on behalf of the Punjab and Delhi Province and of the United Provinces, respectively, and satisfactory progress has been made towards a settlement of the question. On about half the line the agreement of estates involved has been obtained to a fixed boundary of proprietary rights with which the provincial boundary will coincide. For the remainder, though it is hoped that subsequent efforts may be successful in securing similar acceptance of a proprietary boundary, the Punjab Government has agreed that power should be taken by legislation compulsorily to determine a fixed boundary of estates, and the question is now under the consideration of the Government of the United Provinces.

6. The Lieutenant-Governor is glad to note that the recommendations of the Clerical Establishments Committee in regard to district record rooms

have been adopted with satisfactory results. The new rules for the copying agency are still under the consideration of Government.

7. Canal irrigation from both major and minor works was generally satisfactory. The supply in most of the perennial canals was sufficient, and irrigation on the Upper Chenab and Lower Bari Doab canals was, as already noted, largely extended. The tightening up of the supply on the Lower Chenab canal with a view to a better distribution of water and the prevention of water-logging has been carried out with a skill and tact which reflect credit on the Irrigation Officers responsible. An experiment in the substitution of a fixed for a fluctuating land revenue demand and canal dues on the Shahkot Distributary of this canal was sanctioned, but has had to be postponed owing to silting up of the channels until the distributary can be remodelled and improved modules installed. The Sutlej inundation canals watered an area much in excess of the normal, and those from the Chenab also did well.

Among minor works the Rangoi canal in Hissar, the Ravi canals, and the Kitchin canals were unusually successful. It has now been decided to take the latter system, including the subsidiary Mehdi Khan canal, under direct Government control, and His Honour is convinced that this arrangement will be for the benefit of the irrigators. The Grey canals in Ferozepore also had a prosperous year, but considerable expenditure is required to put them in a sound condition. The zamindars have now agreed to a slight increase of the *abiana* and Government has accordingly sanctioned an annual grant of Rs. 25,000 for 5 years: an equal sum has been voted by the District Board, and with these resources and the new scheme of management which has been introduced a great improvement may be expected. There was a considerable extension of the area matured with the aid of the Gurgaon bunds. Proposals for the improvement of these works have been formulated, but have been objected to by the Sanitary Commissioner as likely to have a bad effect on the health of the district headquarters, and the question is still under consideration. The new Nammal dam irrigated a considerable area, but the system of distribution is still faulty. On the whole the working of these canal systems under district management has been of material benefit both to Government and to the people, and the Lieutenant-Governor will be glad to encourage and to support—when financial conditions improve—the initiation of further schemes of the nature where conditions are favourable.

8. There was little demand for loans for land improvement, less than 2 lakhs being advanced, of which the Ferozepore district took over one-third. Though in some districts loans from Co-operative Societies are taking the place of advances from Government the Lieutenant-Governor considers that the field of useful employment for the latter is still very wide, and that without creating an artificial demand much more could be done to promote improvements by a judicious loan policy. It has in several places been brought to his notice that the extension of the iron form of Persian wheel, which has done so much to increase the efficiency of well-irrigation in some of the central districts, is hampered by the heavy initial cost. Another form of agricultural improvement which requires considerable initial outlay is the sinking of the tube strainer in irrigation wells, and this would be a most suitable object for advances. Indeed experience gathered from many directions proves that a wise and liberal policy in the matter of loans is beneficial alike to the Government and the people specially in districts where wells and embankments play a large part in agriculture. The wonderful development within the present generation of the Jullundur district, which was believed to have reached the limit of agricultural expansion 30 years ago, is mainly the result of the sustained encouragement of well-sinking by successive Deputy Commissioners and a similar policy is apparently now being followed in Ferozepore with equally good results. Advances for the purchase of seed and bullocks amounted to about the same sum as in the previous year. There was a considerable increase under both heads in the balances of principal and interest overdue at the end of the year, and Multan was again responsible for large outstandings. The Lieutenant-Governor trusts that the Collector will give the matter special attention in the current year.

9. The extension of irrigation in Multan and Montgomery is rapidly reducing the area of waste in respect of which *tirni* dues are paid: suitable arrangements have, however, been made by the Financial Commissioner for the gradual reduction of the canal *tirni* demand concurrently with the colonisation of the waste. His Honour is pleased to notice that schemes for the browsing of the 3 camel corps maintained at Montgomery and Multan have been finally approved.

10. The amount of land which changed hands during the year by mortgage, redemption of mortgage and sale was less than it has been for the past ten years: the excess of the area redeemed over the area mortgaged was, however, maintained, and agricultural tribes were on the whole gainers by the alienations reported. The statistics in Statement No. XXVII go back to 1901-02, and it is very satisfactory to find that notwithstanding the great expansion of cultivation in the meantime, not only the proportion but the actual area of land under mortgage is now less than in any year of which we have a record. The average price realised for land sold was Rs. 180 per acre, as against Rs. 249 in the previous year: in 1913-14 the price was inflated by speculative sales in the suburbs of Lahore, and some doubt was felt as to the accuracy of the returns. The Financial Commissioner has, however, satisfied himself as to the correctness of the figures, but the speculative fever abated during the year under review, and though a larger area changed hands, prices were much lower. In practically every district where the statistics were not affected by urban sales, the value of land is reported to have risen during the year. In the Lower Chenab colony purely agricultural land fetched Rs. 217 per acre, while undeveloped land on the Lower Bari Doab canal was auctioned for Rs. 188 per acre. There is therefore no reason to distrust the returns of sales which give an average sale price of Rs. 180 per acre for all classes of land. The sale value represents 134 years' purchase of the land revenue. In 1896-97 it represented only 66 years' purchase and its steady rise in the last 20 years is a remarkable testimony to the leniency of the demand and the general growth of agricultural prosperity. Ten years ago the selling price was Rs. 86 per acre, so that there has been a rise of about 109 per cent. In the same period the mortgaging value of land has risen from Rs. 68 to Rs. 130 per acre. This extraordinary appreciation of value has taken place since the passing of the Alienation of Land Act, though doubtless the general recognition of the lightness of our standards of assessment is a contributing cause, and it is satisfactory to find that new methods of evading the Act have not been discovered. The Lieutenant-Governor agrees with the inference drawn by the Financial Commissioner from the statistics for sales, mortgages and redemptions, that evasion is generally either impracticable or unprofitable. His Honour would be obliged if next year's report were to contain somewhat more detailed information regarding the working of the Redemption of Mortgages Act.

11. There was a slight increase in the number of institutions in the courts of Revenue Officers, but the pending file at the end of the year was about the same. His Honour is glad to observe the reduction of arrears which has been effected in Shahpur. The pending file in the courts of the Financial Commissioner and of the Commissioners of all divisions except Rawalpindi is now inconsiderable.

12. The Lieutenant-Governor desires to acknowledge the work of the revenue staff, which has maintained its usual high level of efficiency during a year of many anxious distractions and pressing pre-occupations. His thanks are also due to the Financial Commissioners for their able administration of the Department and for an interesting report.

ORDER.—Ordered that the above remarks be printed and circulated with the Report, that they be published in the *Punjab Gazette*, communicated to the Financial Commissioners, Punjab, and forwarded to the Government of India, Department of Revenue and Agriculture, with the usual number of spare copies.

By order of His Honour the Lieutenant-Governor of the Punjab,

H. D. CRAIK,

Offg. Revenue Secretary to Government, Punjab.

3129 CS—379—1-4-16—SGPP Lahore.

No. 190.

FINANCIAL COMMISSIONERS' OFFICE :

Lahore, dated 25th February 1916.

FROM

J. M. DUNNETT, ESQUIRE,

Junior Secretary to the Financial Commissioners, Punjab,

To

THE HON'BLE MR. C. A. BARRON, C.I.E.,

Chief Secretary to Government, Punjab.

The Hon'ble Mr. A. H. Diack, C.V.O.
The Hon'ble Mr. P. J. Fagan.

SIR,

I AM directed to submit the Annual Report on the Land Revenue Administration of the Punjab for the agricultural year ending the 30th September 1915.

2. The office of Financial Commissioner was held throughout the year by the Hon'ble Mr. A. H. Diack, C.V.O.

The Hon'ble Mr. H. J. Maynard, C.S.I., officiated as Financial Commissioner from 1st October 1914 to 18th October 1914, and the Hon'ble Sir M. W. Fenton, K.C.S.I., was Financial Commissioner from 19th October 1914 to the end of the year.

I have the honour to be,

SIR,

Your most obedient Servant,

J. M. DUNNETT,

Junior Secretary to the Financial Commissioners, Punjab.

REPORT

ON THE

LAND REVENUE ADMINISTRATION

OF THE

PUNJAB

FOR THE

Agricultural year ending the 30th September 1915.

General summary of agricultural conditions.

1. The agricultural conditions on the whole were unusually favourable for both harvests. The monsoon which set in early was favourably distributed and more than usually ample. Hail and cold did some damage to the autumn crop while it was ripening, but the result of the harvest was considerably above normal. Favourable conditions in autumn and the influence of the war led to a very large extension of the area under rabi crops. The sown area exceeded the normal by 13 per cent. and, in spite of the winter rains holding off till February and March, the matured area was 21 per cent. above the average. Unseasonable storms in March and early April affected the wheat outturn, which was probably not in excess of the average As a whole, however, the year measured by the sown and matured areas represents the high water mark reached in the Province. Climatic and economic conditions favoured the growth of rabi at the expense of kharif crops, the rabi area being 4,300,000 acres above normal, and the kharif only 82,000 acres in excess. The course of prices was not entirely favourable to the zamindar The average price of wheat was Rs. 3-8-0 per maund compared with Rs. 3-2-0 in the previous year, but cotton which was most affected by the consequences of the war fell from an average of Rs. 6-11-0 to Rs. 4-4-0.

Fixed land revenue

Statements Nos. V, VI and VII.

2. The total demand for the year on account of fixed land revenue was Rs. 2,17,04,451 or Rs. 4,84,911 in excess of the demand of the preceding year. Re-assessments introduced by the Settlement Officers of Ferozepore, Lahore, Amritsar and Sialkot accounted for an increase of Rs.2,92,997 and deferred enhancements in Rohtak, Gurgaon and Karnal swelled the demand by Rs. 1,45,262. The balance on alluvion and diluvion assessments was an increase in the demand of Rs. 25,656. From the total demand Rs. 2,14,84,964 were put down for collection and were collected with the exception of Rs. 31,726. This balance left for recovery at the end of the year is accounted for chiefly by the outstandings in the Khushab Tahsil of Shahpur where collections were delayed in consequence of the late receipt of orders on the assessment proposals. The demand not ordered for collection was made up of Rs. 1,30,491 undetermined or irrecoverable balances, and Rs. 88,996 which remained under suspension at the end of the year. A sum of Rs. 42,445 was remitted from the demand of the year. In the favourable conditions of the year the necessity for suspension or remission of the demand was less frequent than usual. The amount placed under suspension during the year was only Rs. 1,41,957. The average amount of suspensions is about 5 lakhs. Heavy hail-storms and the failure of the monsoon in the latter part of August and the beginning of September necessitated the suspension of Rs. 47,070 in Gurgaon, and Rs. 36,865 were suspended in Gurdaspur

chiefly in villages in which heavy floods in the Beas and the Ravi did damage to houses, crops, live-stock and other property Remissions were due to hail-storms in Gurgaon, Lahore, Amritsar and Attock and floods in Gurdaspur, Amritsar and Karnal. The collections on account of previous years amounted to Rs. 7,54,129. Sums under suspension amounting to Rs. 51,037 were remitted chiefly in Hissar, Gurgaon, Rohtak, Jhelum and Attock. The recoverable balance on account of previous years not under suspension is only Rs. 318. The total amount under suspension has fallen to Rs. 3,78,020, a level only once reached during the last ten years. The account is clear in ten districts and practically clear in six more. The total outstanding balance at the beginning of the year was Rs. 12,15,200 and at the close Rs. 5,92,620.

Alluvion and diluvion.
Statement No. IX.

3. The balance of alluvion and diluvion was a loss of assessable area but a small gain in the amount assessed. The area washed away or rendered unfit for cultivation was 42,692 acres, and on 36,687 acres the assessment was reduced on account of deterioration. On the other hand 38,953 acres alluviated were brought under assessment and the demand was enhanced on 34,303 acres benefited by river action. The abnormal autumn floods led to some vicissitudes of fortune. Karnal was a considerable loser from the Jumna. The Beas washed away a good deal of land from the Nurpur Tahsil of Kangra but added land to Hoshiarpur. Amritsar was a loser but Lahore a large gainer. As regards the Ravi, the Commissioner of Lahore notes that "the abnormal floods of kharif 1914 deposited on a balance a much greater quantity of silt than sand in Gurdaspur, Sialkot and Gujranwala." There was neither gain nor loss from the action of minor streams but chos were on the whole maleficent.

Fluctuating land revenue.
Statement No. VIII.

4. As in the preceding year the amount of land revenue temporarily excluded from the rent-roll was swollen by the accounts procedure adopted in Sialkot where the whole of the new demand imposed in the year (upwards of Rs. 4,20,000) was treated as excluded from the fixed land revenue roll. The correct procedure is to treat only the amount of enhancement as temporarily excluded from the roll and this action is taken only when the new assessment is introduced from the rabi harvest. The total amount excluded, Rs. 7,31,082, was almost entirely due to general re-assessments of the fixed demand introduced after the roll of the year had been sanctioned. These included the re-assessment of the Charkhri and Bangar Circles of Wazirabad which had been defered pending the opening of the Nokhar Branch of the Upper Chenab Canal. The demand on account of true fluctuating land revenue amounted to over Rs. 128 lakhs or more than Rs. 10 lakhs in excess of the demand of last year. The assessment of the preceding year was equalled or exceeded in every district except Shahpur, Muzaffargarh and Dera Ghazi Khan. In Shahpur the decrease of Rs. 20,000 which was confined to the demand assessed by the Irrigation Department is ascribed to the damage done by hail. Floods, hailstorms and the silting-up of the head of the Puran and Suleman Canals caused a decrease of Rs. 34,000 in the demand in Muzaffargarh and the estimated normal demand was not reached. In Dera Ghazi Khan also there was a defect from the average assessment. The river floods were abundant but the heads of some of the canals were eroded and irrigation suffered in consequence. The very large increase in the demand in all other districts was in the main due to three causes, re-assessment, the extension of canal irrigation and an unusually favourable season. Fifty-eight villages on the fringe of the Lyallpur District were assessed and enhanced water advantage rates were introduced in Ferozepore and Lahore. The extension of canal irrigation from the Upper Chenab Canal in Sialkot and Gujranwala and from the Lower Bari Doab Canal in Montgomery and Multan swelled the fluctuating collections. The increase was over Rs. 2 lakhs in Montgomery and Rs. 3 lakhs in Multan. In spite of a very large increase in the area and the demand assessed by the Irrigation Department there is in both districts a large increase

in the demand assessed by the Deputy Commissioner. The assessment of the Shujabad Tahsil and the Sidhnai Circle has, for the first time within recent years, reached and exceeded the Settlement Officer's estimate. This is satisfactory but the Commissioner has not yet reported the result of his promised enquiry into the causes of the deficiency in the past. In Mianwali, where there were no disturbing changes, the demand was Rs. 4,17,647. The average is slightly over Rs. 3 lakhs. In Hissar, where the estimated normal is Rs. 59,000, collections exceeded Rs. 99,000. The year was one of unusual prosperity in the villages under fluctuating assessment. Heavy floods came down the Ghaggar and the Rangoi Canal ran well.

The demand was everywhere collected with ease. The recoverable demand left uncollected at the close of the year was trifling in amount. The balance at the close of last year was Rs. 31,525. Remissions have been allowed to the extent of Rs. 7,726 and Rs. 22,116 have been collected. The balance which accrued on account of both the current and previous years was a little over Rs. 20,000. The system of fluctuating assessment continues to be generally popular, except in Dera Ghazi Khan and Ferozepore. As the Deputy Commissioner of the former district remarks, however, a system of wholly fixed assessment would not be suited to the local circumstances and in Ferozepore at the recent re-assessment the fluctuating assessment was, as observed last year, maintained for good reasons in the small area on which it is in force. In that connection the Financial Commissioner expressed the opinion that there is on each of the Punjab rivers a point at which it becomes necessary as the more favourable conditions of the submontane tracts are left behind to pass from a fixed to a fluctuating assessment.

Other land revenue.

Statement No. VIII.

5. The demand on account of other land revenue was Rs. 42,12,398, or about Rs. 7 lakhs less than in the preceding year. The proceeds from the sale of waste lands (principally in the Lower Bari Doab) and town sites, recovery of the cost of settlement from assignees and the grant of single harvest leases show considerable improvement but the gain is much more than counterbalanced by the drop in collections on account of the sale of Government estates. The natural diminution in sales of proprietary rights to colonists on the Lower Chenab Canal is the explanation of the diminution of receipts in Lahore, Gujranwala, Lyallpur and Jhang. Recoveries under this head amounted to only Rs. 6⅓ lakhs compared with recoveries of Rs. 22 lakhs in the preceding year. The improved collections in Gurgaon reflect the success which has attended Mr. Estcourt's efforts to complete the sale of crown lands in Ballabgarh The decrease of half a lakh under other items is mainly due to a decrease in the demand on account of mutation fees. This head of revenue is likely to be less remunerative in the future as the number of settlements in progress is curtailed. The present decrease is almost entirely due to diminished receipts in Lyallpur ascribed to the smaller number of acquisitions of proprietary rights Tirni receipts have maintained practically their former level. In Montgomery the extension of irrigation has curtailed the grazing grounds and it has been found necessary to revise the tirni arrangements with a resulting loss of income. In other districts, however, the favourable season led to a corresponding improvement in collections. Temporary cultivation has largely increased in consequence of the extension of irrigation from the Lower Bari Doab Canal and there has been a great rise in the demand on account of single harvest leases in Montgomery and Multan. The growth of collections on account of talbana is confined to the Multan Division and is due to the efforts made there to ensure punctuality in the payment of Government dues.

The balance of other land revenue at the beginning of the year was Rs. 62,515, of which Rs. 37 805 were collected, and Rs. 21,125 remitted The balance at the close of the year was Rs. 62,531. Half of this amount is due from the Jalpana estate in Shahpur. The Court of Wards is making arrangements for gradually meeting the arrears. In Montgomery a considerable sum on account of the sale proceeds of grass and trees is still outstanding.

Land Revenue Assignments.
Statement No. X.

6. No large lapses occurred during the year under report and the only fresh grants of importance were two military reward grants in Gujrat and Rawalpindi. Assignees shared in the increase in collections due to re-assessment and successful harvests and the total of revenue assigned rose from Rs. 30,78,734 to Rs. 31,80,255. But the percentage of total revenue assigned fell from 8·3 per cent. to 8·2 per cent. Revision of assignments in connection with settlement operations was completed in Raya, Daska, Gujrat, Kasur, Dera-Hamirpur and Fazilka Tahsils and the portions of Bhera and Shahpur under settlement. Registers are reported to be in good condition.

Coercive processes.
Statement No. XI.

7. Coercive processes for the collection of land revenue rose from 12,497 in 1913-14 to 17,952 and the amount of arrears for the realization of which they issued from Rs. 9,67,427 to Rs. 14,50,217, of which 93·4 per cent. was recovered. The collections made after issue of process amounted to 3 per cent. of the total collections made. The Multan Division is again responsible for more than half the total processes whether against or at the instance of lambardars and out of the total of Rs. 13½ lakhs collected in this way over 7½ lakhs were collected in this division. In consequence of the remarks made in paragraph 4 of His Honour's remarks on last year's report the Financial Commissioner made enquiries into the use of coercive processes in Muzaffargarh and Dera Ghazi Khan. In both districts the necessity for processes is ascribed to the dilatory habits of the lambardars and revenue payers, not to inability to pay, and the large increase in issues in recent years is due to special efforts to insist on punctuality. Mr. Diack accepts this explanation which accords with the reports received from the rest of the province. The Deputy Commissioner of Shahpur suggests that too few processes are issued, the Tahsildar taking a pride in keeping down their number and the lambardars being left to pay from their own pockets the amounts due from defaulters who can but will not pay. The Commissioner agrees with the Deputy Commissioner and is of opinion that "the prompt issue of a large number of processes after one or two harvests would probably induce punctuality." The experience of Attock where the number of processes reached a minimum supports this view. A portion of the increase is no doubt due to the larger demand for collection during the year and there were also special causes such as the disturbances in Jhang to which the increase in that district is partly ascribed. The main explanation, however is the increased attention paid to punctuality in payment.

Practically the only processes employed were writs of demand, warrants of arrest, and warrants for the distress or sale of moveable property. Writs of demand accounted for 69 per cent. of the processes. Processes executed amounted to 2,819. Arrests were made in 2,304 cases, chiefly in Lahore, Gurdaspur, Gujranwala, Jhang, Multan and Muzaffargarh. The Commissioner of Lahore explains that "Lahore Tahsil in previous years has distinguished itself for slackness in paying in revenue, and pressure has been put on of late to stop this bad habit." In Multan also there is a history of past dilatoriness which is being corrected.

Process-serving establishment.

8. The permanent tahsil establishment were again able to overtake the service of almost all the coercive processes. In 14 districts no additional establishment was required. In the remaining districts temporary servers were entertained for short periods at a total cost of about Rs. 950.

Progress made in re-measurement, revision of records, &c.
Statements Nos. XII, XII-A and XIII.

9. At the beginning of the year ten settlements were in progress. At its close measurements and record work remained to be done in four and from only three were assessment reports due. The Dera Hamirpur settlement in which there was still a little record work to be done and the Ferozepore settlement where the demand of Fazilka was announced

and distributed were completed early in the year. The Settlement Officers of Sialkot, Lahore and Shahpur completed the records of their districts. In each the introduction of the new assessment in one tahsil is all that is left to be done. In Gujrat the field measurements in the Jhelum riverain were completed and those of the Chenab riverain begun. There is little measurement of this kind remaining, but the necessity for a special quadrennial attestation of the jamabandis has added to the work of the settlement. Killabandi work was delayed by plague and in other ways, and was not complete at the end of the year. Killabandi operations were completed in Sialkot. Good progress was made with record work in Jullundur and Simla. In the former measurements have been completed and record work has been practically finished in Jullundur and Nakodar Tahsils and good progress was made in the rest of the district. Field survey has been overtaken throughout the Sutlej riverain. The work in Kangra has been delayed by various mishaps and the necessity of changing Settlement Officers which Mr. Boughey's ill-health and departure on leave occasioned caused some disorganization and consequently retarded the progress of the work. The Financial Commissioner has recently considered the best means of accelerating the rate of outturn chiefly by improved methods and will address Government as regards the probable duration of operations when the necessary materials are at his disposal. Throughout Kangra the record of rights in trees in undemarcated protected forests is still incomplete as the final decision of Government on certain questions has not yet been obtained. The tahsils for which assessment reports were submitted were Palampur, Jullundur, Nakodar, Lahore, Zafarwal, Phalia and Khushab. Reports were also submitted for the Bharauli ilaka of Simla, Simla town lands, Lahore town lands and the Saidwala tract transferred from Montgomery to Lyallpur. The new demand was announced in Jullundur, Chunian, Fazilka, Zafarwal, Kharian and Khushab and its distribution completed in most of these tahsils.

Final Settlement Reports.

10. Final settlement reports for Lyallpur, Ferozepore, Una Tahsil, and the rest of Hoshiarpur were submitted to the Financial Commissioners and have now been reviewed by them. The orders of Government on the reports of Amritsar and Gujranwala were received. The settlement of the Leiah Thal was confirmed for twenty years as in the case of the adjoining tracts in Bhakkar.

Comparison of estimates and forecasts in regard to duration, cost and results.

Statements Nos. XIII and XIV.

11. It was explained in last year's report that it had been found necessary to revise the schedules and estimates for the Sialkot, Lahore and Shahpur settlements and it was said that the forecast for Gujrat was likely to be exceeded. In both Sialkot and Shahpur the revised estimates are being worked up to as regards duration and cost, although the unavoidable delay in disposing of Mr. Leigh's first assessment report makes it impossible to frame accurate estimates. In Sialkot the Settlement Officer hopes to be able to keep the expenditure below the estimate. Extensions up to the end of March have been sanctioned in both Gujrat and Lahore. It is unlikely that the former settlement will finish during the current financial year as orders on the Phalia Assessment Report have been delayed. Similarly the Settlement Officer of Lahore is unlikely to receive orders on the urban assessment in time to enable operations to be concluded according to the existing sanction. In each of these settlements the cost will exceed the estimate of the forecast report by over half-a-lakh. The duration and cost of Kangra settlement will form the subject of a separate reference to Government. The estimate of the forecast report under both heads is likely to be considerably exceeded. Good progress at a normal cost is being made in Simla. The settlement of Jullundur will be completed within the time expected, and the estimate of cost should be little if at all exceeded. Of the settlements concluded during the year that of Ferozepore was completed before the expected date at practically the expected cost, but in Dera-Hamirpur unforeseen difficulties led to a longer duration of operations and to an excess of a lakh in the cost. As re-

gards results the settlements current during the year will much surpass the estimates. The forecast reports expect a total enhancement of about Rs. 20 lakhs. An increase of about Rs. 25 lakhs is now considered likely. The forecast of Ferozepore was exceeded by about Rs. 2½ lakhs. In Lahore the increase will be about a lakh more than was expected when the settlement began. The results in Shahpur will be ¾ths of a lakh better than the forecast and in Gujrat half-a-lakh. In the other settlements the results will probably be according to expectations.

Proposed future settlement operations.

12. Sanction was received during the year to the inception of the settlement of Ambala which accordingly began in October 1915. The forecast report of Dera Ghazi Khan was called for and is now under the consideration of the Financial Commissioner. The scheme of operations printed in Appendix V to the Settlement Manual has been revised for another quinquennium. It is expected that in each of the two years 1916-17 and 1917-18 one new settlement will be begun and three current settlements will be closed. In connection with the partition of common lands in the Bhakkar Thal proposals have been made for a rectangular survey in that tract preparatory to killabandi.

Settlement staff.

13. The only settlement begun during the year was that of Simla and the congestion of establishment consequently continued. The settlement of Ambala was undertaken at the end of the year, but there is still a plethora of trained men. All sub. *pro tem.* kanungos have been brought under reduction and eleven permanent men have been retired. During the next ten years the number of naib tahsildars likely to be employed in settlements will be much less than at present. The Financial Commissioners have therefore taken steps to reduce by 40 the 100 appointments added to the divisional lists in 1910 when the settlement and executive staffs were amalgamated. In addition 10 *quâsi*-permanent appointments of tahsildar have been brought under reduction.

Surveys.

14. The Punjab Riverain Detachment of the Survey Department was employed on field work in the riverains of the Sutlej and the Chenab and in Kangra and Simla. The work on the Sutlej consisted in providing a traverse for the field measurements in the Bet villages of Phillaur and Nawashahr. On the Chenab similar materials were supplied for the Bet villages of Phalia. This riverain work which cost Rs. 22,865 comprised 1,278 linear and 231 square miles of traverse. In Kangra the special traverse of the Kangra Tahsil was completed and work in Nurpur was begun. The cost for 3,464 linear and 494 square miles of traverse was Rs. 58,610 or Rs. 118·6 per square mile. The cost is somewhat more than last year on account of the cost of grain compensation to the subordinate establishment. The cost in Simla where the ground is more difficult and more points are required is higher. In all 1,106 linear and 53 square miles were traversed at a cost of Rs. 8,992 or Rs. 169·7 per square mile. Topographical survey operations were continued in Hissar, Rohtak and Gurgaon.

Boundaries.

15. There was no important alteration in district boundaries during the year. The most important boundary work was that undertaken by Mr. Jacob and Mr. Oppenheim on the Jumna in connection with the provincial boundary with the United Provinces. The special officers were able to secure agreement to a permanent boundary of proprietary right on half the length of boundary and have made proposals for legislation for compulsory demarcation of a boundary in the remaining cases. The principle of a compulsory determination of a fixed boundary has been accepted by the Punjab Government and is now under the consideration of the Government of the United Provinces. The dispute between certain villages of Gurgaon and Alwar is still un-settled. Questions regarding the boundary between Jammu and the Gurdaspur and Sialkot Districts which were open to doubt or dispute were settled by agreement between the Settlement Commissioner of Kashmir and the local officers.

Record rooms.

16. A revised Standing Order was issued dealing with record rooms and embodying the recommendations of the Clerical Establishments Committee. Several district reports refer to the saving of labour that has resulted. At the same time the forms used in connection with record rooms have been standardized, a process which should result in considerable saving of expenditure. A good deal has been done of recent years to improve the record rooms of the Province, and though some works for which administrative sanction has been obtained have had to be postponed owing to the war, the complaints of serious congestion are few.

The prosecution of the Head Copyist of Mianwali referred to in last year's report has ended in a conviction. A muharrir of the same district was convicted for the fraudulent removal of a notarial stamp.

Sanction to the introduction of the new copying rules has not yet been received. They continue to work well in Sialkot and Jhelum.

Other matters.

17. Rupees 19½ lakhs were paid in through the Post Office on account of land revenue in twenty-five districts. Only Rs. 3,360 were remitted in currency notes. In Rohtak the experiment of making this latter method of remittance available has not proved successful and its discontinuance has been recommended. Gurgaon, Karnal, Gujranwala, Montgomery, Jhang and Muzaffargarh are the districts in which the use of money-orders for the payment of land revenue is most general. In Rawalpindi Division an experiment in the collection of land revenue on dates fixed for each village on a regular roster is in progress. It is part of the experiment that a lambardar shall not be forbidden to pay in whole or part in advance of the date fixed for his village. The suitability of revising the orders now in force under section 63 of the Land Revenue Act to which reference was made in last year's report will be considered when the results of the experiment are known. During the year the Financial Commissioner accepted a suggestion made by the Clerical Establishment Committee that revenue courts should be permitted to serve processes by post. The financial stringency, however, has made it necessary to defer the introduction of this method of service.

Enhancement of rent.
Statement No. XV.

18. The volume of litigation for the adjustment of the rents of occupancy tenants was less considerable than in any year since 1906. Of 1,308 suits for enhancement 1,090 were successful. There were only 8 suits for reduction. Almost a third of the cases were tried in Gujrat where the crop of petitions was due to the announcement of the new demand in Gujrat and Kharian Tahsils. The number of suits in Hoshiarpur has declined with the completion of settlement operations, and in Jullundur also institutions which increased enormously when settlement began are less numerous. In Gurdaspur and Amritsar litigation of this kind has reached its normal level. The increases in Hissar and Rohtak are due to special causes. In Rohtak the figures represent almost entirely the disputes of one village. More than half the Hissar cases are from two villages.

Ejectments.
Statement No. XVI

19. Litigation for the ejectment of tenants with rights of occupancy was even more scanty than in previous years. Proceedings against or by tenants-at-will were normal in amount. Applications for the service of notice fell from 13,417 to 11,920 and the notices issued from 30,019 to 26,971, but the ejectments made rose from 5,671 to 6,099.

The statistics of proceedings of the various kinds are very closely paralle to those for the year ending in September 1910, in which the agricultural conditions strongly resembled those of the year under report. Proceedings are comparatively rare in the Rawalpindi and Multan Divisions, and even in the districts where recourse to the courts is more frequent the relations between landlords and tenants are cordial.

Descent of Jagirs Act.

20. Only one jagir, that of Rehlu in Kangra, was notified during the year. The Financial Commissioner has arranged to include in the volume of Rules under the Land Acts, which is about to be published, a complete list with appropriate details of the notifications which have issued under this Act. This will provide a record of the progress made under the Act and will keep the subject before the Deputy Commissioners in the districts where there is still scope for action.

Canals under departmental management.

21. Irrigation from canals managed under Act VIII of 1873 was generally satisfactory. Irrigated areas increased in Hissar and Gurgaon but a large decrease took place in Karnal on account of a short supply in the kharif and a weak demand in the rabi. Good rains led to a reduction in Ludhiana and Ferozepore. The Commissioner notes as regards the Sirhind Canal generally that there seems to have been a considerable failure of jowar, charri and maize owing to disease and also excessive rainfall. The net result of adjustments of fixed assessments by the application of the nahri parta rules was a decrease of Rs. 2,373. Irrigation from the Upper Chenab Canal was extended through the Raya branch in Sialkot, Gujranwala and the trans-Ravi portion of Lahore and through the Nokhar branch in Wazirabad and Gujranwala Tahsils. The orders restricting irrigation from this canal in Sialkot to the waste and severed well lands are unpopular and the cause of difficulties in practice. There are also problems connected with communications which are affected by the revision of district boundaries. Difficulties of assessment arising from the mingling of canal and flood waters were settled by the local officers. The supply in Shahpur from the Lower Jhelum Canal is described as sufficient though not abundant and in Lyallpur the tightening up of the supply from the Lower Chenab Canal is said to have been carried out skilfully. In Jhang, however, there have been numerous complaints of shortage of water on both canals. The distributary of the Lower Chenab Canal which had been selected for the experiment of a fixed assessment of land revenue and occupiers' rates has been found to be unsuitable for the purpose and the experiment has therefore been postponed. There has been a large extension of irrigation from the Lower Bari Doab Canal in Multan chiefly for temporary cultivation. Inundation canals generally did very well. Both the Upper and the Lower Sutlej systems showed irrigated areas much in excess of the normal. The results on the Sidhnai in spite of floods and closures to avoid silting-up the canal were satisfactory. The Chenab Inundation Canals in Multan in both harvests matured areas above the average and in Muzaffargarh with a supply which though below normal remained steady the irrigated areas of last year have been exceeded. In the last named district the Financial Commissioner's proposals to enhance the occupiers' rates for rice have been accepted. An enquiry is being made into the practice which has arisen of classifying crop failure according to its supposed origin. The information collected in this way is of doubtful accuracy or value and the abandonment or simplification of the present practice is probably advisable. The Indus canals in Dera Ghazi Khan ran precariously but rain came to the assistance of the crops sown with canal water.

Canals under district management.

22. The season was not favourable to the Gurgaon bands and the area matured with their aid, namely, 6,002 acres, though much in excess of the area of the previous year, was far below that of a good year. The total demand of Rs. 6,635 included Rs. 6,162 on account of water-rates. The normal income from water-rates was estimated by the Settlement Officer to be Rs 5,300. Rs. 10,826 were spent on repairs and maintenance and more would have been spent if more had been available. Owing to unprecedentedly heavy floods in the Ghaggar the Rangoi Canal in Hissar irrigated a large area. Similarly the Sarusti Canal in Karnal, fed by water from the hill streams which ran full in autumn and spring, had a successful year. The irrigated area rose from 11,859 acres to 22,015 acres and the receipts on account of water-rates from Rs. 16,249 to Rs. 37,724. Establishment and contingencies cost Rs. 7,083 and Rs. 10,573 were spent on maintenance and improvements. Other

works for the employment of the waters of hill streams in Karnal have not been so successful. The Shah Nahr in Hoshiarpur started the year 1914 with a new masonry regulator. Its construction, however, proved to have been defective and soon after it had been completed it was considerably damaged by the summer floods of 1914. Measures for its repair before the flood season of 1916 are being taken. The areas irrigated and matured during the year under report remained practically the same as in the preceding year. The income from water-rates amounted to Rs. 30,921 and the expenditure to Rs. 28,127. The new schedule of rates was notified during the year. The main items of expenditure were Rs 10,902 on clearing and repairs and Rs. 9,237 paid to share-holders. The financial position of the canal is very strong. The Grey Canals in Ferozepore had a very successful year. The irrigated area rose from 136,641 acres to 183,532 acres, the demand on account of water-rates from Rs 1,58,644 to Rs. 2,16,136 and the water advantage assessment from Rs. 62,397 to Rs. 83,172. The canal fund had an opening balance of Rs 55,301 and a closing balance of Rs. 86,351 Rs. 40,500 were spent on improvements and Rs. 6,860 on the payment of interest and deduction of debt. The zamindars have now agreed to the revised schedule of water-rates and with the help of Government and the district board the financial position and the efficiency of the canals will be much improved. The Nammal Canal in Mianwali watered 4,130 acres in the kharif and 9,928 acres in the rabi. The receipt from water-rates amounted to Rs. 22,589. Certain serious defects in the system of distributaries resulting in the failure to provide irrigation to those entitled to receive it were discovered and an officer of the Irrigation Department was specially deputed to put this right. A better system has now been introduced and a minor has been constructed for the neglected area. The minor canals and works in Montgomery have all done an abnormally large amount of irrigation. The Kitchin Canals, with the Mehdi Khan Canal which was notified under the Act during the year, flooded 47,686 acres and matured 3 ,181 acres compared with 20,232 and 11,162 acres, respectively, in the preceding year. The demand on account of water-rates was Rs. 38,521. Expenditure amounting to Rs. 41,070, which included a grant of Rs 10,000 made by Government was undertaken on the maintenance and improvement of these canals. The Ravi canals, the Garak and the Garkana, also were unusually successful. They are said, however, to be badly in need of improvement, and the advantages which extended irrigation would afford are considered to justify the necessary expenditure. Any proposals which the local officers may make should take into consideration the prior claims of the Sidhnai It seems very unlikely that there is any room for the extension of seasonal irrigation from the Ravi.

Land Acquisition Act.

23. Seven thousand and seventeen acres were acquired for public purposes Of this area 2,581 acres were acquired for railways, chiefly the Jind-Panipat Railway in Karnal, the Jullundur Doab Branch Railway in Hoshiarpur and Jullundur, the Sialkot Narowal Railway in Sialkot and the Chakwal-Mandra-Bhaun Railway in Jhelum and Rawalpindi. The compensation for land only (excluding trees and buildings and the 15 per cent. addition for compulsory acquisition) averaged Rs 198 per acre. For canals 3,723 acres were acquired at an average rate of Rs. 82. The difference of the rates is noticed by the Deputy Commissioner of Sialkot where considerable areas were acquired at average rates of Rs. 154 and Rs. 62, respectively, and accounted for by the fact that the canal land acquired is generally high and of small value, while the railways seek the most densely populated areas. The Deputy Commissioner of Sialkot is also of opinion that the tendency is to underestimate the value of purely agricultural land and to overestimate that of suburban land. Acquisition for canals was chiefly in Sialkot, Gujranwala, Gujrat, Montgomery and Multan for the canals of the triple project. 657 acres were acquired for miscellaneous purposes. The chief item was the expropriation of rightholders in the municipal forest at Dharmsala with the object of preserving the hill side which was in a dangerous condition. Altogether Rs. 11,57,657 were paid in compensation for land, the average price being Rs. 165, as compared with Rs. 161 last year.

Loans under the Land Improvement Loans Act (No. XIX of 1883).
Statements Nos. XVII, XIX, XX, XXI and XXII.

24. In Rawalpindi and Attock Districts a few embankments were constructed with public money, and in Mianwali loans were taken for preparing water-courses and culverts on the Nammal Canal. Otherwise the sinking and repair of wells were the objects for which loans were required. The conditions of the year were favourable and the credit of the people high. Consequently the demand for takavi under Act XIX fell off and only Rs. 1,88,880 were advanced, or about half the amount of the previous year. Ferozepore district took over Rs. 70,000, and the Commissioner notes that the special attention paid to takavi work has led to a substantial increase of wells in that district, a result to which the introduction of the iron Persian wheel and the rise of water level in the tract affected by the Sirhind Canal have largely contributed. No loans at all were given in Hoshiarpur, Lyallpur and Jhang, and only trifling sums were advanced in Ambala, Hissar, Rohtak, Lahore and Shahpur. The only districts which required as much as Rs. 10,000 were Ferozepore, Multan, Sialkot, Gurgaon, Mianwali and Attock. The Commissioner of Jullundur remarks that "a good deal more might be done in the way of advances if tahsildars interested themselves in pushing them." It is possible however that districts do not make more use of takavi because with the improvement in credit due to higher prices and the extension of credit societies land-owners no longer to any considerable extent find it hard to raise loans for improvements in the open market. If loans are available readily in the open market there is less necessity for pushing takavi. The system is generally described as popular. The opportunity of obtaining loans is well-known Advances are stated to be applied to the objects for which they were given, and the works undertaken with their aid are with few exceptions duly inspected. Public money was expended on the construction or repair of 439 wells, and private funds were used in 3,414 cases. The rate of land improvement of this kind was somewhat less than in the two preceding years, but exceeded the normal of earlier years. Remissions of land revenue were granted for 1,384 wells fallen out of use, 1,253 being in Multan Protective leases were granted for 3,477 wells. Of these 2,309 were in Lahore or Sialkot which are under settlement, and practically all the rest in the districts of the south-west, whose land revenue system provides for the re-assessment during the currency of settlement of well lands not protected by certificate. The balances at the beginning of the year were Rs. 15,65,472 on account of principal and Rs. 4,213 on account of interest. Rs. 93,518 interest fell due during the year. Collections on account of principal amounted to Rs. 2,26,582, and on account of interest to Rs. 88,824. Remissions of principal or interest were insignificant. Balances of principal and interest overdue at the end of the year were, however, Rs. 19,222 and Rs. 8,335, chiefly owing to dilatoriness in payment in Multan. The financial gain to the provincial Government was Rs. 33,869, or practically the same as last year.

Advances under the Agriculturists' Loans Act (XII of 1884).
Statements Nos. XVIII, XX, XXI and XXII.

25. As in the case of loans for land improvement the requirements of districts under Act XII of 1884 varied enormously. No advances were made in Hissar, Rohtak, Hoshiarpur, Jullundur and Ferozepore, and in Ambala, Shahpur, Jhelum, Rawalpindi and Jhang the amount loaned was trifling Gurgaon, Amritsar, Gurdaspur, Montgomery, Muzaffargarh and Dera Ghazi Khan were the only considerable borrowers. Advances were almost always required for the purchase of bullocks although in Gurgaon, Montgomery and Muzaffargarh seed also had to be provided with borrowed money. In Gurdaspur the borrowers were chiefly the inhabitants of villages damaged by floods in the Beas. In Montgomery the demand by colonists is said to be endless. The demand in Muzaffargarh which in the previous year was Rs. 11,665 and in the past has been on an average about Rs. 40,000 rose to over Rs 80,000. Bullocks and seed were purchased. The whole amount advanced throughout the province was Rs. 2,64,227 or almost the same as in the preceding year. Rs. 3,76,985 on account of principal were collected, and Rs. 24,954 on account of interest. The balance of

principal at the beginning of the year was Rs. 4,97,626, and at the end Rs. 3,83,689. The large balance of principal overdue at the end of the year, Rs. 24,823, accrued chiefly in Gujranwala, Multan, Muzaffargarh and Dera Ghazi Khan, where collections were delayed. The provincial result of the loan operations under this act was a gain of Rs. 7,637.

Forest Act and Government lands.

Statement No. XXIII.

26. No forest settlement of importance was undertaken during the year. The selection of forests in Kangra for regenerative closures and for transfer to district management to which reference was made in last year's report was continued by an officer of the Forest Department on special duty and proposals were made by him after the close of the year. In connection with the transfer of the Dera Ghazi Khan rakhs from the Forest Department to the Deputy Commissioner a scheme for their future management was called for in 1912 and was prepared in 1913 by the Deputy Commissioner with the assistance of a Forest Ranger. It was forwarded by the Commissioner to the Conservator of Forests during the year under report, and has now reached the Financial Commissioner and is under his consideration. Approval has been given to schemes for the browsing of the 55th and 56th Camel Corps in Multan and Montgomery and the 57th Corps in Multan. The Deputy Commissioner of Shahpur was authorised to secure the acceptance by right-holders of a scheme for the browsing of the 53rd Corps in the hill rakhs of that district. In Jhelum the proposals made by the Forest Department for meeting the requirements of the 52nd Corps were adversely criticised by the Deputy Commissioner and are now being re-examined in the light of the pronouncements made in the past by Government regarding the lines on which the Jhelum forests should be administered. It has not been possible to make much progress with the allied scheme of providing grazing for camels on the line of march. The management of the Shahpur Kandi forests continues to be satisfactory. The income was Rs. 3,890 and the expenditure Rs. 2,542. More than Rs. 1,100 of the profit made was put into the Pahari Co-operative Bank which is promising very well The new system for the management of the Pindigheb rakhs in Attock was brought into force, leases for grazing and cultivation being given.

Reference has been made in paragraph 5 to the effect of the extension of irrigation on tirni-paying lands. The area of unclassed forests and Government waste lands under the control of the Deputy Commissioner has fallen by about 340,000 acres, the area held by Government tenants showing a corresponding increase. The largest decrease in the waste took place in Montgomery and amounted to 238,000 acres. The decreases in Lyallpur and Gujranwala are due to sales and allotments of lands commanded by the Upper Chenab Canal, but that in Shahpur where the areas of the Khushab rakhs have been recalculated is merely statistical In Montgomery the Financial Commissioner has sanctioned arrangements by which all camels in the Ravi tahsils, whether native or foreign, will be treated as "naubaramad," the right to collect tirni at the authorised rates being leased to local contractors. This system will permit the gradual extinction of the camel tirni demand concurrently with the colonization of the waste. The system of assessments fixed for a period will continue in the Sutlej tahsils, but is unsuited to a tract which is being rapidly colonised. The system of annual contracts for cattle grazing already provides for automatic adjustment of the demand. In Multan the Lower Bari Doab Canal area has been formed into two new chaks for tirni purposes in which the contracts will be auctioned annually. Elsewhere the present system will continue. The area of Government land cultivated by lessees rose from 151,859 acres in the previous year to 213,430 chiefly on account of the extensive grant of single harvest leases on the Lower Bari Doab Canal in Multan, but partly also on account of favourable climatic conditions. Two applications for the grant of land for cultivation with the aid of tube wells were received, but no practical test of the usefulness of these in lands available for lease has yet been made.

NOTE.—The return for Shahpur in last year's report was wrong. The correct figure is 12,280 not 1,418.

Punjab Land Preservation (Chos) Act.

27. Section 4 of the Chos Act has now been applied to 22 hill villages of Ambala District. Proposals for further restrictions under section 5 were also submitted to Government, but action has been postponed during the present financial stringency. A record of rights in respect of the notified areas was prepared, a tahsildar on special duty being employed for the purpose. Proceedings were also taken to estimate and award compensation for the restrictions imposed under section 4. In Hoshiarpur proposals for the extension of the areas to which section 5 applies were made. Orders on them have been postponed on technical and financial grounds. The sowings on the Siwaliks made during the rains of 1914 have turned out only partially successful partly on account of the break in the monsoon in August 1914, and partly on account of the inadequacy of the monsoon of 1915. Sowings were repeated throughout the notified area. The Commissioner, Mr. Fagan, passed across the range in October 1915, and was struck with the improved appearance presented by the western slope.

General statement of owned and mortgaged area. Statement No. III.

28. In paragraph 27 of last year's report the Financial Commissioner noticed the necessity for re-examining the returns of total cultivated area received from certain districts, and he promised to have the causes of the most marked variations investigated. For two districts the returns were found to be erroneous and were corrected; in the others the variations are attributed either to statistical inaccuracies or to vicissitudes of season during the year 1913-14. The correct provincial figures will be inserted in last year's report by an addendum slip. The compilation of the present returns has brought to light a discrepancy of nearly 500,000 acres of cultivated land in the previous returns from Shahpur, and it is therefore necessary to exclude that district from consideration in calculating the increase in cultivation In the remaining districts of the province the total increase in cultivated area brought on record amounted to 111,279 acres. The increase is general. The same proportion of the cultivated area, namely, 11½ per cent., as in the preceding year, is under mortgage. The proportion held by mortgagees of non agricultural tribes has fallen slightly and is now 5 per cent.

Transfers.

Statements Nos. XXIV—XXVII.

29. The main feature of the transfer statistics of the year is the decrease in the area affected by mortgages and redemptions. The area in which the proprietary rights were sold rose from 121,809 acres in the preceding year to 133,933 acres in the year under report. but the latter figure is inflated by the inclusion of over 17,000 acres sold from the Skinner estate in Hissar, and normal sales have fallen. Mortgages of proprietary right were created on 226,668 acres and extinguished on 239,644 acres, the corresponding figures last year having been 245,631 and 282,290, respectively. Transactions of all kinds have been less important than before in the Ambala Division, the Jullundur Division (except Hoshiarpur), and the districts of Gurdaspur, Multan and Muzaffargarh. There has been a large increase of transactions of all kinds in Lahore and Sialkot in which settlement operations are being concluded, and an appreciable increase in Gujranwala, Montgomery and Lyallpur.

Different explanations of the variations are given in different districts. The decrease in mortgages and redemptions in Kangra is ascribed to the inability of military men on active service to return and invest their savings in land as they used each year to do. This, however, leaves unexplained the rise in sales and the firmness of transfer values. In Ludhiana and Ferozepore redemptions which were abnormally numerous in the preceding year following on the introduction of the Redemption of Mortgages Act regained their usual level. The general conclusion appears to be that the year was not much, if at all, better than an average year. The total areas sold were below normal, and those mortgaged not in excess of normal, the only unusual feature being the comparatively small areas redeemed. That may to some extent be explained in the way suggested in the Kangra report, but it is also possible that

some of the money which might have been applied in redemption of mortgage has been diverted to other objects, such as the acquisition of colony lands. The process of reducing the area under mortgage continued, though the rate of release was less than in any year during the last decade.

Value of land.

30. It was pointed out in paragraph 29 of last year's report that the real selling value of cultivated land was obscured by the magnitude of the sums spent in acquiring land in the suburbs of Lahore. Over a crore was spent on the purchase of 3,335 acres of which 2,204 were cultivated. As desired by Government in paragraph 12 of His Honour's remarks on that report the figures for Lahore have been re-verified and no necessity for correction has been discovered. During the year now under report, there has been, as the Commissioner of Lahore remarks, a cessation of speculation in the city, and the sum spent was under Rs. 29 lakhs although the area sold increased to 4,955 acres (including 3,637 cultivated). In other municipal areas also, notably Sialkot and Amritsar, smaller areas than in the recent past have been alienated. The all-round sale price of land has therefore fallen from Rs. 249 per acre cultivated to Rs. 180. The rate is much in excess of any rate prevailing before 1913. Practically every district in which the calculations are not affected by urban speculation reports a rise in the value of land, and it is clear that the appreciation of the value of land devoted to agriculture has continued unchecked. This conclusion is borne out by the increase in the consideration for which land is mortgaged The average mortgage money per acre cultivated was Rs. 130 in the year under report and Rs. 124 in the preceding year. This rise has taken place in spite of the tendency which the growth of mortgages for limited periods to non-agriculturists has, as is noticed in the Lyallpur report, to reduce the rate of consideration.

Land Alienation Act.
Statement No. XXV.

31. The year was an uneventful one so far as the Land Alienation Act was concerned. The only new tribes notified were the Biloches of Ferozepore and the Sainis of Gujranwala. The Financial Commissioner found it necessary to issue instructions for the guidance of Deputy Commissioners in making references under section 21 A (1) of the Act to Civil Courts of appellate jurisdiction. At the same time enquiry was made as to the extent to which in the past action had been necessary for the revision of a decree or order of a Civil Court contrary to the provisions of the Act, and it was found that such occasions have been exceedingly rare. No new methods of evading the Act have been discovered. *Benami* transactions and misdescription of caste or tribe are the commonest expedients. The former is reported to be infrequently resorted to in several districts and appears to be commonest in Sialkot and Rawalpindi. Claims to membership of agricultural tribes cause a great deal of work in Sialkot, but generally the amount of work thrown on the district establishment by the Act is not considerable. In Lyallpur almost half the temporary alienations have been in favour of non-agriculturists and in forms permitted by the Act, and the same was the case in Jhang. It is a fair inference that evasion of the Act is generally either impracticable or unprofitable. The results of the alienations reported during the year were on the whole favourable to the agricultural tribes. They bought 8,498 more acres than they sold, and redeemed 20,039 acres more than the area redeemed from them, but pledged 28,270 more acres than they took on mortgage. The area redeemed by them exceeded by 5,881 acres the area on which they created new mortgages. As has already been observed this rate of release is less than in any year during the last decade.

Business Returns.
Statements Nos. XXVIII and XXIX.

32. The volume of case work disposed of by Revenue Officers was practically the same as in the preceding year as was also the number of pending cases. A considerable increase occurred in those under the Land Revenue Act, corresponding to the increased issue of coercive processes, and a large decrease took place in miscellaneous cases and in cases under the Land Alienation Act. Nearly half the total cases under

Act XIII of 1900 were decided in Jullundur and Gujrat, which are under settlement, and in Rawalpindi. In Shahpur and Dera Ghazi Khan partition work is heavy, and in the former district a special staff was entertained for its disposal. In Montgomery the number of miscellaneous cases is swollen by the increase in the grant of single harvest leases, but a general cause of diminution in the disposal of cases of this kind is the smaller use made of the Loans Acts. The great increase in miscellaneous cases in Muzaffargarh, however, is attributed to more numerous demands for *takavi*. Cases under the Redemption of Mortgages Act were numerous in Amritsar, and special reference is made in Rohtak to the popularity of the Act. Revenue judicial business instituted, decided and pending in courts of appeal and revision remained unaltered, but a large decrease took place in revenue executive appeals. The pending file increased and is considerable in Rawalpindi Division but has fallen to a low level in other courts.

Tour of Commissioners.

33. The returns of touring done by Commissioners refer to the year ending 31st March 1915 :—

Ambala.—Lieutenant-Colonel C. M. Dallas, C.S.I., was Commissioner for the whole year and spent 108 days on tour.

Jullundur.—The Hon'ble Mr. P. J. Fagan held charge for 309 days and spent 56 days on tour. Mr. T. Millar, was in charge for 4 days and then the Hon'ble Mr. H. J. Maynard, C.S.I., was Commissioner for the remaining 52 days of the year, of which he spent 25 days on tour.

Lahore.—Mr. H. A. Casson, C.S.I., was Commissioner throughout the year, spending 70 days on tour.

Rawalpindi.—Lieutenant-Colonel F. Popham Young, C.I.E., held charge for the whole year, of which he spent 116 days on tour.

Multan.—Mr. C. J. Hallifax was Commissioner throughout the year and remained 111 days on tour.

FINANCIAL COMMISSIONERS' OFFICE:
Dated Lahore, the 19th February 1917.

FROM

MILES IRVING, ESQUIRE, I.C.S.,

Senior Secretary to the Financial Commissioners,
Punjab,

To

THE HON'BLE MR. J. P. THOMPSON, I.C.S.,

Chief Secretary to Government, Punjab.

The Hon'ble Mr. H. J Maynard, C.S.I., I.C.S.
The Hon'ble Mr. P. J. Fagan, I.C.S.

SIR,

I AM directed to submit the Annual Report on the Land Revenue Administration of the Punjab for the agricultural year ending the 30th September, 1916.

2. The office of Financial Commissioner was held from 1st October 1915 to 13th May 1916 by the Hon'ble Mr. (now Sir) A. H. Diack, C. V. O., and from 1st June 1916 to the end of the year by the Hon'ble Mr. H. J. Maynard, C.S.I., I.C.S.

Sir M. W. Fenton, K.C.S.I., was Financial Commissioner from 1st October 1915 to 14th January 1916 and the Hon'ble Mr. P. J. Fagan, I.C.S., from 15th January 1916 to the end of the year, holding charge of both posts of Financial Commissioner from the 14th to the 31st May, 1916.

I have the honour to be,

SIR,

Your most obedient servant,

MILES IRVING,

Senior Secretary to the Financial Commissioners,
Punjab.

333 FC—334—23-2-17—SGPP Lahore.

Proceedings of His Honour the Lieutenant-Governor of the Punjab in the Department of Revenue and Agriculture (Revenue), No. 6684, dated 28th March 1917.

READ—

The Annual Report on the Land Revenue Administration of the Punjab for the year ending 30th September 1916, forwarded with letter No. 491—53 H. C., dated 26th February 1917, from the Senior Secretary to the Financial Commissioners, Punjab.

REMARKS.—The character of the seasons in 1915-16 was distinctly unfavourable for agriculture. The monsoon arrived late and never really penetrated with full strength into the province, with the result that the area sown for the autumn harvest was 23 per cent. below the normal, while the matured area was 35 per cent. less than that of the previous year. The rainfall in September was indeed sufficient over the greater part of the province for the sowing of the rabi crop, and the sown area, though 13 per cent. less than in the previous year, was 2 per cent. above the normal. Owing, however, to the almost complete failure of the winter rains nearly a quarter of the crops sown failed to mature, and the crop actually harvested was in area 23 per cent. less than in 1915. In round figures only 19½ million acres of crops were raised in both harvests against over 28 millions in the previous year. Of those 19½ million acres 8 millions were irrigated by canals, the limited supplies of which were taxed to the uttermost, but were distributed with care and discrimination. It is clear that the steady expansion of irrigation in the last 20 years alone stands between the province and serious famine in an unfavourable year such as that under review. The adverse climatic conditions of the year are reflected in the large increase in the amount of land revenue which had to be suspended. Such suspensions, which were given chiefly in the south-east of the province and in the Rawalpindi Division, amounted to over Rs. 12¾ lakhs as compared with Rs. 1½ lakhs in the previous year and an average of Rs. 5 lakhs, and very little of the balance suspended in previous years could be collected. Prices were however on the whole good, cotton in particular recovering from Rs. 4-4-0 to Rs. 6-9-0 per maund, and the high prices of agricultural produce, though they continued to press severely on the consumer, helped to compensate the agriculturists for the deficiency in outturn.

2. The fixed land revenue demand rose from Rs. 217 lakhs to over Rs. 226 lakhs. New assessments in Kangra, Hoshiarpur, Jullundur, Sialkot and Gujrat accounted for an increase of Rs. 12 lakhs while another lakh was due to the formation of new estates in Gujranwala. There has been a nominal decrease of about Rs. 4¼ lakhs due to the erroneous exclusion of new assessments in two tahsils of the Sialkot District from the fixed revenue roll. Leaving out of account the amount under suspension at the end of the year and irrecoverable and undetermined balances, the whole of the demand put down for collection was recovered with the exception of Rs. 8,000, and this was effected without recourse to the issue of coercive processes on an abnormal scale. His Honour agrees with the Financial Commissioners in considering that the facility with which the realizable demand was collected in so unfortunate a year is a convincing testimony to the general moderation and elasticity of the fixed land revenue of the province.

3. Collections of fluctuating land revenue fell by nearly Rs. 6½ lakhs to about Rs. 122 lakhs, the decrease being due to the failure of the rains and low river floods which prejudiced the working of inundation canals. There was also a falling off of over Rs. 3 lakhs in the collections of "other land revenue" owing partly to the continually decreasing amounts to be realized from purchasers of proprietary rights in the older colonies, and partly to the contraction of receipts from single harvest leases which marks the progress of permanent allotment in the Lower Bari Doab colony. Purchase of proprietary right by Government tenants and sales of Government waste land between them account for an income of over Rs. 30 lakhs, and it is important to remember that this is not recurring income, but a realisation of capital.

4. In spite of the trying conditions of the year the number of coercive processes issued fell by 10 per cent. to 16,129, of which about 11,000 were merely writs of demand. In only 10 cases was resort to imprisonment necessary, and only in three was immovable property attached. The Multan division again accounted for more than half the total number of processes and this, as in the previous year, is attributed to the special efforts which are being made to enforce punctuality of payment. In Lyallpur, where a demand of 1¼ crores of rupees was collected, only 138 processes had to be executed, a most striking proof of the prosperity of the district and of the good effects of insisting on punctual payments from the outset. As the Deputy Commissioner remarks, promptness in payment is very much a matter of habit and tradition.

The experiment made in Gujranwala of serving revenue processes through the post has been successful in accelerating the disposal of cases and in enabling some reduction of subordinate establishment to be effected. The Financial Commissioners will doubtless take steps to have the system extended to other districts.

5. The settlements of Lahore, Sialkot, Gujrat and Shahpur were concluded during the year. In all four cases, as the report points out, operations lasted longer and cost more than was originally anticipated, but even so from a financial point of view all were fully justified. The eventual enhancement of assessments will amount to over Rs. 13 lakhs, while the total cost was less than Rs. 14 lakhs. Final reports on the Lower Chenab colony, Dehra-Hamirpur and Lahore settlements were received by Government, and orders were passed on the first and last of these and on the Ferozepore and Hoshiarpur-Una reports which had been submitted previously. Detailed orders on the Dehra-Hamirpur report have been deferred till the completion of settlement operations in the rest of the district. At the close of the year operations were in progress in Jullundur, Kangra, Simla and Ambala. In Jullundur the settlement has now been completed. In Kangra and Simla orders have been passed on the assessment reports of two tahsils each. In Ambala operations started on 1st October 1916 and re-measurement and map correction have been finished in two tahsils. Within the last few years the scope of settlement operations from being much above the normal has fallen considerably below it, and the Lieutenant-Governor fears that the transition has been the cause of some hardship to the establishments concerned, though all measures possible are being taken to alleviate it.

The conclusion of settlement operations in Gujrat, Sialkot, Ferozepore and Hoshiarpur has naturally led to a demand for the adjustment of cash rents of occupancy tenants, and the number of suits for enhancement of such rents was double the number of the previous year. The single district of Gujrat accounts for over two-thirds of the total figures for the province. Apart from this temporary dislocation the relations between landlords and tenants in the province continue to be normal and satisfactory, and while rents are steadily rising with the increase in outturn and prices, there is nor eason to believe that the tenants as a body are being rack-rented or are unable to defend their interests. The mobility of the Punjab peasant and the high wages of labour are an effective safeguard against any inequitable exploitation.

6. Much useful work was done in connection with settlement operations by the Punjab riverain detachment of the Survey of India both on the Sutlej, Beas and Indus rivers and in the hills of Kangra and Simla. No further progress was made with the delimitation of the inter-provincial boundary on the Jumna, but the boundary of Jammu State and Gurdaspur district was finally settled.

7. The arrangement under which a special official has been appointed in four districts in order to make the contents of the revenue record room more readily accessible to litigants has worked successfully, and the income to Government from copying charges and fees for the official's attendance in court has in each case largely exceeded his salary. The Chief Court has asked that

the system should be extended to the whole province, and the question is now under consideration.

8. The supply in the perennial canals though unusually low was on the whole satisfactorily distributed: irrigation from the Upper Jhelum canal started in Gujrat, and a perennial supply was for the first time given from the Upper Chenab canal in the Gujranwala district. This canal is causing a good deal of water logging both in Sialkot and Gujranwala, but it is satisfactory to learn that the measures taken to cope with the evil are having good results, and that the remedial action taken on the Lower Chenab canal in Gujranwala has arrested further deterioration and is restoring some of the damaged land to agriculture. The question is however one which requires the vigilant attention both of Revenue and Irrigation officers in all canal-irrigated districts, as a recurrence of the evils observed in parts of Karnal and on the upper reaches of the Lower Chenab canal would bring serious discredit on the administration. Inadequate rainfall and the consequent low level of the rivers affected the majority of both major and minor inundation canals, and there was a large falling off in the areas irrigated from the Upper Sutlej canals, the Gurgaon bunds, the Rangoi canals in Hissar, the Grey and Nammal canals and the various systems in the Montgomery district. The Chenab and Indus canals in Muzaffargarh and Dera Ghazi Khan are, however, reported to have worked well, and there was a small increase in the area watered by the Shah Nahr canal in Hoshiarpur.

9. The demand for loans for land improvement was even smaller than in the previous year. Less than Rs. 1½ lakhs was advanced under Act XIX of 1883, and His Honour agrees with the Financial Commissioners that the reasons for the decline require careful investigation. With the development of the Agricultural Department and the steadily growing confidence of the people in its activities and in the protection afforded by Government against taxation of improvements before the cost has been fully recouped, the demand for loans for permanent land improvements should be increasing year by year, not diminishing. The fact that remissions of land revenue were given for 680 wells fallen out of use and protective certificates for 7,677 new wells is a demonstration of the liberal policy of Government. But on the other hand out of 3,764 new wells sunk during the year, only 394 were helped with takavi advances. The Punjabi cultivator is generally quick to appreciate the value of any project that affects his pocket, and the Lieutenant-Governor is constrained to agree with the view given in the report that in most districts the matter is receiving less attention than it deserves, and that district officers and their subordinates should make greater efforts to popularize and facilitate loans for such purposes as the sinking of strainer tubes, the purchase of iron Persian wheels and the construction of embankments. The Financial Commissioners rightly point out that, though co-operative credit societies may in part be taking the place of Government in respect of such loans, they are not in a position to finance to any considerable extent the requirements of agriculture in respect of long term loans needed for permanent improvements. Sir Edward Maclagan's Committee on co-operation recommended that at any rate in the case of loans for works requiring the united labour of a number of peasants or affecting the lands of several proprietors, Government should advance the necessary sums to co-operative societies which should in turn distribute them to the actual persons requiring the loans, and possibly this system might popularize the taking of loans for works of permanent value. But such cases will be comparatively few and the responsibility must rest with district officers in respect of the bulk of the loans under Act XIX of 1883. As His Honour remarked in last year's review, much more could be done by a judicious loan policy without attempting to create an artificial demand, and the fact that 101 new wells were constructed last year with takavi advances in the single district of Ferozepore is a practical proof of the correctness of that view.

The failure of the rains and the scarcity of fodder were responsible for a very large enhancement from about Rs. 2½ lakhs to Rs. 8 lakhs in the amount

advanced under the Agriculturist Loans Act (XII of 1884), and the liberal advances—Rs. 3·6 lakhs - in the districts of Gurgaon, Rohtak and Hissar, enabled the zamindars to take advantage of the good monsoon of 1916 and to retrieve their position.

10. 'Financial' considerations preclude any progress being made at present in the notification of further areas in Ambala and Hoshiarpur under sections 4 and 5 of the Chos Act, but the herding and pasturing of camels in areas already notified under the Act in Hoshiarpur was forbidden during the year and a sum of about Rs. 12,000 is being paid as compensation to the camel-owners affected. Compensation awarded in Ambala in consequence of the notification in the previous year of certain areas under section 4 of the Act amounted to Rs. 82,000. But while it has been necessary temporarily to call a halt in these operations, Mr. Fagan's testimony based on personal observation of past and present conditions furnishes most encouraging evidence that the restrictions already imposed and the actual afforestation which has been effected are producing perceptible and valuable results in Hoshiarpur and Ambala. His remarks receive striking corroboration from the conclusions arrived at in the final report of the Hoshiarpur Settlement, and the Lieutenant-Governor would be glad to receive proposals for proceeding with the operations in the coming year.

11. Owing mainly to canal extensions the total cultivated area of the province rose by 260,000 acres, but for the first time in five years the area mortgaged exceeded the area redeemed—by about 6,000 acres. The cultivated area mortgaged was indeed slightly less than in the previous year, but the area of cultivated land redeemed was less than in any of the previous 10 years. Only 2,708 cases were disposed of under the Redemption of Mortgages Act, though the total number of mortgages redeemed in the province was 95,641. The proportion is not large, and, as the Financial Commissioners remark, the Act does not appear to have had an appreciable effect on the total cultivated area redeemed. It has however been in force for two years only, and while it is perhaps too soon to pronounce definitely on its working, it is satisfactory to learn that most district officers consider that it provides a simple machinery for redeeming small mortgages. The total area in which proprietary rights were sold was about 13,000 acres more than in 1914-15, but this was largely due to speculative purchases of waste land in the *thal* of Muzaffargarh and Mianwali, in anticipation of the construction of the Sind Sagar canal. By transfers of all kinds as a whole agriculturists were the losers to the extent of about 6,700 acres. The average sale price of cultivated land rose from Rs. 180 to Rs. 216 per acre. The Financial Commissioners however observe that these figures do not give a reliable indication of the real selling price of land owing to the fact that when cultivated and uncultivated lands are sold in one transaction there is no means of ascertaining the portion of the price which represents the value of the cultivated land. But the fact that in the province as a whole the sale value of land represented 151 times the land revenue as against 144 times in the previous year and 66 times in 1896-97, is the most remarkable testimony to the steady and extraordinary rise in values within the present generation. The Financial Commissioners also point out that a provincial average price has little economic meaning in view of the wide variety of local conditions. This is evident from the figures given in Statement XXIV, from which it appears that while the general average sale price of both cultivated and uncultivated land is Rs 98·5 per acre it varies from Rs. 437 per acre in Jullundur to Rs. 13 per acre in Muzaffargarh; in Amritsar the price is Rs. 395, in Lahore Rs. 322, in Lyallpur Rs. 288, Ludhiana Rs. 239, Sialkot Rs. 234 and Hoshiarpur Rs. 206, and the only districts besides Muzaffargarh where it is below the average are Hissar, Gurgaon, Karnal, Attock, Mianwali, Jhang and Dera Ghazi Khan.

12. There was an increase of about 7,000 in the number of cases decided by Revenue Officers and a small increase in the pending file. The number of revenue judicial appeals was however less than in the previous year and the pending file of the courts of Commissioners and of the Financial Commissioners

amounted to only 191 cases at the close of the year. The executive appeals pending with those officers have however risen from 383 to 495.

Touring by the Commissioners, Ambala (62 days), Lahore (62) and Rawalpindi (70) appear *primâ facie* inadequate.

13. The extracts from the Lyallpur district report give an interesting account of the mobilization of the four grantee camel corps for active service. The task was one of no small difficulty and its successful accomplishment reflects credit both on the Deputy Commissioner and on the Officers Commanding the corps. The Army Department has already been addressed regarding the necessity for compensating as soon as possible the owners of camels that have died on active service, and their attention has been drawn to the difficulties that must inevitably prevent the prompt replacement of casualties.

Mr. Kitchin is to be congratulated on the reductions of colony staff and on the curtailment of work which he has been able to effect. He is perfectly correct in his assumption that it is the policy of Government that the methods of ordinary district administration should now obtain in Lyallpur and that the special features of the colony system should no longer be retained.

14. In paragraph 3 of the extract from the Lahore report reference is made to the question regarding the rate at which nazrana-paying grantees in the Chunian colony are entitled to purchase proprietary rights. The Lieutenant-Governor has now held that though it was probably not intended that the rules under which proprietary rights could be acquired for Rs. 12-8-0 per acre should apply to this class of grantees, it is arguable that the rules, as published, do in fact apply to them, and to avoid even the imputation of any breach of faith on the part of Government he has decided that they shall be permitted to acquire proprietary rights at the very lenient rate which they may have been led to expect would be offered to them.

15. The Revenue Officers of the province of all grades are to be congratulated on the efficiency and success with which their work was discharged throughout the year in spite of a depleted staff and many urgent calls on their service in connection with the war, all of which were promptly and effectively responded to. The thanks of Government are due to both Financial Commissioners for their capable administration of the great department in their charge.

ORDER.—Ordered that these remarks be printed and circulated with the report, that they be published in the *Punjab Gazette*, communicated to the Financial Commissioners, Punjab, and forwarded to the Government of India, Department of Revenue and Agriculture, with the usual number of spare copies.

By order of His Honour the Lieutenant-Governor of the Punjab,

H. D. CRAIK,

Revenue Secretary to Government, Punjab.

2506 CS—379-29-3-17—SGPP Lahore.

REPORT

ON THE

LAND REVENUE ADMINISTRATION

OF THE

PUNJAB

FOR THE

Agricultural year ending the 30th September 1916.

General summary of agricultural conditions.

1. Both seasons were unfavourable. The failure of the monsoon reduced the sown area of the autumn harvest to 27 per cent. below that of last year and 23 per cent. below the normal, and the matured area was 35 per cent. below that of last year, percentages of failure being very high in the Ambala and Rawalpindi Divisions. Rainfall in September and October enabled a fair area to be sown for the spring harvest, being only 13 per cent. below that of last year and 2 per cent. above the normal, but deficiency in the winter rains caused 24 per cent. of the sowings to fail and the matured area was 29 per cent. less than last year, failures being most pronounced in the Ambala and Rawalpindi Divisions. The effects of the bad seasons are visible in the large amount of revenue suspended and the contraction of fluctuating land revenue. There was a sharp recovery in the price of cotton which rose from Rs. 4-4-0 to Rs. 6-9-0 and the price of raw sugar also rose. Prices of maize, wheat and rapeseed fell slightly.

Fixed land revenue. Statements Nos. V, VI and VII.

2. The demand for the year on account of fixed land revenue rose from 217 to 226·29 lakhs. An increase of 12 lakhs is due to the announcement of new assessments in the Dehra and Hamirpur Tahsils of Kangra, in Hoshiarpur, in the Jullundur and Nakodar Tahsils of Jullundur, in the Pasrur and Sialkot Tahsils of Sialkot and in Gujrat. Against this increase on account of new assessments is a formal decrease amounting to 4·21 lakhs owing to the new assessments in the Zafarwal Tahsil of Sialkot and part of the Wazirabad Tahsil of Gujranwala not having been brought upon the fixed revenue roll. 1·2 lakhs of increase are due to waste land assessment and formation of new estates, nearly all in Gujranwala where 15 villages have been newly assessed to fixed revenue, and ·74 lakh to deferred enhancements. The gain and loss due to alluvion and diluvion were almost equal. 12½ lakhs of the year's demand remained under suspension at the close of the year, of which over three quarters were in the Hissar, Rohtak and Gurgaon Districts which suffered severely from the unfavourable seasons. Considerable suspensions were also made in Karnal, Gurdaspur, Sialkot and all Districts of the Rawalpindi Division except Mianwali and in Dera Ghazi Khan. Excluding from the demand sums under suspension at the end of the year and 1·8 lakhs of undetermined or irrecoverable balances, there remained 211·97 lakhs for collection of which less than Rs. 8,000 remained uncollected, about half this sum being due from a single land-owner in Hissar whose villages have been attached. Rs. 27,000 were remitted on account of calamities of season, chiefly in Gurgaon and Gurdaspur. It was only possible to collect Rs. 61,000 on account of previous years, but there remain only Rs. 32 not under suspension recoverable on account of previous years. The balance under suspension at the beginning of the year was 3·78 lakhs and 12·77 lakhs more were suspended. Of the total ·57 lakh was collected and ·31 lakh remitted, leaving a balance at the end of the year of 15·66 lakhs of which 12·5 are on account of the year under

report. The above figures combined with those dealt with in paragraph 7, indicating the facility with which collection of realizable demand is made, place in a very favourable right, the Financial Commissioner considers, the general moderation and elasticity of the fixed land revenue of the Province as against the allegations which are not infrequently made to the contrary in certain quarters.

Alluvion and diluvion. Statement No. IX.

3. As a result of alluvion and diluvion operations there was a net increase of Rs. 10,000 added to the fixed land revenue roll. The total assessable area of the province was increased by 9,000 acres, and revenue was enhanced on 53,000 and reduced on 15,000 acres. The action of the Jumna in Rohtak, Gurgaon, Karnal and Ambala resulted in a small gain. The Sutlej in its upper course in Ambala, Hoshiarpur and Jullundur took as much as it gave, but in Ludhiana, Ferozepore and Lahore owing to the low level of the monsoon floods its action resulted in substantial gain. Most of the Sutlej riverain in Montgomery and Multan is assessed to fluctuating land revenue so the river's action cannot be traced further down its course. The action of the Beas in Kangra, Gurdaspur, Amritsar and Hoshiarpur was unimportant. The Ravi added considerably to the rent roll in Lahore. The Chenab gave on the whole an increase and the Jhelum a decrease, the latter especially in Gujrat. There was a considerable increase in Jhang due to the combined Jhelum and Chenab. The decrease of revenue due to chos was not so great as last year—it was Rs. 876 in Hoshiarpur—the net area lost being about 600 acres. Minor streams gave on the whole a slight increase of revenue.

Fluctuating land revenue, Statement No. VIII,

4. Revenue temporarily excluded from the revenue roll was, as last year, inflated by the practice in Sialkot of excluding the whole of a newly announced demand and not the increase only. The new assessment of Zafarwal Tahsil thus accounts for half the total of 5·4 lakhs. Increased assessments in Lahore account for 1·7 lakhs.

Collections of true fluctuating revenue fell from 128·27 to 121·93 lakhs. There was a decrease of about a lakh in revenue assessed on canal irrigated lands. That portion of it assessed by Deputy Commissioners fell by 2·79 lakhs Multan accounted for 2·15 lakhs, a decrease due to the lowness of floods on the Chenab and Sutlej. There were also decreases in Gujranwala, Mianwali and Montgomery, and increases in Muzaffargarh and Dera Ghazi Khan. Canal revenue and water-advantage rate assessed by the Canal Department increased by about 1·75 lakhs. There was no great change on the perennial canals in Lahore, Gujranwala, Shahpur, Lyallpur and Jhang, and progress on the Lower Bari Doab caused an increase of half a lakh in Montgomery, but low river floods and consequent bad working of inundation canals caused a drop in the collections of water-advantage rate in Ferozepore, Shahpur and Montgomery. The fluctuating assessment of other than canal irrigated lands fell by 5·34 lakhs. The decrease appears generally in all districts subject to this form of assessment being due to failure of rains and river floods.

There was a balance of Rs. 56,000 of which Rs. 17,000 are on account of owner's rate due from Stud Farms in Lyallpur, collection of which has been suspended pending the result of a reference to Government.

During the year, fixed was substituted for fluctuating assessment in 37 villages of Gurgaon. Purely fluctuating were substituted for partly fixed and partly fluctuating assessments in certain riverain villages of the Raya Tahsil in Sialkot.

Other land revenue. Statement No. VIII.

5. Collections of other land revenue were 38·3, as compared with 41·5 lakhs. Purchase of proprietary rights in Government tenancies accounted for 4·7, as against 6·4 lakhs; most of this is in Lyallpur and Gujranwala, and it is an item which will naturally decrease as the purchase of proprietary right by tenants is completed. The sale of Government waste

lands realized 25·75 lakhs, much the same as last year. Instalments of the purchase price of lands on the Lower Bari Doab and Upper Chenab in Montgomery, Multan, Lyallpur and Gujranwala account for 25 lakhs, and Rs. 64,000 are from *nazrana* on the Lower Jhelum Colony. Rs. 52,000 were realised from the sale of town sites in Shahpur. Receipts from single harvest leases fell from 2·8 to 1·2 lakhs. The decrease was chiefly in Montgomery and Multan and was the result of permanent allotment of colony land. Tirni collections are normal. The uncollected balance rose from Rs. 63,000 to Rs. 92,000. Of this Rs. 30,000 are on account of the previous year and Rs. 28,000 of it are due from the Jalpana estate in Shahpur, as noted in last year's report. This estate has paid little over Rs. 3,000. Of the balances for the year under report Rs. 32,000 are due from Gujranwala, being overdue instalments of the purchase price of proprietary rights on Government waste. A balance of nearly Rs. 9,000 in Montgomery is chiefly on account of a single demand for tirni, the remission of which is under consideration. A balance of Rs. 4,000 in Multan has not been explained. Balances are not heavy in other districts.

Land revenue assignments. Statement No. X.

6. The shrine of Bari Shah Latif which already enjoyed an assignment of the revenue of 300 acres of the village of that name, in present value Rs. 737, was granted the revenue of the rest of the village, present value Rs. 63, as reward for assistance given by the villagers in the capture of a gang of dangerous dacoits. One military reward grant in value Rs. 600 was given in Jhelum. The only lapse of importance was that of a life *jagir* of Rs. 1,836 in Gujranwala: this and minor lapses have reduced the area under assignment from 4,703,000 to 4,676,000, but owing to new assessments the income enjoyed has increased from 31·80 lakhs to 31·83 lakhs. The revision of land revenue assignments was completed in the Jullundur and Gujrat Districts.

Coercive processes. Statement No. XI.

7. There was a slight decrease in the number of coercive processes from 17,952 to 16,129 and in the amount of arrears for the realization of which they were issued from 14½ to 11 lakhs, but these figures are still above those of 1913-14. 92·5 per cent. of the arrears were collected. Collections made after issue of process amounted to 2 per cent. of the total collections made. Of the 16,129 processes issued, 10,931 were writs of demand, and of the remaining 5,198 only 2,782 were executed. Of these 2,038 were for arrest, 10 for imprisonment, 731 for distress or sale of movable property and 3 for attachment of immovable property. More than half the processes executed were as before in the Multan Division, in the Jhang and Multan Districts especially. To some extent recent troubles are the cause of this, but it is largely due, as explained in last year's report, to the steady determination to enforce habits of punctuality on peoples notorious for their dilatoriness. Lyallpur is an example of what can be done in this respect. Though the revenue collected, 1¼ crores, is more than twice that of any other district, only 138 processes required to be executed and to quote the District report "the very satisfactory state of collections in the district is entirely due to the fact that from the beginning up to now neither tahsil nor district officials stand any nonsense from would-be defaulting lambardars." The Financial Commissioner entirely agrees with Mr. Kitchin's opinion that promptness in payment is very much a matter of habit and tradition.

Process serving establishment.

8. In fourteen districts temporary assistance was entertained for short periods for serving coercive processes. In the Gujranwala District the experiment referred to in paragraph 17 of last year's report was tried of serving revenue processes through the post and proved a success: almost all the processes were successfully served and the disposal of cases accelerated. It has been found possible in consequence of this procedure to reduce considerably the establishment of tahsil chaprasis: and the Deputy Commissioner promises to report at the end of the financial year to what extent the saving thus effected is counterbalanced by the increased expenditure on stamps. Such expenditure, it is hardly necessary to observe, is not expenditure by Government unless it entails

an increase of postal establishment, and the Financial Commissioner hopes that what promises to be a useful development will not be checked by considerations of merely apparent cost. In Multan warrants for attachment and sale were served through Field Kanungos.

Progress made in remeasurement, revision of records, etc.

Statements Nos. XII, XII-A. and XIII.

9. As noted in last year's report at the close of that year measurement and records work remained in progress in four settlements, *viz.*, Gujrat, Jullundur, Simla and Kangra. During the year they were completed in the first two, while in Simla the record-of-rights has been finally attested in all but 10 villages. Killabandi has been completed in Gujrat, with the exception of a few villages in which the record is still incomplete. In Kangra attestation was finished in the Palampur Tahsil, but a great deal remains to be done before the record-of-rights is complete; the procedure adopted in this tahsil of pushing on measurement without simultaneous attestation has proved unsuccessful and, in the Kangra and Nurpur Tahsils, attestation is being kept abreast of measurement work. Since the close of the year Government have passed orders on certain questions relating to trees in the Kangra District which will, it is hoped, expedite the completion of the records.

In Simla the assessment reports of the Simla and Kot Khai *ilaqas* were received and orders passed on both. Orders were passed on the assessment reports of the Jullundur and Nakodar Tahsils submitted last year, and reports on the assessment of Nawashahr and Phillaur Tahsils and of urban areas were submitted and orders were passed on them either during the year or shortly after its close. All assessments have now been announced in the Jullundur District and settlement operations will come to a close in March 1917. In Kangra orders were passed on the assessment reports of Palampur, previously submitted, and Kangra, submitted during the year. Orders were received on the assessments of the Lahore Tahsil and of town lands in the Lahore District, the demands announced and the distribution completed. The settlement of Lahore and that of Sialkot, in which the new assessment was introduced in the Zafarwal Tahsil, are now at an end, as are those of Gujrat and Shahpur; in the former, the assessments of the Gojar Circle of Kharian and the Phalia Tahsil were sanctioned and announced and, in the latter, the settlement was concluded with the sanction to and distribution of the assessments of the Shahpur, Bhera and a small portion of the Sargodha Tahsils.

Settlement operations began in Ambala on the 1st October 1915. Remeasurement and map correction have been finished in the tahsils of Rupar and Kharar and the record-of-rights attested in 470 out of 781 villages. The Dera Ghazi Khan settlement began on the 1st October 1916.

Final Settlement Reports.

10. The final reports of the Chenab Colony, Dehra-Hamirpur, Lahore and Gujrat Settlements have been received, and the three former submitted to Government. The orders of Government were received on the Ferozepore and Hoshiarpur-Una reports. The Ferozepore Settlement was confirmed for 30 years subject to the proviso that if within that time a new large canal is opened from the Sutlej the settlement of the villages commanded by it may be revised. The settlement was completed in 4½ years at the cost of 4½ lakhs and the net annual increase to Government will be between 5½ and 6 lakhs. The Hoshiarpur settlement has likewise been confirmed for 30 years. It cost 5½ lakhs and took 4½ years to complete, and resulted in an enhancement of demand of 4¼ lakhs. The term of settlement of the Dera and Hamirpur tahsils of Kangra has been fixed at 30 years, but detailed orders on the report have been deferred pending completion of settlement operations in the other tahsils of the Kangra District.

Comparison of estimates and forecasts in regard to duration, cost and results. Statements Nos. XIII and XIV.

11. Of the four settlements which came to an end during the year that of Lahore was originally expected to last 2½ years and to cost Rs. 1,75,000. These estimates however did not take sufficiently into account the amount of work involved in the revision of the record which it was hoped would be completed more quickly by a preliminary revision

than it was found in practice possible, or the delay in the introduction of orders due to the necessity of referring the case of each tahsil to the Government of India. Operations actually took a year more than was estimated and cost Rs. 3,15,000 to which must be added Rs. 72,000 the cost of preliminary record operations. As the initial annual increase in assessment is Rs. 2,29,000 and the ultimate increase will exceed Rs. 6,65,000 the cost cannot be regarded as excessive.

The Sialkot settlement was expected to take 4 years and cost Rs. 4,67,000. In fact it took 4½ years and cost Rs. 5,13,000. The increase is comparatively insignificant and the ultimate enhancement of over 3 lakhs a year considerable.

In Shahpur the settlement which it was estimated would take 3 years actually took 5, and the cost was 1·8 lakhs as against ·95· estimated. The ultimate annual enhancement will be 1½ lakhs.

In Gujrat the assessment took 3½ years in place of 3 contemplated and cost 3·14 as against 2·86 lakhs. The initial increase is 1·2 while the ultimate increase will be 1¾ lakhs.

In all these settlements although more or less unduly optimistic estimates of cost were made at the outset, the enhancement of assessment has been such as to justify the reassessment even had the cost been far greater than it actually was. Thus in Lahore where under the system of progressive assessments, large initial abatements or temporary reductions of demand were given the total cost will be repaid in less than two years: and the same is the case in Sialkot. In Shahpur the enhancement of one year is nearly sufficient, while in Gujrat, the least productive, 3 years of the initial increase repays the cost.

Satisfactory as these results are it is to be remembered that the justification of a re-settlement of a district does not entirely lie in its financial aspect. It may be desirable in the interests of the people to correct an unequal distribution of the present demand or to rectify a defective record-of-rights. Such were the main reasons for undertaking the Kangra Settlement. This will take more time and money than was anticipated, but will it is expected repay the cost in a reasonable time, while of the benefits which will accrue to the people one has already materialised in the settlement of the question of rights of trees in certain waste lands which has been decided highly to their advantage.

Proposed future settlement operations.

12. Sanction has been received to the general revision of the assessment of the Dera Ghazi Khan District from 1st October 1916. Forecast reports of the Multan District and Sirsa Tahsil have been called for.

Settlement Staff.

13. Three Settlements (Lahore, Gujrat and Shahpur) having come to an end and only one (Ambala) having been started further steps had to be taken to reduce establishment. Seven appointments of Tahsildars were brought under reduction; it was not necessary to reduce the number of Naib Tahsildars as those who could not be provided for in other settlements during the summer of 1916 were utilised in work preliminary to the Dera Ghazi Khan Settlement. Large reductions have been necessary among kanungos, and special measures have been taken to secure as far as possible the absorption on district staffs of settlement kanungos whose posts are thus reduced. The number of reductions in the 2nd grade of kanungos has made it necessary to suspend promotion to the first grade, in order that the proportion of 1st grade kanungos to the whole may not exceed one-fourth.

Surveys.

14. Riverain surveys were carried out by the Punjab Riverain detachment of the Survey Department on the Sutlej, Beas and Indus in connection with the Ambala, Jullundur, Kangra and Dera Ghazi Khan settlements. The work included 155 linear miles of main circuits and 751 of minor traverses and 4,431 theodolite stations were fixed in an area of 559 square miles which is under

water action, and 1,000 square miles were demarcated with permanent mark stones in Kangra, Hoshiarpur and Gurdaspur. 852 plotted and 142 boundary sheets were supplied to Settlement Officers. The cost was Rs. 28,706. The Kangra special survey under the same party traversed and triangulated 2,162 linear and 300 square miles of the district area and 12,067 stations were fixed by theodolite in 575 *tikas* (hamlets). 3,542 plotted sheets of 792 *tikas* were supplied to the Settlement Officer. The cost was Rs. 43,881. The same party completed work in the Kotgarh Tahsil of Simla; they traversed and triangulated 1,066 linear and 15 square miles and fixed 1,153 stations by theodolite. 256 plotted sheets of 70 villages were supplied to the Settlement Officer. Cost Rs. 3,033. Minor operations were special surveys of the Attock oil fields, of the Kangra Road and Lahore Cantonment boundaries, at a total cost of Rs. 2,267. The cost rates per square mile were more than last year being Rs. 146·2 and Rs. 209·2 for the Kangra and Simla surveys, respectively. The excess is due mainly to the fact that in Kangra during the year under report the preparation and supply of plotted sheets as compared with field work formed a larger proportion of the total operations than in the previous years while in Simla more stations per square mile were fixed.

Topographical Survey Operations were continued under No. 2 Party (N. C.) of the Survey of India which surveyed an area of 2,206 square miles on the 1-inch scale in Gurgaon, Hissar and Rohtak Districts, and in Dujana, Jind, Loharu, Nabha, Patiala and Pataudi States.

Boundaries.

15. A minor alteration of boundaries was made between the districts of Amritsar and Sialkot consequent on a change in the course of the Ravi. A block of land under colonization in the Lower Bari Doab was transferred from Multan to Montgomery, in order to make the district boundary coincide with the irrigation boundary between distributaries. The case of the fixed boundary on the Jamna has not progressed since last year's report. The boundary dispute between villages of Gurgaon and Alwar State remains unsettled, and there is a dispute between a village of Hissar and Bikaner and three cases pending between Jullundur and Kapurthala. The Jammu boundary with Gurdaspur has been finally settled, but there are questions outstanding in connection with Sialkot. An area disputed between Mianwali and Kohat has been left till next settlement as a common grazing ground to the villages concerned as it was found that it would require an extensive survey to determine to which of the two districts the debateable land belonged. There is a dispute between Mianwali and Bannu which still awaits disposal.

Revenue Record Room.

16. The accommodation in revenue record rooms is reported sufficient in Hissar, Karnal, Lyallpur, Hoshiarpur, Gujrat, Amritsar, Montgomery and Muzaffargarh, while Simla, Jullundur, Ludhiana, Mianwali, Sialkot, Jhelum, Rawalpindi and Dera Ghazi Khan required improvement which could not be attended to owing to the war stringency. There is, however, no serious complaint of congestion except in Kangra.

The Copying Agency has been giving satisfaction practically everywhere. Sanction to the introduction of new rules has not yet been received.

The experiment of appointing a Naib Sadar Kanungo to help the Civil Courts in the utilization of revenue records has proved a success in all four districts where it is being tried, namely, Jullundur, Hoshiarpur, Ferozepore and Mianwali.

Other matters.

17. Rs. 39,000 were paid by currency notes in 10 districts on account of land revenue, Government having tentatively sanctioned this method of payment throughout the province for a period of two years. Half of this was in the Gujranwala District, and in this and other districts complaint is made that Arzirsals are not sent with the remittance. A certain amount of inconvenience is also caused by the fact that odd sums have to be made up in stamps. There does not, however, appear to have been any serious difficulty in crediting the

amounts received. Nearly 18 lakhs were remitted by Money Order. An experiment has been made in girdawari by appraisement of produce in each district under settlement or colonization. The matter has been noticed only in the Jullundur, Sialkot, Shahpur and Montgomery reports. In the first three of these the opinion is expressed that the system is beyond the capacity of the revenue staff. Results in Montgomery have been compared with actual outturns recorded on Mr. Conville's farm and show a fair degree of accuracy. Pending further results the Financial Commissioners reserve their opinion on the success of the experiment.

In the districts of Amritsar, Jhang and Multan the practice permitted by Standing Order No 56, paragraph 18, prevails of the Wasil Baqi Navis of the Sadr Tahsil sitting in the Treasury Officer's room during the time for paying in land revenue. This saves a great deal of time to payers and should be more widely adopted. Many districts now report a system by which a date is fixed for the payment of revenue by each village. This obviates much inconvenience.

Enhancement of rent. Statement No. XV.

18. The number of suits brought for enhancement of rent (2,768) and that of successful suits (2,271) were both double last year's figures. As in last year Gujrat is the chief contributor, no less than 1,880 of the suits being brought in that district, a result of the new assessments. No suits were brought in the Multan Division, and few in the Ambala Division or the other districts of Rawalpindi. There is still a considerable volume of cases in Jullundur and Hoshiarpur, and there is a marked increase in Ferozepore and Sialkot in both of which districts it is noted that cash rents are rising with prices. There were only 6 suits for reduction of rent.

Ejectments. Statement No. XVI.

19. There were 92 decrees for ejectments of occupancy tenants under section 39 of the Act, 66 of these were in Hoshiarpur and Shahpur, and in each case ejectment was actually made. The total number of ejectments of occupancy tenants actually made in the Province was 96. There was a slight drop in the number of applications for service of notice to tenants-at-will, and the ejectments actually made fell from 6,099 to 4,881. The Deputy Commissioner of Sialkot refers to litigation arising out of *killabandi* operations, when influential owners refuse to relinquish possession of *killas* allotted to others. *Killabandi* is technically and legally a partition, and section 122, Land Revenue Act, provides a remedy in such cases.

Descent of Jagirs Act.

20. The rule of primogeniture was notified as existing in the Jagir of Malik Mohammad Yaqub Khan of Mitha Tiwana in the Shahpur District.

Canals under departmental management.

21. There was a slight increase of irrigation from the Western Jumna Canal in Karnal attributed to the poor monsoon of 1915 which caused more demand for canal water: in Hissar and Rohtak irrigation from this canal fell slightly. The Sirhind Canal increased its irrigation in Ludhiana and Ferozepore, insufficient rainfall again being the cause, which is also assigned as the reason for an increase of water taken from the Upper Bari Doab in Amritsar. The Upper Chenab Canal irrigated portions of the Daska, Pasrur and Raya Tahsils of Sialkot and the Hafizabad and Wazirabad Tahsils of Gujranwala. In the latter district perennial irrigation was for the first time introduced. In both districts there are serious complaints of water-logging from this canal. The matter has been reported to Government and orders have been issued with a view to improving existing drainages and deepening and extending the seepage drains. So far as this has already been done the Deputy Commissioner of Gujranwala reports that it has had good results. Those who have suffered most have received compensatory grants of land on the Upper Chenab. Some damage is reported in Sialkot as due to syphons under the canal being of insufficient discharge to carry off flood water. Supplies are reported as sufficient on the Lower Jhelum Canal. Irrigation from the Upper Jhelum began in Gujrat; the Financial Commissioner has received a report of damage in one village done by floods. The Deputy Com-

missioner of Lyallpur reports that in spite of the scarcity of water in the river the distribution of water from the Lower Chenab Canal all over the colony was very satisfactory. Kennedy gauge outlets are being introduced very generally: they do not appear as yet to have won favour with the cultivators, but the reason for this, if it is anything but conservatism, is not given. There were some complaints of shortage in Jhang. The Upper Sutlej Inundation Canals did not work well owing to a deficient supply in the river, and the same cause accounts for shrinkage which appears, but not nearly to the same extent, in the irrigation from the Lower Sutlej Canals. Supplies in the Sidhnai Canal system were poor and in the Chenab Inundation Canals in Multan fair. The Chenab and Indus Canals in Muzaffargarh and Dera Ghazi Khan worked well. The working of the Lower Bari Doab Canal has been fully noticed in the Colony Report.

Canals under district management.

22. Owing to failure of the rains the Gurgaon bunds only matured 1,114 as compared with 6,002 acres last year. The demand was Rs. 2,229 including Rs. 1,484 on account of water-rate, and the expenditure Rs. 13,890; establishment Rs. 3,492, contingencies Rs. 500 and maintenance Rs. 9,898. For the same reason the area irrigated by the Rangoi Canal in Hissar was small and the Sarusti Canal in Karnal was to some extent affected by the same cause, the irrigated area falling from 22,015 to 21,303 acres, and receipts from water-rate from Rs. 37,724 to Rs. 26,787. Expenditure was Rs. 16,835, establishment and contingencies Rs. 8,902 and maintenance Rs. 7,933. The Chautang Canal in the same district is designed to be fed from surplus water from the Sirsa Canal but failed from lack of supply. The system of irrigation from the Sarusti Nadi in Kaithal Tahsil worked well. It is reported that some improvement is urgently needed to the drainage of the Naili tract in the Guhla Sub-Tahsil which is notorious for unhealthiness. A scheme for controlling the waters of the Markanda which cause these floods is now being worked out. Irrigation from water channels in Kangra (locally called *kuhls*) gave rise to a good many disputes which caused some trouble in those cases in which the old revenue records throw no light on the shares of water. This defect is being removed at the present settlement. The Shah Nahr Canal in Hoshiarpur irrigated 14,125 as compared with 13,981 acres; receipts were Rs. 28,673 and expenditure Rs. 34,454. The increase of Rs. 6,327 in expenditure, as compared with last year, is chiefly due to repairs to the damaged Head Regulator. The canal has a closing balance of Rs. 28,139. The area irrigated by the Grey Canals fell from 183,532 to 13 ,560 acres, and the water advantage assessment from Rs. 83,172 to Rs. 60,856. Government has sanctioned a grant to the Canal Fund of Rs 25,000 per annum for five years, and the new scheme for the management and control of the canals was introduced during the year under report. Owing to the failure of the rains the Nammal Canal only irrigated 3,148 as compared with 14,058 acres, but the neighbouring hill torrent villages had hardly a green blade, and the area dependent on the lake profited considerably by the steady run of the spring water which continued to give about 9 cusecs despite the drought. The lake was filled to twice the previous maximum by the rains of 1916. The system of embankments on the Indus in the same district gave good results and the Kuram Canals worked well. In Montgomery the low level of the Sutlej which, as has been seen, affected the Upper Sutlej and Grey Canals, caused irrigation on the Kitchin system to fall from 39,855 to 9,171 acres, on the Mehdi Khan Canal from 7,833 to 4,693 acres, on the Sanatekke and Tibbi Bands from 18,563 to 9,175 acres, on the Mary Band from 2,472 to 778 acres and on the George Cut from 4,876 to 2,096 acres. The water-rate demand on the Kitchin and Mehdi Khan Canals was Rs. 10,150 and expenditure Rs. 26,266. There was a decrease in the irrigation from the Ravi Canals from 7,459 to 1,706 acres.

Land Acquisition Act.

23. Four thousand and thirteen acres were acquired for public purposes for Rs. 3,88,161. The average price per acre comes to Rs. 97 as compared with Rs. 165 last year. Out of this forty-five acres were acquired for roads at an average

price of Rs. 430 per acre, 3,415 for canals, and 381 for railways, the land for canals at Rs. 68 and that for railways at Rs. 200 per acre, respectively.

Loans under the Land Improvement Loans Act (XIX of 1883). Statements Nos. XVII, XIX, XX, XXI and XXII.

24. There was a further drop this year in the amount advanced for improvements from 1·9 to 1·4 lakhs. The reasons for the comparatively feeble demand for these loans require careful investigation. Partly no doubt it is that no very widespread taste for permanent agricultural improvements has as yet been aroused. Loans for the objects referred to in paragraph 8 of the Government review of last year's report, the sinking of strainer tubes in wells and the purchase of iron Persian wheels are indeed mentioned in more than one district report, but the fact remains that as a whole the agriculturists of the province are as yet deficient in the effective and practical appreciation of the value of agricultural improvements of a permanent kind. It is no doubt the case that to some extent loans from Co-operative Credit Societies are taking the place of loans from Government, but the long term loans required for improvements such as the construction of wells which repay capital expenditure only after a considerable period can scarcely be financed to any large extent from the former source. *Primâ facie* therefore the growth of Co-operative Credit Societies should not interfere to any material extent, at all events directly, with the demand for loans under Act XIX of 1883. Variation between districts depends of course to a considerable extent on the scope which local agricultural conditions provide for improvements. The same demand for loans for well construction cannot be expected in Hissar as in Sialkot or Jullundur; but the Financial Commissioners have no doubt that a dominating factor in the demand for takavi loans for permanent improvements is the extent to which the district officer and his revenue subordinates interest themselves in the matter and take practical steps to render them popular and to remove the official difficulties which tend to handicap Government loans in favour of those from other sources. So far as the Financial Commissioners' experience goes they believe that there is considerable neglect on the part of Tahsildars of their duties in this important matter. In the province as a whole 3,366 new wells were sunk without advances, 506 more than last year, but the number sunk with the aid of advances has decreased from 411 to 394, and is considerable only in Gurgaon, Jullundur, Ferozepore (101) Sialkot, Multan and Muzaffargarh. Remissions of land revenue were given for 680 wells fallen out of use and protective certificates for 7,677 new wells. Of these last 6,329 were given in the course of the Jullundur, Lahore and Sialkot settlements. 2·4 lakhs were collected on account of principal, leaving Rs. 14,000 arrears. Collections of interest were Rs. 98,000 and the arrears less than Rs. 6,000. Arrears, both of principal and interest, were less than last year. They are chiefly in Multan, Attock and Gujranwala. The interest collected represented Rs. 6-10-5. per cent. of the mean balance outstanding. The average percentage in the last 10 years has been Rs. 6-0-6. The provincial gain on the year's working was Rs. 44,779.

Loans under the Agriculturists Loans Act (XII of 1884). Statements Nos. XVIII, XX, XXI and XXII.

25. The sum advanced under the Agriculturists Loans Act rose from 2·6 to 8 lakhs. Of this 3·6 lakhs were in the districts of Hissar, Rohtak and Gurgaon, where a bad year followed by favourable prospects for sowing caused great demand for bullocks and seed. In Gurdaspur considerable advances were made to villages that had suffered from floods. There was a severe fodder famine in Gujrat and over Rs. 20,000 were advanced for the purchase of bhusa. Advances for the purchase of fodder were also given in Shahpur, in Jhelum, into which district over 82,000 maunds of bhusa were imported, and in Attock. Large advances were made in Mianwali to replace cattle lost in the fodder famine. Nearly Rs. 50,000 were advanced in Montgomery. A good deal of this was to new colonists. Rs. 82,000 were distributed in Muzaffargarh and Rs. 45,000 in Dera Ghazi Khan where there was considerable distress, especially among the Mazaris, Gurchanis, Bozdars and the hill sections of the Legharis. In the latter district the greater portion of the produce of the Dhundi estate was distributed to the

Tumandars as advances in kind. The balance outstanding at the end of the year rose from 3·8 to 8·3 lakhs. Arrears on account of principal rose from Rs. 25,000 to Rs. 90,000. They are most serious in Gujrat, Jhelum, Muzaffargarh and Dera Ghazi Khan which districts account for Rs. 66,000. The Financial Commissioner has ascertained that these arrears are being collected with the kharif instalment. Arrears of interest are not important. The interest realised only amounted to Rs. 3—5 per cent. on the mean balance, and there was a provincial loss of Rs. 816 on the year's working, a result due to most of the advances having been made towards the end of the year. The average rate of interest received on mean balances for the past 10 years is Rs. 4-14-1.

Forest Act and Government lands. Statement No. XXIII.

26. The forest settlement of the area to be reserved as an irrigated plantation at Chichawatni in the Montgomery District has been completed and will shortly be submitted to Government, and reports have also been received dealing with the reservation of small areas on the same canal for the browsing of camels on the line of march. In Kangra 56,000 acres of forests taken over from the Forest Department have been administered during the year by the Deputy Commissioner. The experiment so far as it has proceeded promises to yield good results, and it has been recommended that a further area be transferred; but definite orders for the transfer of specific areas will have to be postponed until a decision has been reached on a proposal to start a system of rotational closures which has been put forward by the Inspector-General of Forests and is now before Government. The vexed question of the rights in trees growing in Kangra waste lands has at last been settled by the decision of Government to abandon all claims to trees in waste areas definitely recorded as Dakhil Bachh in Lyall's Settlement except where areas in Dakhil Bachh waste have been included in demarcated protected forests. An announcement to this effect was made by His Honour the Lieutenant-Governor in Darbar at Kangra on 25th October 1916.

The Shahpur Kandi forests yielded a net income of over Rs. 1,300 of which Rs. 1,100 were by consent of the committee representing the right-holders paid into the Pahari Co-operative Bank as was done last year.

In Jhelum the scheme for providing browsing for the camels of the 52nd Corps has been modified after further consideration of the rights of villages in the forests, and will soon be ready for final approval.

Little or nothing so far has been done for the development of the Guzara forests of the Murree and Kahuta hills in pursuance of the notification (No. 246, dated 11th May 1914) enabling improvement fellings to be carried out. For such action the active co-operation of the people is essential, and this can only be secured by practical demonstration that the methods proposed are to their profit. As a tentative measure an officer has been appointed for three months as Guzara Development Officer to examine the situation with a view to a decision as to the extent to which it is possible to improve these forests.

Government has sanctioned the proposal to place the management of the Dera Ghazi Khan District forests entirely in the Deputy Commissioner's hands. A working plan for their management is awaited.

The area of unclassed forests and Government waste land has decreased by 63,000 acres. The figures are however in some cases doubtful. There is an increase of 17,000 acres in Gujrat due to disafforestation of land for colonization, and of 11,000 in Shahpur largely due to transfer of colonists to the Upper Jhelum Canal. In Montgomery the area has increased by 41,000 and in Multan has decreased by 1,25,000 acres. This is partly the result of a charge of boundaries, the net decrease being due to colonization.

Punjab Land Preservation (Chos) Act.

27. The need for economy due to the war has affected operations under the Chos Act, and proposals to notify certain further areas in Ambala and Hoshiarpur under sections 4 and 5 have been postponed until the financial situation improves. The application of section 3 of the Act has been extended to certain additional villages

in the Hoshiarpur District, while in all areas of that district to which that section has been applied the herding or pasturing of camels has been prohibited (notifications Nos. 423 and 424, dated 21st June 1916). Compensation to the value of Rs. 82,250 was paid in Ambala for action taken under section 4, and steps are being taken to distribute about Rs. 12,000 to camel owners in Hoshiarpur on account of the closure of camel-browsing above referred to. The Financial Commissioner, Mr. Fagan, while recently touring through the Kharar and Rupar Tahsils of Ambala and the three western tahsils of Hoshiarpur, took advantage of the opportunity to inspect the progress of afforestation in the Siwalks, and of reclamation of Cho beds in the adjacent plains. His impressions have been embodied in a note. In the two years that have elapsed since section 4 of the Act was put in force in Ambala, there has been a distinct improvement in the forest growth in the hills; section 5 has not yet been extended to any area in this district. In the hill area of Hoshiarpur to which section 4 applies there has been a marked improvement in the growth, both of trees and grass, and in blocks where restrictions under section 5 have been permanently in force for some 12 years, there has been a great improvement: trees and bushes are flourishing and the growth of grass furnishes some villages with a fairly substantial income. Moreover, there are indications of an increased absorption of rainfall and a consequent decrease in the rapidity with which rain water runs off the hills. In the plains there have been a few efforts, in some cases quite successful, at private reclamation. In the Maili Cho to which sections 8—12 of the Act apply results are disappointing. On the whole the results disclosed by the Financial Commissioner's inspection are distinctly promising, though he thinks that more might have been done in the direction of encouraging individual efforts at reclamation in the plains.

General Statement of owned and mortgaged area.
Statement No. III.

28. The area of the Province entered in the revenue records is somewhat over 54½ million acres, of which more than half is cultivated. Fifteen million acres are represented by common lands, village sites and Government property, and of the rest 34 million acres are owned by agricultural tribes and 5½ millions by others. There is a decrease since last year of 1,572 acres in the gross and an increase of 260,585 in the cultivated area recorded. (Last year's total area should have been stated as 54,640,250 acres). Remeasurement in the course of settlement operations has resulted in the large increase of 28,000 acres in the total recorded area of the Lahore District and less marked variations in Gujrat and Shahpur and remeasurements at the quadrennial attestations and alterations of district boundaries account for minor changes elsewhere; the decrease of 29,000 acres in the Dera Ghazi Khan District is, it has been discovered, due to an error in past reported figures. The increase in the cultivated area is largely due to colonization in Montgomery and Gujranwala. Cultivation has also considerably extended in Hissar, Karnal, Ferozepore, Lahore, Lyallpur, Jhang and Multan, but decreased largely in Mianwali owing to the failure of rain. The cultivated area under mortgage has slightly increased, but owing to the expansion of cultivation the percentage mortgaged has fallen from 11·6 to 11·5.

Transfers.
Statements Nos. XXIV—XXVII.

29. The cultivated (ownership) area sold, 106,799 acres, is the smallest that has been recorded in the past 20 years, but there is a noticeable increase in the sale of uncultivated land, of which 126,700 acres (ownership) were transferred as compared with 86,690, the corresponding figure for the previous year. Much of the increase is accounted for by extensive purchases of waste land made in the Thal portion of the Leiah Tahsil of Muzaffargarh in anticipation of the construction of the Sind Sagar Canal. A further larger area of waste amounting to nearly 20,000 acres has been sold in that tract by the *ala maliks* or superior proprietors. The chief purchaser appears to be a member of the legal profession, resident in Lahore, who has bought large areas at prices of less than Re. 1 per acre. The year under report is the second complete year of the working of the Redemption of Mortgages Act, and statement XXVIII shows that 2,708 cases were disposed of under this Act. Most district reports mention the working of the Act with

favour as giving a simple means of redeeming small mortgages, but it cannot be said to have had an appreciable effect on the total cultivated (ownership) area redeemed, the year's figure 210,067 being the lowest for the past 10 years. Indeed the Deputy Commissioner of Sialkot thinks that the Act is seldom invoked except with the object of remortgaging for a higher sum. The cultivated area mortgaged was 227,396 acres; this is less than last year, but it is the first time in the last five years that the area mortgaged has exceeded the area redeemed. The Deputy Commissioner of Lahore suggests that the tendency to prefer mortgage to sale is due to a desire to avoid suits for pre-emption and for declaratory decrees.

Value of land.

30. The average price of cultivated land rose from Rs. 180 to Rs. 216 per acre. This although not so high as the figure of 1913-14 is much higher than in any other preceding year. These figures do not however give a satisfactory guide to the real selling price of land. The only basis for our statistics is the record of actual transactions which do not give separately the price paid for the cultivated and uncultivated land comprised in each, and the average price of cultivated land is conventionally estimated by applying the total price paid to the area of cultivated land sold; in other words, assuming that the uncultivated land has no value. This is of course an untrue assumption especially in the case of land sold for building sites. A provincial average price has of course little real economic meaning in view of the wide variety of local conditions, and of local prices which run from hundreds of rupees per acre for building sites near towns to less than a rupee in the Thal. Auction sales on the Lower Bari Doab are to some extent a guide; the average price was Rs. 179. For small building sites very high prices indeed were realised representing rates of from Rs. 9,120 at Chichawatni to Rs. 21,173 at Okara. In the province as a whole the sale price represented 151 years' purchase of the land revenue assessed.

Land Alienation Act.
Statement No. XXV.

31. The only new tribe notified under the Land Alienation Act was the Muhial Brahmans of Attock. An application for notification on behalf of the Brahmans of the Jullundur Doab was rejected by Government, and the Financial Commissioners did not support a proposal to notify the Rajputs of Gurdaspur as a separate group. During the year agricultural tribes acquired by purchase a net increase of nearly 20,000 acres. Sales by such tribes (206,529 acres) have never been exceeded since the passing of the Act, but sales to them have only been surpassed in one year and in no year have the sales to others been so small. A consideration of the figures in columns 3—6 and in columns 11—14 of statement No. XXV points to a net loss on mortgage by agricultural tribes of some 26,000 acres as compared with 8,000 acres last year. Unfavourable seasons have doubtless contributed to the increase both of sales and of mortgages, and whereas in the case of sales wealthy agricultural tribesmen are the most ready not to say eager buyers, others are more commonly forthcoming as mortgagees, though the forms of mortgage permitted by section 6 of the Alienation of Land Act can scarcely be said to be popular among money-lenders. Cases of evasion of the Act exist, but are not very common The case in which the non-agriculturist creditor advances money to an agriculturist to buy the debtor's land taking as his security a bond from the purchaser has been reported as common, but is scarcely an evasion of the Act.

Business returns.

Statements Nos. XXVIII and XXIX.

32. There was a slight increase in the total volume of work and in the pending file. Revenue Court cases under the Tenancy Act showed some increase, especially in Gujrat where they were nearly doubled, but there was a decrease in Revenue Officers' cases under the Tenancy and Land Revenue Acts while under the Land Alienation Act the number has risen. There was a considerable increase in miscellaneous cases, including cases under the Redemption of Mortgages Act which are for the first time shown separately. There was a decrease in the number of Revenue Judicial appeals in the Courts of Commissioners and the Financial Commissioners and in the pending file which is 191 cases only. On the whole it may be said that the Revenue case

work of the Province has been disposed of in a satisfactory manner; though not a few Tahsildars and Naib Tahsildars as well as some Revenue Assistants are more or less seriously deficient in dealing with the important matters of the preliminary examination of parties and the proper framing of relevant issues. The subject is one which demands the attention of Commissioners and Collectors when disposing of appellate work and at tahsil inspections.

Tours of Commissioners.

33. The returns of touring done by Commissioners refer to the year ending 31st March 1916:—

Ambala.—Lieutenant-Colonel C. M. Dallas, C.S.I., was Commissioner for 334 days, and spent 62 days on tour. The Hon'ble Mr. C. H. Atkins, I.C.S., was Commissioner for 32 days, and did no touring, being on special duty at Lahore for 30 days.

Jullundur.—The Hon'ble Mr. P. J. Fagan, I.C.S., held charge for 282 days, spending 80 days on tour. Mr. W. C. Renouf, I.C.S, was Commissioner for the remaining 84 days of the year of which he spent 27 days on tour.

Lahore.—Mr. H. A. Casson, C.S.I., was Commissioner for 151 days, of which he spent 37 days on tour. The Hon'ble Mr. H. J. Maynard, C.S.I., was Commissioner for 215 days, remaining 25 days on tour.

Rawalpindi.—Lieutenant-Colonel F. Popham Young, C.I.E., was Commissioner for 313 days, of which he spent 70 days on tour. Mr. W. C. Renouf, I.C.S., held charge for 53 days and did no touring.

Multan.—Mr. C. J. Hallifax, I.C.S., was Commissioner for 211 days, spending 37 days on tour. Lieutenant-Colonel C. Powney Thompson, I.A., was Commissioner for 155 days, remaining 65 days on tour.

Casualty.

34. The Financial Commissioners deeply regret to have to record the death of Mr. Robert Humphreys, I.C.S., which took place on November 8th, 1916. Mr. Humphreys had, as Deputy Commissioner of Hissar in the famine of 1900, of Delhi and of Lahore established the reputation of being one of the most successful District Officers in the Province, and his knowledge of and sympathy with the people under his charge, his grasp of revenue law and his sound judgment combined to make him an officer whose loss will be deeply felt by the administration of the country.

Extracts from District Report.

LYALLPUR.

SERVICE GRANTS.

As no Colony report is now submitted from the Lyallpur District it is convenient to give some account of the working of the service grants in the Revenue report.

Camel grants.—There are four complete camel corps in this district provided by grantees who hold their land on service conditions. All four were called up at the beginning of the year under report and after a short period of embodiment were mobilised for active service. Two have been in Egypt since the beginning of 1916. The other two after a long period of cantonment service are now on the Nushki-Seistan route under field service conditions. The mobilisation, enlistment of Sarwans and replacement of casualties was no light task. But the trouble was very much less than I had expected. It was necessary to convince the grantees that we meant business and that orders had got to be obeyed. When once they were persuaded of this there was very little serious trouble. The confiscations of land made were very few, but they were entirely effectual. The Jangli has no liking for Government service, but when presented with the clear alternative of confiscation or service, they went cheerfully enough. The provision of the sarwans was the most difficult problem. The larger camel owners paid considerable bonuses to men, a good many of whom were not Janglis at all, and the number was made up. About 1,000 new camels had to be got in to replace animals cast for field service or short on the establishment. There are now very few camels left in the district. No attempt has been made to replace service casualties which are believed to be very numerous. The men who have gone with the corps are receiving their pay, and so far as I can learn express themselves content with their lot. The pay of the owners of the camels, as well as compensation, is altogether in arrears, but no one complains and no one can suggest that the Officer Commanding the Corps is not doing his best under the most difficult circumstances. Captain (now Major) E. H. Lancaster and myself have worked throughout in complete accord. It has been our constant effort to protect the camel owners from misunderstanding as well as to enforce compliance with the conditions of the grant. Major Lancaster has now been invalided. We were fortunate in having him in command during the stress of the last year. This is the first time the Camel Corps have been on active service. It will I trust also be the last time. The replacement of camel casualties after the war will take years. There are almost no serviceable camels left in the district. There will be many difficult problems for settlement when the war is over, and when the camel corps are returned, but they can be left for settlement at the proper time. For the present it is sufficient and satisfactory to note that the camel corps have proved a success in a time of special difficulty. I may add that I retain the opinion which I expressed last year that as an administration system the camel grantee corps have no element of permanency.

Their abolition has been in principle decided upon. But the military authorities, being asked to make proposals for the first steps towards the abolition of one of the corps, represented, at the beginning of the war, that the time was not a suitable one for reducing any military or *quasi*-military forces; and the Financial Commissioner felt that this was at such a moment unanswerable.

H. J. MAYNARD.

Mule grants.—Liability to keep a mare for mule breeding will ultimately be attached to all lambardari squares. Already the exceptions are very few. The proportion of mule colts born in one year to bound mares is now about 40 per cent. which the Army Remount Department consider extremely good. Lambardars are now honestly trying to breed mules. Moreover, punishments are much less frequent and less severe than formerly. Not only do the people understand that they have got to try, but I endeavour to follow up and prevent slackness, rather than to inflict punishment. This needs constant inspection and watchfulness, but the success is marked.

The view taken by Colonel Templer is that mule breeding has become a natural industry in the Lower Chenab Canal Colony tract, in other words that it pays.

H. J. MAYNARD.

There is another matter in connection with the lambardari squares which is receiving my attention. A few years ago when mule breeding conditions were first enforced against lambardars with serious effect, a number of lambardari squares had to be resumed for breach of conditions and were allotted to non-lambardars on mule breeding terms. Within the last two years no such allotments to non-lambardars have been made, but a few squares have been kept vacant to give the defaulting lambardars an opportunity of improving. In some cases lambardars simply will not make any attempt to breed mules, and there is no one in the chak who would do any better. At the same time the administration of a chak suffers when a lambardar does not have the position and influence given by the possession of the lambardari square. A single square is worth from Rs. 400 to Rs. 600 per annum, and the cost of keeping a mare for mule-breeding never exceeds Rs. 100 per annum, and is more generally nothing at all, or even the mare is a source of profit.

The confiscations which were very necessary have had the effect of raising the standard of effort to its present comparatively high level. It is at least for consideration whether non-lambardars should be allowed to enjoy indefinitely the profits of the lambardari square without any of the duties or responsibilities of lambardars. In many cases the men who lost their squares are clamouring to get them back, and there would ordinarily be no further complaint against them. On the other hand, the grantees believe that they hold for life and some of them have no other holding in the colony. Statistics are being collected, and a reference will be made for the orders of the Financial Commissioner.

The transfer of such squares to non-lambardars is an object lesson to lambardars and has had a beneficial effect Such transferees will, I understand, hold the squares for life or until they break conditions. There seems nothing illogical in this.

C. P. THOMPSON—18-11-16.

Horse-breeding is declining in popularity and in class, while mule-breeding is improving. The Janglis have never been very fond of Government stallions, and they are not getting fonder. It is, however, only fair to recognise that in their favourite sport of tent-pegging the pure country bred horse beats the stock of Government stallions every time. All the best tent-peggers in the district ride country breds only. I believe that this is also the rule in the Indian Cavalry.

This ground of objection to the Government stallions is one which I have mentioned in several recent references. It is gradually dying out, but it dies hard.

C. P. THOMPSON—18-11-16.

GENERAL.

This is the first year in the history of the Lyallpur District when under the orders of Government no colony report is to be submitted.

This is a recognition of the fact that the colony period has passed and that the ordinary methods of district administration are to be in force in Lyallpur. I take then this opportunity of indicating some of the final steps in the process of transition which have come under my notice. The Deputy Commissioner still continues to receive many applications asking for interference in the daily life of the people which would never be received in an ordinary district, in most of which I refuse to interfere on the ground that the colony days are ended. Much, however, remains to be done, and it would be easy by a change of policy to reintroduce colony administration, which is now discouraged, but which is not unwelcome to the people. It is, as I understand, the policy of Government that the methods of ordinary administration should now obtain.*

*This was definitely decided in the orders which were passed upon the report of the Colonies Commission. Interested persons are no doubt glad to secure the interference of the authorities when that interference is likely to be beneficial to themselves. I am satisfied, however, that the paternal methods of colony administration are generally disliked, and they certainly facilitate corrupt practices, among official subordinates.

H. J. MAYNARD.

Two years ago there was a colony Naib Tahsildar, a colony mapper and three colony muharrirs permanently sanctioned for the continuance of colony work. Now one muharrir does the work at head-quarters and the rest have been brought under reduction. The work used to be concentrated at head-quarters and Tahsildars had very little to do with colony matters. Now all pe-

titions are referred to Tahsildars, who report upon them in the ordinary course of their duties. The Deputy Commissioner has now no power to sell any Government land without the sanction of Government in each case. The result is that no applications are made, nor land sold. The reduction of work on the Deputy Commissioner who was pestered with applications and exposed to every kind of influence, is most welcome. The decrease in the colony staff, and the withdrawal from the Deputy Commissioner of power to sell land himself, were both made at my suggestion, and the result has been a great decrease of unnecessary work. I now absolutely refuse to allow any transfer of land of which the occupants have acquired proprietary rights. It does not seem unreasonable that when a man has bought land and bought it very cheap he should keep the land he has bought and not be allowed to exchange it for other land which he deems better. Irrigation arrangements have now reached a point where the Canal Department cannot undertake to irrigate new land without injury to land previously allotted, and this itself is a sufficient reason for discouraging fresh sales, except where extensions of irrigation are contemplated. The whole of the village sites and the chiragah are still under the charge of the Deputy Commissioner, and their control will always remain a permanent duty. But even here I endeavour to interfere as little as possible consistently with the strict maintenance of the rights of Government and the enforcement of the general wishes of the village community. All this work is finished off from day to day instead of being allowed to accumulate into masses for special attestation. The arrears which had accumulated for years were worked off some months ago on special tours partly by the Assistant Commissioner and partly by myself. We now interfere as little as possible with the division of menial squares* by lambardars, only taking action when there are definite complaints of unfairness. Some supervision will always be necessary, for the lambardars of Lyallpur District, if more substantial, are certainly not more honest than those of other districts. The mutation and records work connected with holdings in village abadis is still far heavier than it ought to be with due regard to the relative importance of the work. During the year under report 25,264 mutations were decided in this district, of which 7,115 referred to agricultural land and no less than 18,149 to abadi sites. This is an intolerable proportion and an unnecessary burden on the tahsil offices. New orders have now issued, with the approval of the Director of Land Records, but on the Deputy Commissioner's responsibility, which will probably have the result of decreasing enormously the number of such residential mutations. Briefly mutations are no longer written up for changes of occupancy, but only for changes of title.† The new procedure is entirely in accordance with the Standing Orders of the Financial Commissioner. The effect will not be visible for some months yet, but I hope for a very real decrease of work. This is a most desirable and necessary reform. I may say here that during the last two years I have never applied for or received the services of an Extra Naib Tahsildar for mutation. Moreover, I found two permanent Naib Tahsildars employed in the not hard worked Tahsil of Lyallpur and one has been reduced without any apparent loss of efficiency. Indeed one of the noticeable features of the district is the very large and even unnecessary ministerial establishment, especially in tahsils. There are many problems still awaiting solution, but I have had no previous experience of a Colony District, and constantly feel the lack of such experience when confronted with the completed work of the many experts who have preceded me.

That is to say, that exchanges of land are not allowed. I supposed that these had already ceased.

H. J. MAYNARD.

*This is to be welcomed. That a Deputy Commissioner should have to pass orders on the appointment of village kamins is one of the unfortunate necessities of "colony" administration.

H J. MAYNARD.

†Messrs. Fagan and Maynard are agreed that this is a change for the better.

A. J. W. KITCHIN,

Deputy Commissioner, Lyallpur.

LAHORE.

Pattoki Mandi.

Population is increasing. There is a genuine demand for more residential sites, accordingly the sale of the remaining sites available for sale is under consideration. The Primary School at Pattoki was raised to the Middle Standard during the year ; the people of the colony subscribed Rs. 5,000 for it. A new building is under construction. The Railway authorities have again failed to remove the goods shed to the new mandi site and to build a proper Railway Station. The latter is a source of great inconvenience to the travelling public, and it is hoped that financial stringency will not stand in the way of effecting this improvement.

2. The old tenants of the Rakh Sarai Chhimba for whom a separate set of conditions was sanctioned by the Punjab Government in their Revenue Secretary's letter No. 1290-S., dated 7th July 1915, have, with the exception of a few (who did not accept the conditions), been put in the possession of the lands granted to them. They have begun to pay the price by instalments sanctioned in their case. Including the land allotted to the expropriated Balloki owners the greater portion of the Rakh Sarai Chhimba has now been given out. The entire Rakh has been formed into a separate estate, and is being colonised on the lines adopted in old colony villages.

The area alloted during the year was—

(1). 24 acres to 2 tenants of Chak No. 24 on payment of market price ;

(2). 514 acres to old tenants of Rakh Sarai Chhimba, making the total allotted up to now as below :—

	Acres.
To Nazrana paying tenants	6,639
To Military reward grantees	919
To peasants	74,205
To purchasers	3,320
Total ...	85,083

3. Proprietary rights were sold to the (peasant grantee) tenants at Rs. 12-8-0 per acre as below :—

No. of holdings.	*Area in acres.*	*Price paid.*
		Rs. A. P.
15	681·38	8,517-4-0.

The reason why a smaller amount of area was sold as compared with that in the preceding year have been given in the heading No. 8 above. The question regarding sale of proprietary rights to the nazrana-paying grantees and the price to be paid by them is under consideration. The matter has been referred to Government for orders.

4. The demand for 202 new residential sites in the villages which were allowed during the year and sinking of 18 more drinking wells is a sure sign of increasing population and prosperity.

5. A matter of considerable importance is the provision of an adequate number of culverts on inter-village roads. New culverts became necessary with changes in the outlets. The Canal Department which had in the first instance provided them have intimated their inability to do so for want of funds. This matter is in hand, but a question of still greater importance is the upkeep of existing culverts ; for which a scheme is being devised.

6. Efforts are being made to introduce improved agricultural implements in the colony and to adopt the improved methods of cultivation. Accordingly a party of the zamindars was sent to Lyallpur to see what was being done there by the Agricultural Department.

The colony remains closely in touch with the Branch of the Agricultural Department at Montgomery, where an Assistant Director of Agriculture has been appointed.

The District Board have decided to hold an Agricultural Show at Pattoki at the time of the next cattle and horse fair.

7. The experiment of doing girdawari by appraisement—*vide* Financial Commissioner's Junior Secretary's letter No. 6191, of 9th September 1915, to Commissioner, Lahore Division, is being tried in five estates in the Lahore Tahsil.

The results of the past experiment which was begun last kharif will be reported in due course after the experiment of 4 harvests. Patwaris, Kanungos, and even the Naib Tahsildars show a tendency to adhere closely to standard yields and do not depart adequately from them, and they will need a lot of training and self-reliance before they can be expected to do the work with any approach to accuracy.

H. P. TOLLINTON,

Deputy Commissioner, Lahore.

XXIII.—Area and income of unclassed forests and of other Government lands.

XXIV.—Sales, mortgages, redemptions and other transfers.

XXV.—Abstract of mortgages, sales and redemptions.

XXVI.—Sales of land.

XXVII.—Mortgages of land.

XXVIII.—Work done by Revenue Officers.

XXIX.—Appellate and revisional work of Commissioners and Financial Commissioners.

Proceedings of His Honour the Lieutenant-Governor of the Punjab in the Department of Revenue and Agriculture—(Revenue), No. 7979, dated 6th April 1918.

READ—

The Annual Report on the Land Revenue Administration of the Punjab for the year ending 30th September 1917, forwarded with letter No. 491—53-1-2, dated 9th March 1918, from the Senior Secretary to the Financial Commissioners, Punjab.

REMARKS.—The five years ending September 1917 witnessed the separation of the Delhi province from the Punjab and the completion of the great triple project by the opening of the Lower Bari Doab canal in 1914 and the Upper Jhelum canal in 1916. In spite of some reduction in the total area there has been an increase of over a million acres in cultivation, nearly the whole of this being due to canal irrigation. The apparent expansion of 600,000 acres in *barani* cultivation is only nominal, as there has been an equivalent reduction in the headings *sailab* and *abi*. Twenty-nine million acres, or slightly more than half the total area of the province, are now under cultivation, of which 3½ million acres are protected by wells, while 9 million acres are irrigated by canals or by canals and wells combined, and the gross assessment, excluding the canal charges, aggregates more than 4 crores of rupees. These figures are an eloquent testimony to the paramount importance of agriculture both to the administration and the people. The average incidence of land revenue is now Re. 1-6-10 per acre of cultivation as compared with Re. 1-3-0 in 1912, or an increase of 20 per cent. which is due to the fact that no less than 12 districts, including some of the most fertile in the province, were re-assessed during the quinquennium. When it is remembered that the average produce of an acre may now be safely valued at not less than Rs. 25 it is obvious that by far the greater portion of the increased profits from agriculture due to the recent rise in prices has gone into the pockets of the zamindar.

2. The year 1916-17, following on two unusually poor harvests, opened with conditions eminently favourable to agriculture. The monsoon of 1916 brought abundant rain to the greater part of the province, which resulted in an increase of 45 per cent. in the sown and no less than 79 per cent. in the matured area of the kharif crop over the figures for 1915. Outturns were good, especially in the case of rice, bajra and sugarcane, and though the prices of rice and raw sugar fell slightly, cotton rose from Rs. 6-9-0 to Rs. 8-10-0 per maund, double the figure for 1915. Heavy rain in October, coupled with the prevailing high prices and the increased demand for food-grains from foreign countries, led to an increase of 11 per cent. in the area sown for the rabi harvest. The winter months, however, were phenomenally dry, and this seriously affected the canal supply. The situation was partially saved by rain in April, which, though too late for the eastern districts, was of great value in the northern and western portions of the province. Considering the character of the season the resulting increase of 23 per cent. in matured area over the rabi of 1916 was satisfactory. Outturns were slightly below normal, and prices though rather lower than in 1915 except in the case of wheat, which rose from Rs. 3-5-0 to Rs. 3-10-0 per maund, still ruled high. The area of crops matured was 15 per cent. above the assumed normal. On the whole, therefore, the year was a fairly successful one and may be summarized as a bumper kharif, followed by a rabi of record acreage but somewhat disappointing outturn.

3. The fixed land revenue demand rose from 226·29 to 231·51 lakhs. The gross increase of 8·51 lakhs was due mainly to enhanced assessments, while the chief decrease was one of 2·8 lakhs on account of wells falling out of use and alterations from fixed to fluctuating assessments. If sums under suspension and undetermined and irrecoverable balances are excluded, 99·6 per cent. of the total demand was collected and only Rs. 8,000—the same figure as in 1915-16—were outstanding at the end of the year. The collections of

fluctuating revenue rose from 121·93 to 138·32 lakhs, owing to the extension of canal irrigation and the timely rainfall, and the balance outstanding was only Rs. 28,000. The Lieutenant-Governor agrees with the Financial Commissioners that the delays that occurred in granting remission for crops damaged by hail in Lyallpur require investigation, and will be glad if the Financial Commissioner and Chief Engineer will jointly devise measures to obviate them in future. If remissions are necessary they should be given at once; the policy of Government is stultified by a procedure that defers the grant of relief until after collections have been made. Such delays give opportunities for malpractices; it appears that there were complaints of corruption against canal subordinates in connection with this matter, and it is satisfactory to learn that some of those concerned have been convicted and punished by the courts.

Collections of "other land revenue" amounted to over 40 lakhs, but it is important to remember that 31 lakhs of this represent payments for the sale of Government land, and must be regarded as the realization of capital rather than as recurring income.

4. The favourable conditions of the year are reflected in the number of coercive processes. These fell from 16,129 to 12,430, and no less than 90·5 per cent. of the outstanding arrears were collected. There were no cases of imprisonment, only one sale of immovable property and only one warrant for its attachment. The Multan division is again responsible for the largest number of processes, but the figures show an improvement on those of the previous year, and it appears that the special efforts made to enforce punctuality have been largely successful. The experiment of serving revenue processes through the post has been very successful in Gujranwala, and the Lieutenant-Governor is glad that the Financial Commissioners are extending it tentatively to other districts. A reduction in the number of tahsil chaprasis and a corresponding curtailment in the opportunities for illegal exaction are the most welcome features of the system.

5. The plan of appointing a special official to lay the revenue records or excerpts from them before civil courts is reported to have worked well in the four districts where it was tried, and on the recommendation of the Hon'ble Judges is about to be extended to all districts. The extra cost has hitherto been covered by fees payable by the parties, and the scheme is therefore self-supporting. It is hoped that means will be devised for avoiding in practice the possible abuses to which the report alludes, and that the desired result of making the revenue records easily accessible to litigants will be achieved.

The payment of revenue by currency notes is not yet popular, partly owing to the possibility of fraud and partly because of the difficulty of procuring notes in rural tracts. The policy of Government is to popularize the use of its paper currency, and with due safeguards the despatch of notes by post should be more convenient and economical than payment by money order for the remittance of large amounts.

6. The working of the perennial canals during the year was again severely tried and called forth all the energy and skill of the Irrigation Department. Supplies for the autumn crop were abundant, but the failure of the winter rains inevitably meant low rivers and seriously restricted the supply for the rabi harvest, at a time when the demand for both the irrigated and unirrigated sowings was unprecedentedly keen. The question of equitable distribution of the available supply between the five great canals fed by the triple project was thus one of unusual difficulty and was complicated by the fact that irrigation from the Upper Chenab is still in process of development, while that from the Upper Jhelum has only just commenced. Moreover, the Lower Chenab was for the first time grouped with those of the triple project for the purposes of this distribution, and this apparently led to some curtailment of the supply to Lyallpur irrigators. Similarly the opening of rabi irrigation on the Upper Jhelum caused a marked diminution in the supply for the Lower Jhelum and necessitated the introduction for the first time of rotational closures, which in the absence of due warning are naturally disliked by the cultivators. In reviewing the annual colony report His Honour recently remarked that the

subject, though mainly a technical one, is of such importance that the Financial Commissioners should in future be consulted before the distribution is made, and he hopes that this will ensure more careful consideration of the contending interests involved.

7. The working of the Upper Chenab Canal continues to give rise to difficulties, not only in the new Colony which has suffered from initial mistakes of policy, but also in the settled villages, the very varying conditions of which cannot in all cases be readily adapted to the principles of irrigation laid down. If the complaints regarding the heading up of torrent water, the inequity of the complicated chakbandi system and errors in the assessment of water-rates are well founded, no time should be lost in removing their causes. The danger of water-logging, the most pressing problem of Punjab agriculture, is one to which Government is already alive, and the recommendations of the Conference of April 1917, to which the Financial Commissioners allude, are receiving careful consideration. The problem has recently become one of increasing urgency owing to the disastrous floods caused in certain districts by the unprecedented rainfall of September last, and the Lieutenant-Governor is inclined to the view that the most satisfactory method of solving it will be to take each of the great Doabs separately and work down from the point where irrigation begins to the junction of the rivers. Something of this kind is already being done on the Lower Chenab canal, and there is reason to believe that similar remedial measures are urgently required in the Bari Doab.

The increasing success of the Nammal dam is a matter for satisfaction, and justifies further efforts to undertake similar works in the dry north-western districts where suitable sites are forthcoming. One such scheme in the Isa Khel tahsil is now under investigation, but in future reports some brief details of area irrigated and revenue returns might well be given.

The total figures of irrigation from Imperial and Provincial canals—9 million acres sown and 8⅓ million matured—are very striking, especially in a year conspicuous for an almost complete failure of the winter rains. The crops raised on the canals probably represented one-half of the agricultural wealth of the Province, and it may be said that in 1916-17 the canals again stood between the Province and severe scarcity. Schemes of further expansion are already under consideration, but even as it stands the great Punjab canal system is an achievement of which the Province may be justly proud.

8. The working of the Land Improvement Loans Act, which was adversely criticized in last year's review, shows little improvement. The total of advances made is the same, and the number of wells sunk with the aid of loans has decreased. The Financial Commissioners have wisely called for the opinions of Commissioners on the apparent unpopularity of what ought to be a most beneficial system to the zamindars, and their conclusions will be awaited with interest. The figures for Gurgaon, quoted in paragraph 24 of the report, show how much can be done to encourage the sinking of wells by a zealous District Officer. There has been a large decrease, from 8 to 1·5 lakhs, in the amount of loans under the Agriculturists' Loans Act, but this is doubtless due not to any falling off in the popularity of the Act, but to the favourable character of the seasons. The present system could no doubt be improved by more careful inspection of the way in which the money is utilized and by the distribution of loans at cattle fairs and other gatherings. Government has refused to raise the rate of interest charged on either form of loans in spite of the steady rise in the open market.

9. An important experiment with the object of encouraging the cultivation of food-grains has been made by relaxing the rules regarding leases of Government waste land, and a large area has been given out on favourable terms to lessees for two years for the cultivation of such crops. It is too early to estimate the result of this innovation, but its effect on the cultivated area of the present harvest will be awaited with interest. The Lieutenant-Governor however, notes with satisfaction the energetic measures taken by Mr. Kitchin in Lyallpur, where the system of leaving the actual distribution of the waste

attached to each village to the colonists themselves is expected to bring over 64,000 additional acres under the plough. If corresponding results have been obtained in other canal-irrigated tracts with similar opportunities the success of the experiment is assured.

10. The financial situation has again prevented further action under the Chos Act. The Lieutenant-Governor agrees with the Financial Commissioners that the results already obtained are promising, and that further action should be no longer delayed; proposals for extending the operations should now be formulated and provision made for giving effect to them as early as possible. Meanwhile judicious encouragement should be given to any unofficial action likely to contribute towards the desired reafforestation, and His Honour is prepared to consider an extension of the practice of making grants to villages for the reclamation of Cho beds, if they are found to be properly utilized.

11. Sales of agricultural land have remained low and redemptions of mortgages are fewer even than last year. This may no doubt be partly attributed to the unsettled conditions created by the war, but recent high prices and the improved conditions of military service have put large sums of money into the pockets of the agricultural classes, and extensive redemptions of mortgages might well have been expected. The result of Financial Commissioners' enquiries into this subject will be awaited with interest, and it may be that part of the funds which might have been utilised for clearing off encumbrances were invested in the various war loans. The value of land continues to rise rapidly and the average for the year under review was Rs. 227 per acre as against Rs. 216 in 1915-16. The average price realized at the auction sales on the Lower Bari Doab canal in the spring of 1917 was Rs. 229 per acre, whereas at the auctions of March 1918 it reached the unprecedented figure of Rs. 331 per acre for nearly 8,000 acres. A remarkable feature is the large proportion purchased by agriculturists. In the Province as a whole the sale value of land on the figures for 1916-17 now represents 157 times the land revenue, as against 151 times in 1915-16 and 66 times 20 years ago. No better proof could be afforded of leniency of the land revenue demand and of the remarkable increase of general prosperity within the last generation.

12. The working of the Alienation of Land Act has again been satisfactory: no new difficulties are reported and it appears to entail very little extra work. His Honour is in complete agreement with the view of the Financial Commissioners that it commands the confidence and approval of the peasant population, and has largely achieved its object. In almost every village the *Akt Intiqalat* is spoken of as the Magna Charta of the zamindar. It is the settled policy of Government to secure the prosperity and contentment of the land-owning classes by leniency in assessment, by securing them in the possession of their ancestral holdings, and by opening up to them new fields of profitable expansion in the great canal colonies. That this policy is appreciated is proved by their remarkable rally to the Empire's call in the present war. During the year 1917 the Punjab furnished well over 100,000 recruits to the army and these were drawn almost exclusively from the rural population.

13. The slight decrease in the number of revenue cases decided during the year needs no comment. Appellate work is well up to date in the offices and courts of Commissioners and Financial Commissioner, but over half of the pending cases are on the file of the Commissioner of Jullundur. The report makes special mention of the number of petitions received from soldiers at the front, which in the case of the single district of Hoshiarpur numbered no less than 2,195. His Honour believes that district officers are fully alive to the importance of dealing promptly and sympathetically with these applications as far as the powers at their disposal allow, and the fact might well be brought to the notice of Commanding Officers, who are apt to complain if immediate attention is not paid to the sometimes impracticable demands of their subordinates and do not always understand the limitations on the action of Executive officers in such matters.

In conclusion Sir Michael O'Dwyer desires to thank both Financial Commissioners for their efficient administration of the Revenue Department and for a most interesting and practical report. The war has thrown upon the shoulders of Revenue officers a variety of miscellaneous duties which, though forming a heavy addition to their ordinary work, have been cheerfully and efficiently performed; and the Lieutenant-Governor has pleasure in acknowledging the unflagging zeal and the loyal spirit in which officers of the Revenue Department from the highest to the lowest have borne the strain of the last three years and responded to every fresh call made upon them.

ORDER.—Ordered that a copy of the above review be forwarded to the Senior Secretary to the Financial Commissioners, Punjab, for information and guidance, also that it be published in the *Punjab Government Gazette*, and circulated with the report as usual.

By order of His Honour the Lieutenant-Governor of the Punjab,

H. D. CRAIK,

Revenue Secretary to Government, Punjab.

2718 CS—345—6-1-18—SGPP Lahore

No. 491—53-I-2.

FINANCIAL COMMISSIONERS' OFFICE:
Dated Lahore, 9th March 1918.

FROM

V. CONNOLLY, ESQUIRE, I.C.S.,

Senior Secretary to the Financial Commissioners,
Punjab,

To

THE HON'BLE MR. H. D. CRAIK, I.C.S.,

Revenue Secretary to Government, Punjab.

The Hon'ble Mr. H. J. Maynard, C.S.I., I.C.S.
The Hon'ble Mr. P. J. Fagan, C.S.I., I.C.S.

SIR,

I AM directed to submit the Annual Report on the Land Revenue Administration of the Punjab for the Agricultural year ending the 30th September 1917.

The Hon'ble Mr. Maynard, C.S.I., and the Hon'ble Mr. P. J. Fagan, C.S.I., held the offices of Financial Commissioner throughout the year.

I have the honour to be,
SIR,
Your most obedient servant,
V. CONNOLLY,
Senior Secretary to the Financial Commissioners,
Punjab.

REPORT

ON THE

LAND REVENUE ADMINISTRATION

OF THE

PUNJAB

FOR THE

Agricultural year ending the 30th September 1917.

Introductory.—The year 1916-17 marks the end of a quinquennial period, and the figures in statement I have been brought up to date. During the period the old Delhi district was split up, the Delhi tahsil and part of the Ballabgarh tahsil being converted into the new Delhi Province and the rest of the Ballabgarh tahsil and the Sonepat tahsil being absorbed into the Gurgaon and Rohtak districts, respectively. The name of the south-eastern division was in consequence changed to the Ambala Division and the head-quarters of the Commissioner transferred to Ambala. The 140 trans-Ravi villages in the Gugera tahsil of Montgomery were transferred to Lyallpur and 32 villages from the latter district to Jhang during the period for administrative reasons, while 107,000 acres were transferred from Multan to Montgomery. The common boundaries of the Lahore and Ferozepore districts and of the Hoshiarpur and Ambala and Ludhiana districts were rectified and a number of long standing boundary disputes with Native States bordering on British districts were settled. The districts of Lahore, Gujrat, Simla, Jullundur, Ambala and parts of Kangra and of Dera Ghazi Khan came under settlement during the period which also saw the conclusion of settlement operations in Ferozepore, Hoshiarpur, Sialkot and parts of Shahpur and Kangra. The total area of the Province shows an apparent decrease of more than a million acres. 767,000 acres of this are however due to the exclusion from the figures for the Kangra district of large tracts which have never been measured, but the approximate area of which was previously entered 330,000 acres are due to the separation of the Delhi Province. Of the total area of the Province a little more than half is at present under cultivation. The total net increase in cultivated area during the quinquennium was more than a million acres. The canal irrigated area increased by nearly a million acres, and the *barani* area by over 600,000, acres. Although masonry and unlined wells have increased by 12,500 and 1,600 respectively, the former now numbering 254,675, the total area irrigated by them with and without the assistance of canals or river-floods has fallen from 4,855,184 to 4,823,854. The decreases in the *sailab* and *abi* areas amount to 283,500 acres and 216,400 acres, respectively. The quinquennium was marked by the opening of the last two canals of the Triple Project series, the Lower Bari Doab Canal in 1914 and the Upper Jhelum Canal in 1916. The increase in assessment during the five years amounts to over 82½ lakhs of which some 63½ lakhs are on account of fluctuating revenue. The incidence of the land revenue demand per acre of cultivation is Re. 1-6-10 as compared with Re. 1-3-0 in the last quinquennium.

Analysis of statistics. Statement I.

1. The agricultural conditions for the first part of the year under report were very favourable. The monsoon burst in the latter half of July, when heavy and widespread rain fell throughout the Province with the exception of a few districts in the south-east and south-west. Excellent rain fell at intervals until the first week of September, but during the rest of that month the monsoon was weak except in the south-east. Heavy rain fell again in the beginning of October and this was most favourable for the sowing of spring crops. The winter rains, however, were neither

General summary of agricultural conditions in 1916-17.

so frequent nor so heavy as usual and the season from December to March was one of the driest on record. In April and May fairly heavy rain fell at intervals throughout the Province, accompanied by hailstorms which did damage in some districts. This rainfall was harmful in the east and south-east, where much of the wheat was already on the threshing floor, but it benefited greatly the crops of the Northern Punjab, where harvesting starts at a much later date. The deficient winter rainfall seriously affected the canal supply. The Lower Bari Doab Canal was the worst sufferer and the supplies from it came at long and irregular intervals.

The total sown area for the year exceeded the area sown in the preceding year and the assumed normal sown area by 22 and 13 per cent. respectively. The total matured area was 42 per cent. more than the preceding year's matured area and 15 per cent. more than the assumed normal matured area. The combined harvests of the year, so far as area is concerned, fell little short of those of the record year 1914-15. The autumn harvest as compared with the kharif harvest of 1915 showed an increase of 45 and 79 per cent. for the sown and matured area, respectively. The proportion of crop failure was low in all districts except Dera Ghazi Khan, which recorded a percentage of 18. The outturns of all the principal crops except cotton and jowar were above normal. Rice, bajra and sugarcane were bumper crops, maize and cotton approximately average, jowar only about two-thirds of the normal. The conditions for spring sowings were excellent and, together with the prevailing high prices and the anticipated requirements of food-grains by foreign countries, led to an advance in sowings, the result being an increase of 11 per cent. in the sown and 23 per cent. in the matured area over the figures for rabi 1916. Percentages of failure did not exceed 15 in any district of the Lahore and Multan divisions. The other three Divisions did not fare so well, and in the Kangra and Hoshiarpur districts 40 per cent. of the area sown failed to mature. The yields of the principal crops were, wheat 98 per cent. of the normal, barley 90, gram 108 and rabi oil-seeds 90 per cent. Prices, though affected by the war, were, except in the case of wheat and cotton, lower than in the preceding year. Owing to the character of the crop and the brisk foreign demand which led to an increase of 26 per cent. in its export during the year, the average price of wheat rose from Rs. 3-5-0 to Rs. 3-10-0 per maund. The price of cotton rose from Rs. 6-9-0 to Rs. 8-10-0 per maund owing to the increased demand for export. The price of rice fell from Rs. 2-14-0 to Rs. 2-7-0 and of rape-seed from Rs. 4-4-0 to Rs. 2-2-0 per maund. The price of raw sugar fell from Rs. 5-13-0 to Rs. 5.

Fixed Land Revenue.
Statements Nos. V, VI and VII.

2. The total demand for the year on account of fixed land revenue rose from 226·29 to 231·51 lakhs, a net increase of 5·23 lakhs. The gross increase was 8·51 lakhs due mainly to increases of 7·62 lakhs on account of the introduction of revised assessments in nine districts, of Rs. 24,000 by alluvion, of Rs. 19,000 from the assessment of grants of waste land and the lapse of protective well leases, of Rs. 30,000 from progressive assessments, of Rs. 7,000 by lapses and resumption of revenue-free grants and of Rs. 8,000 in miscellaneous items. Against this must be set off a gross decrease of 3·28 lakhs, which was due to decreases of Rs. 17,000 on account of revision of zaildari arrangements, of 2·8 lakhs on account of reduction of assessments due to wells falling out of use or alteration of assessments from fixed to fluctuating, mainly in Lahore, Gujranwala and Gujrat districts, of Rs. 16,000 by diluvion and of Rs. 9,000 in miscellaneous items. Of the total demand 230·50 lakhs or 99·6 per cent. have been collected. Excluding Rs. 31,000 placed under suspension and Rs. 62,000 of undetermined or irrecoverable balances, only Rs. 8,000 of the demand remained uncollected at the end of the year. A sum of Rs. 20,000 was remitted owing to calamities of season chiefly in the Kangra and Amritsar districts. Owing to favourable agricultural conditions only Rs. 59,858 in all were suspended during the year and in every case the suspension was due to some special calamity such as hail, floods or earthquake. Adding the sum of Rs. 15,66,210 under suspension at the beginning of the year, of the total of 16·26 lakhs thus under suspension 10·45 lakhs were recovered and Rs. 18,298 were remitted leaving a balance at the end of the year of only 5·63 lakhs. Harvests were on the whole favourable and collections were everywhere made with ease.

Alluvion and diluvion. Statement No. IX.

3. The year was marked by the absence of any great floods in the Punjab rivers. As a result of alluvion and diluvion operations there was a net increase of Rs. 21,149 to the fixed land revenue roll as compared with Rs. 10,000 last year. The total assessable area of the Province was increased by 7,000 acres, while revenue was enhanced on 36,500 acres and reduced on 15,000 acres. A change in the course of the Jamna resulted in a gain of over 2,000 acres in Karnal at the expense of the Muzaffarnagar district. The action of this river caused a small gain in Rohtak and Gurgaon and a slight loss in Ambala. There was a slight loss on the Sutlej in Ambala, Hoshiarpur, Ludhiana and Lahore, and in the portion of the Sutlej riverain in the Montgomery district not under fluctuating assessment 600 acres were eroded. In the Sutlej riverain in Jullundur and Ferozepore the river's action increased the assessable area by 4,500 acres, but the figures of Jullundur include for two tahsils land accreted in the previous year. The action of the Beas was beneficial in Hoshiarpur and Gurdaspur, and caused little damage elsewhere. The Ravi in Amritsar, Gurdaspur and Sialkot caused a gain. There was a gain in all districts affected by the Chenab, Gujrat benefiting to the extent of 1,400 acres. The Jhelum eroded net areas of nearly 2,000 acres in Shahpur and of 167 acres in Jhelum district. The joint action of the Jhelum and Chenab benefited the Jhang district by a net increase of 1,300 acres. The decrease in revenue due to action of chos and minor streams during the year was Rs. 49 and Rs. 58, respectively, the net area lost by their action being 425 acres by the former and 236 acres by the latter.

Fluctuating land revenue. Statement No. VIII.

4. The amount of land revenue temporarily excluded from the revenue roll has fallen from 5·4 lakhs in 1915-16 to Rs. 74,000 in the year under report. Last year's figures however were inflated by the practice in Sialkot district of temporarily excluding from the revenue roll the whole of a newly announced demand and not the increase only as was noted in last year's report. The collections of true fluctuating revenue rose from 121·93 to 138·32 lakhs. There was an increase on canal-irrigated lands of 3·30 lakhs in the assessments made by Deputy Commissioners and of 9·34 lakhs in the land revenue and water advantage rate assessed by the Irrigation Department. There was also an increase of 3·77 lakhs in the assessment of other than canal irrigated lands. All these increases were due to timely rainfall, to satisfactory supplies in the canals both perennial and inundation, and to the development of canal irrigation in the Sialkot, Montgomery, Lyallpur and Multan districts. The outstanding balance of fluctuating revenue was only Rs. 28,000 at the close of the year. The Deputy Commissioner, Lyallpur, states that remissions for crops damaged by hail were not given till six months after the land revenue and water rate had been collected and that remissions not given in the current demand are of very little value. The Commissioner, Multan, remarks that it lies with the Canal Department to devise a remedy for such delay. The Financial Commissioner agrees that the question calls for consideration and the Chief Engineer's attention will be drawn to the matter. The Deputy Commissioner, Lyallpur, also states that there were many complaints of the method of determination of hail remissions and that a number of cases were lodged against Canal subordinates for extorting illegal gratifications in connection with these remissions. The cases were still pending at the end of the year. In Gujrat district 75 more villages were brought under fluctuating assessment from kharif 1916, while in Gurgaon the assessment was converted from fluctuating into fixed in 30 villages.

Other land revenue. Statement No. VIII.

5. Collections of other land revenue rose from 38·32 lakhs in 1915-16 to 40·33 lakhs in the year under report. Purchase of proprietary rights in Government estates accounted for 6·40 lakhs, most of this being in Lyallpur, Gujranwala, Lahore and Jhang Districts. The sale of Government waste lands realized 24·61 lakhs, or 1·14 lakhs less than in the preceding year. Of this sum Montgomery contributed 16·77 lakhs and Multan 2·65 lakhs. In both districts the sales were of land commanded by the Lower Bari Doab Canal, and in Lyallpur (3·15 lakhs) and Gujranwala (1·34 lakhs) of areas irrigable by the Upper Chenab Canal. Realizations of Rs. 56,654 and Rs. 6,452 in Shahpur and Gujrat, respectively, were due to

the Upper Jhelum Canal. Receipts from single harvest leases brought in 2·70 lakhs against 1·2 lakhs in 1915-16, Montgomery being responsible for nearly ¾ths of the total. The increase was due to good rainfall in the case of unirrigated Crown lands and to extensions of the Lower Bari Doab Canal in Crown waste. Owing to favourable rains tirni collections rose from 1·10 to 1·25 lakhs. An increase of Rs. 5,400 in other land revenue in Kangra is due to receipts from the recently imposed cattle tax, to rents of fisheries and to income from forests brought under the direct control of the Deputy Commissioner. There is an increase of Rs. 5,400 in Gujranwala on account of receipts from royalty on kankar collected for the first time in the district during the year under report. The other heads call for no remarks. The uncollected balance has remained at about the same figure as last year, namely, Rs. 92,000. Of this Rs. 34,000 are on account of the previous year of which Rs. 28,000 are due from the Jalpana Estate: the Court of Wards is arranging to pay off this amount gradually. Of the balances for the year under report Rs. 32,000 are in the Gujranwala District. Of this sum Rs. 10,733 are due by colonists who declared their intention of exercising their option of purchase of proprietary rights of Government land on the Upper Chenab Canal, but fell into arrears with their instalments of purchase money. Rupees 20,176 are payable by purchasers of Government land sold by auction on the same canal. The Deputy Commissioner does not say whether measures have been taken to recover the latter sum. Steps are being taken to recover all outstandings in other districts.

Land Revenue Assignments.
Statement No. X.

6. Fifteen new jagirs, 3 of Rs. 1,000 each, 4 of Rs. 750 each and 8 of Rs. 500 each, were granted in recognition of the distinguished services rendered in connection with the war, to the administration and in public life. Two grants of Rs. 100 each were made for the term of settlement in favour of two shrines in Mazhbi villages in Gujranwala as a reward for the number of Mazhbi recruits enrolled during the war. One military grant of the value of Rs. 600 was given in Gurgaon, and a grant of 600 acres of waste land free of revenue for the lifetime of the grantee was made in Dera Ghazi Khan. Five sufedposhi inams aggregating Rs 275, per annum, were confiscated in Mianwali District for failure on the part of the holders thereof to render any help to Government in recruiting. Statement No. X shows a reduction in the area under assignment from 4,676,000 to 4,630,500 acres. This is due partly to a decrease of 19,425 acres in the Gujranwala District owing to the correction of a mistake in the figures reported last year from that district and partly to the excess of lapses over new grants. Owing, however, to new assessments and fresh assignments the income enjoyed by assignees has increased from 31·8d lakhs to 32·69 lakhs. The revision of land revenue assignments was completed in the Nawashahr Tahsil of Jullundur District and in the Rupar and Kharar Tahsils of the Ambala District.

Coercive processes.
Statement No. XI.

7. There has been a large decrease in the number of coercive processes from 16,129 in the last year to 12,430 in the present year and in the amount of arrears for the realization of which they were issued from 11 lakhs to a little over 8½ lakhs. 90·5 per cent. of the arrears were collected. Collections made after issue of process amounted to 1 per cent. of the total collections made. Of the 12,430 processes issued 7,771 were writs of demand and of the remaining 4,659 only 2,421 were executed. Of these 1,752 were for arrest, 645 for distress, 23 for sale of moveable property and 1 for attachment of immoveable property. Of the 1,752 cases of warrants executed for arrest by far the larger number were in the Multan, Jhang and Dera Ghazi Khan Districts of the Multan Division and in the Gurdaspur and Gujranwala Districts of the Lahore Division. The same districts also have the largest number of executions in cases of distress. In Hoshiarpur 12 cases of sales of moveable property were executed. There were no cases of imprisonment, direct management, farm or transfer, and only one case of sale of immoveable property. Processes were also issued in 9 districts for the recovery of canal occupiers' rates. The Rawalpindi Division shows the least number of processess issued and executed during the year and this satisfactory result would seem to be due to the system in vogue in the Division of having fixed dates for payment of revenue for each separate zail or group of villages. This system has also worked successfully in Lahore, Gurdaspur and Muzaffargarh, where it

has resulted in a great decrease in the number of processes issued. The large increase in the number of processes issued in Mianwali was mainly in the Mianwali tahsil, where want of punctuality in payments is stated to have become common and to have called for strong measures. In Pathan villages in that tahsil it is remarked that zemindars used to delay payment with a view to seeing their lambardars disgraced. An increase in the number of writs and warrants against lambardars in Ambala is stated to be due to the fact that Tahsildars made no sustained effort to ensure prompt payment. The number of lambardars in the district is also stated to be too great and the Settlement Officer is considering the question of reduction in appropriate cases. Although the Multan Division again shows the greatest number of processes issued and executed, there has nevertheless been a great decrease on the last year's figures, a result due to normal conditions having been restored in the Jhang district, to the exertions of the tahsil officials and to the fear of lambardars that their *pachotra* will be forfeited for failure to pay on due dates. The Deputy Commissioner, Lyallpur, remarks that the average number of processes of all kinds issued by him was rather less than three per lakh of rupees collected as against rather more than six last year. He states that even in the Sayadwala tract collections are improving, for the people are getting more prosperous and the example of their more regular neighbours is catching. This indicates a satisfactorily high standard of efficiency in collection and is an eloquent testimony to the prosperity of the district.

Process serving establishment.

8. Eleven districts entertained temporary assistance for short periods for serving coercive processes at a total cost of Rs. 545. The system of serving revenue processes through the post continued to work well in Gujranwala, and has now been made the rule throughout the entire district except in parts of Sharakpur tahsil, where there are few post offices. It is stated that the system has been found to be much more reliable than service through peons, and owing to its introduction it has been possible, with the approval of Government, to reduce 30 peons from the permanent establishment at a saving of Rs. 255 per mensem. All Commissioners were in May 1917 asked by the Financial Commissioners to take action towards introducing the system into other districts. The Financial Commissioners left it to the Commissioners to decide to what extent it should be initially introduced, but suggested that it should be tried in at least two districts in each division, and the results duly noticed in the land revenue reports. In Amritsar the system was tried only for four months, and proved a success; the cost of serving in most cases, as in Gujranwala, was met by the plaintiffs. The Deputy Commissioner, Ferozepore, finds it too early to judge of the results of the system, but he is doubtful if it will eventually necessitate a reduction in the tahsil staff. In Rawalpindi the results have so far not been a success, but the system will be given a further trial. The working of the system during the short time it was in force has not been noticed in any other district report. The system has also been introduced in the offices of the Financial Commissioners and of the Commissioner of Ambala. The subject will be further dealt with in next year's report.

Progress in re-measurement, revision of records, &c.

Statements Nos. XII and XIII.

9. At the beginning of the year five settlements were in progress and of these Simla and Jullundur were completed during the year. The three southern tahsils of the Ambala district, Ambala, Jagadhri and Naraingarh, and tahsils Dera Ghazi Khan and Sanghar of the Dera Ghazi Khan district, were brought under settlement at the beginning of the year. In Ambala remeasurement or map correction was finished in 983 villages while in 730 of these the record-of-rights was completed and finally attested during the year. In Dera Ghazi Khan re-measurement and map correction were carried out in 252 villages and the records of 194 villages were completed. In the Lyallpur district killabandi was completed in 21 out of 24 villages in the Sayadwala tract. The existing records of this tract were at the same time brought up to date. In the Palampur tahsil of Kangra district the record work was nearing completion at the end of the year. The deay in completion of this branch of the work was due, as noted in

last year's report, to the procedure adopted of pushing on measurement without simultaneous attestation. The advantages of this procedure, the Commissioner thinks, were much outweighed by its disadvantages and the Financial Commissioners entirely agree with him. In the Nurpur and Kangra tahsils this procedure was not adopted and measurement is being kept abreast of record work. Although regular work was not started in the Kangra tahsil till the spring of 1916, or two years later than in Palampur, it is anticipated that settlement operations will finally close in both Kangra and Palampur about the same time. The Assessment Reports of the Nurpur tahsil of Kangra, of the Kotgarh ilaqa of Simla, and of the Rupar and Kharar tahsils of Ambala district were received and orders passed on them either during the year or shortly after its close. All assessments were announced in Simla and operations there finally closed in June 1917.

Final settlement reports.

10. The final settlement reports of Sialkot, Jullundur, Shahpur and Simla were received during the year and have been submitted to Government. The orders of Government were received on the Lahore and Gujrat final settlement reports. For Lahore the term of settlement in the case of agricultural assessments has been fixed at 20 years, while in the case of urban assessments both in Lahore itself and in the outlying markets the term sanctioned is 10 years. The purely fluctuating assessments imposed are liable to conversion into fixed assessment at the end of 10 years. In the villages of Gujrat which already receive canal irrigation or will receive it within the next ten years the assessments will run for that period, while in those areas which will not receive such irrigation either now or in the future no enhancement of the fixed demand will be made for 30 years. Although no expectation of a longer term than 20 years had been raised in these latter areas, yet, in recognition of the facts that the agricultural tribes of Gujrat, especially in the areas that will not be benefited by the canal, are as a rule small self-cultivating peasant proprietors and that large numbers of them are in the army, Government decided to fix a term of 30 years for these areas. In the riverain tracts where deterioration is possible an examination into their condition with a view to seeing whether a reduction of the demand may be necessary is to be made after 20 years.

Comparison of estimates and forecasts in regard to duration, cost and results.

Statements Nos. XIII and XIV.

11. Two settlements came to an end during the year, Simla and Jullundur. In Simla operations began in October 1914 and lasted a little over the 2½ years estimated. The total cost of the operations was Rs. 26,711, against an estimate of Rs. 26,166 in the forecast report. With the enhancement, which amounted to Rs. 3,077, the cost will be recouped in less than nine years. The enhancement was nearly Rs. 2,000 less than was estimated. In Jullundur settlement operations began in October 1913 and were completed in March 1917 or six months before the time expected. The net cost of the settlement was approximately Rs. 4,85,000, against an estimate of Rs. 4,31,700, and will be recouped in 1½ years from the initial enhancement imposed which amounts to Rs. 3,56,000 round. The estimate of total enhancement accepted by Government in connection with the forecast was Rs. 4,88,000 round and the final enhancement imposed was Rs. 4,87,795.

Proposed future settlement operations

12. Sanction was received during the year to the general revision of assessment of the Multan district excluding estates lying wholly within the irrigation boundary of Lower Bari Doab Canal, and operations accordingly began on the 1st October 1917. The forecast reports of the Sutlej tahsils and the portions of the Ravi tahsils outside the Lower Bari Doab Colony area of the Montgomery district and of the Sirsa tahsil were called for and are now under the consideration of the Financial Commissioner.

Settlement staff.

13. Settlement operations were begun in two tahsils in Dera Ghazi Khan in October 1916, while the settlements of Jullundur and Simla came to an end during the year. The staff from Jullundur was drafted to Dera Ghazi

Khan. The duration of operations in Kangra have been extended up to 30th June 1918 for the full staff and up to 31st December 1918 for a reduced staff. After a consideration of present and future requirements the Financial Commissioner has sanctioned the confirmation of 250 settlement kanungos, that is, 200 for settlement work and 50 for deputation. The question of the strength of settlement kanungo staff will again be considered in 1919 with reference to the number of settlements then in progress.

Surveys.

14. The Punjab Riverain Detachment of the Survey Department carried out riverain surveys on the Indus, Chenab, Ravi and Jumna in connection with the Dera Ghazi Khan, Multan and Ambala Settlements. 977 linear and 1,796 square miles of main circuits and 2,216 linear and 421 square miles of minor traverses were run and 1,359 theodolite stations of the former and 8,535 of the latter were fixed in the area under river action. 748 square miles were demarcated with permanent mark stones on both banks of the Indus and the Jumna to serve as bases for the future survey and demarcation of boundaries and fields in the beds of the rivers. 1,231 plotted and 355 boundary mapping large scale sheets and 31 4-inch sheets were traced and supplied to the Settlement Officers of Dera Ghazi Khan and Ambala. In Kangra 414 traverse stations were computed and plotted on 4-inch sheets. 1,187 plotted *masavis* of tikas, 102 enlarged boundary *masavis* and 18 traces of 18 4-inch sheets were supplied to the Settlement Officer, Kangra. 43·30 miles of road were surveyed in the Kangra district and 55 linear miles traversed. 29 sheets of the main road and 203 sheets of 20 bazars surveyed last year were plotted, typed and examined. The computation volumes of the Simla district were completed during the year. Traversing was undertaken for a 3-inch military survey close to Hatti in the Attock tahsil and 18 linear miles were traversed and theodolite stations thrown and their heights taken. The total expenditure was Rs. 91,060 as detailed below :—

	Rs.
Riverain Survey including Hatti traversing	77,947
Kangra District Survey	8,106
Simla Survey	1,326
Kangra Road Survey	3,681

A new survey party was formed on the 15th June 1917 for the purpose of undertaking the rectangulation of the Sind Sagar Doab in connection with the irrigation and colonization project for that area and was given a course of preliminary training preparatory to starting field work in the cold weather of 1917-18. During the winter of 1916-17 the Great Trigonometrical survey sent a detachment to run a series of secondary triangles through the Doab, emanating from the Great Indus Series, which flanks the western side oft he area. This series will act as a foundation on which to base the net-work triangulation now in progress. The latter work began at the end of October last after the close of the year under report.

Topographical survey operations were continued under No. 1 and No. 2 Parties, N. C., which surveyed an area of 1,679 squares miles, and 324 square miles respectively on the 1-inch scale in Gurdaspur, Hoshiarpur, Kangra and Gurgaon districts and in the Chamba, Nabha and Patiala States. No. 2 Party also triangulated an area of 125 square miles in the State of Patiala.

Boundaries.

15. The long standing boundary dispute between the villages of Nangal Mubarakpur in district Gurgaon and Lipala and Baloj in the Alwar State was amicably settled during the year. A partial re-demarcation of the Jammu boundary with Sialkot has yet to be carried out. The dispute between Mianwali and Bannu was settled without any alterations in Mianwali district boundary. A block of 93 acres of land was transferred from Lyallpur to Jhang in order to avoid the administrative inconvenience which was caused by the fact that the previous boundary line between these districts passed through the Shorkot Road Railway Station.

16. The accommodation in revenue record rooms is on the whole adequate. The shortness reported from Ambala and Kangra is due to new Settlement Records, and proposals for an addition are under consideration in the former, and an extra room has been already sanctioned for the latter district.

Revenue record rooms.

The work of the destruction of records is well in hand in most districts.

The new copying rules were brought into force with effect from 1st October 1917. There has been misappropriation of funds in the Gujranwala district, but it is not yet clear whether the Post Office or the Copying Agent is to blame. An enquiry has been set afoot.

In the Attock district considerable time of the District Kanungo and his Assistant is taken up in attending courts with revenue records, and the Deputy Commissioner recommends appointment of a separate official such as has been sanctioned for Jullundur, Hoshiarpur, Ferozepore and Mianwali when funds permit to lay the records, or a statement of the general effect of the entries in them, before the courts.

An essential feature of the scheme referred to above is that in some, perhaps in many instances, the courts will, in lieu of examining the original record of rights or attested copies of extracts from them, accept an excerpt or abstract prepared by an official, or take that official's oral evidence regarding the general effect of all relevant entries. There are certain obvious dangers in a system of this kind and the Financial Commissioners are consulting the Hon'ble Judges and suggesting certain methods of minimising these dangers.

17. Nearly 15 lakhs of land revenue were paid by money order and Rs. 1,68,793 by currency notes through the post. Of the latter amount Rs. 66,000 was sent in Gujranwala. Only in nine districts did revenue payers take advantage of this latter system of payment. This system will be under trial in the province until April, 1919, but so far the results show that it does not find much favour with lambardars. It is often difficult to get currency notes in villages and there is little difference between the cost of remitting revenue by money order and in currency notes which have to be registered and insured and may be lost in the post with considerable resulting inconvinence to the remitter. The Deputy Commissioner of Attock, has made the following observations which merit attention: "There is a possibility of sharp practice on the part of the remitter and of embezzlement on the part of the revenue official who handles the insured letter without their being detected. A lambardar puts a piece of paper in a cover and seals and insures it for Rs. 500. The revenue official opens the cover and finds that instead of Government currency notes for Rs. 500 it only contains a piece of paper. The Postal Department would not hold itself responsible as the seals were intact and the lambardar too may produce witnesses to prove that he put in Government currency notes. There may be other circumstances which may lead to the discovery of the fraud, but still it would be a difficult affair. On the other hand the lambardar may really send Government currency notes in an insured letter but the revenue official may embezzle the amount and allege that he found only a piece of paper. There would be similar difficulty in proving his guilt. Such instances may be rare, but the defect lies in the possibility of such frauds. The money order system is evidently the safest one for remission of revenue." The Deputy Commissioner of Dera Ghazi Khan says that the system is not popular as the revenue payers do not care to risk the loss of notes in the post office. Inconvenience is also sometimes experienced under the system in ways such as the following; the sub-treasurer has to go to the post office to receive the registered parcel of notes, in a number of cases *arz-irsals* are not sent with the remittance, mis-matched foreign circle and oiled notes not acceptable at the district treasury are sent and lastly odd amounts of less than Rs. 5 are sent in stamps or forwarded separately by money order. The system of paying land revenue by money order is appreciated only by those revenue payers who have small sums to pay and by those who live at a distance from tahsil head-quarters. The practice adopted in some districts under which the Revenue Accountant of the head-quarters' tahsil attends the

Other matters.

district treasury during the payment of revenue instalments continues to save time and trouble in the payment of revenue. The system in force in certain districts of fixed dates on a regular roster for payment of revenue for each village continues to work well. The Deputy Commissioner, Sialkot, remarks that the system is most advantageous if the convenience of the zaildars is consulted and apparently this is best consulted by allotting a few villages from each zail for each day and by giving as late a date as possible to those villages where collections are notoriously difficult. During the year powers were delegated to Tahsildars to decide the simpler forms of boundary cases.

Enhancement of rent. Statement No. XV.

18. The numbers of suits brought for enhancement of rent (1,421) and of successful suits of that class (1,267) have fallen by nearly a half as compared with last year's figures. Gujrat is again the chief contributor, but with a total of only 730 cases lodged against 1,280 last year. Most of the cases are as last year due to new assessments. In the Multan Division only one suit was brought. Hoshiarpur and Jullundur districts, though they show 161 and 84 cases, respectively, are considerably below last year's figures. The Deputy Commissioner of Hoshiarpur thinks that the number of cases in his district is due to bad feeling between landlords and tenants, but the Commissioner is of opinion that this is not so, the fact being that the tenants refuse to pay an enhancement asked for, and justified, by reason of the recent settlement. The Financial Commissioner agrees with the Commissioner. Rent enhancement cases have always been a normal feature in the revenue litigation of the district. There has been a marked increase in the number of cases brought in the Gurdaspur district, but no explanation for it has been given by the Deputy Commissioner. There were only 13 suits for reduction of rent. The Deputy Commissioner, Sialkot, sees no reason why suits for enhancement or reduction of rent should not be triable by an Assistant Collector, first grade. In this view the Financial Commissioner entirely concurs. In several districts it is noted that owing to the rise in the prices of grain and in the value of land and owing to new assessments cash rents show a tendency to rise.

Ejectment. Statement No. XVI.

19. There were 120 decrees for ejectment of occupancy tenants under section 39 of the Act. As in the previous year the largest number were in Hoshiarpur and Shahpur, there being 65 decrees in the former and 35 in the latter district, but there were only 5 cases of actual ejectment, all in Shahpur. The total number of ejectments of occupancy tenants actually made in the Province was 131 as against 96 last year. There has been an increase in the number of applications for service of notice of ejectment on tenants-at-will, and the ejectments of such tenants actually made rose from 4,881 to 6,592, the largest number of cases being in Hissar, Rohtak and Ferozepore. No very satisfactory reasons for the increase are put forward, and it is not possible to infer a definite tendency to permanent increase from the figures of one year. The Deputy Commissioner, Hissar, says that the preceding year being "one of unprecedented calamity" ejectments could not be brought about in that year on a large scale as fresh tenants could not offer enhanced rents, while the good prospects of an agricultural year like the one under review are, he thinks, sure to promote suits for ejectment by landlords. The Deputy Commissioners attribute the increase in ejectments in Rohtak and Gurgaon to the expectation of a good harvest and the consequent tendency of landlords to re-adjust their contracts with their tenants. The increase in Jullundur is stated to be due to ejectments from encroachments which came to light in the recent settlement revision of the records. No ejectments were made in Jhang, and the Deputy Commissioner thinks it probable that the efforts made to secure recruits for the army have placed tenants in a stronger position and rendered landlords less willing to proceed to extreme measures.

Descent of Jagirs Act.

20. No jagir was notified during the year under the Descent of Jagirs Act. The total number of Jagirs notified under the Act is 145.

Canals under departmental management.

21. The working of the Sirhind Canal in Ferozepore and Ludhiana, of the Western Jamna Canal in Karnal, Rohtak and Hissar, and of the Agra Canal in Gurgaon was quite satisfactory. In all these districts there was some decrease in the area sown with the help of canal water owing to good rainfall. The precarious character of the rainfall in Hissar occasionally subjects agricultural conditions to extreme vicissitudes and an extension of canal irrigation is highly desirable and will probably be feasible if the scheme for a masonry dam on the Sutlej at Bhakra materialises. There was a slight increase of irrigation from the Western Jamna Canal in Ambala owing to insufficient rainfall after the rabi crops were sown Irrigation from the Upper Bari Doab Canal was extended to 4 villages in the Lahore Tahsil and to 13 villages in the Chunian Tahsil and 6,454 acres returned as unirrigated in 1912-13 received canal irrigation. In Amritsar there was a slight increase in irrigation from this canal owing to some deficiency in the monsoon rainfall of 1916; the demand under head "occupiers' rates" has consequently risen by about 9·21 per cent. on the demand of the preceding year.

Progress was made in the development of the distributary system of the Upper Chenab Canal in the Daska, Pasrur and Raya Tahsils. Complaints of water-logging in these tahsils have not been frequent, but considerable damage is reported to have been caused by the banks of the canal heading up flood-water. The chakbandi system in force in the canal irrigated area is said to be a "constant source of friction and potential injustice." Complete information has now been sent to the canal officer of the fields in which irrigation is allowed, but unauthorised irrigation is frequent and the consequent imposition of penal rates is highly resented. Complaints are also made of errors in the assessment of water-rates. The Financial Commissioners propose shortly to hold a conference of Irrigation and Revenue Officers to decide whether modifications should be made in the zone rules by reason of the conclusions now reached in regard to water-logging and also whether the rules regarding irrigation in well areas should be modified. The restrictions on irrigation in well zones, though perhaps right in principle, are cumbrous and vexatious and may need modification in detail. There was an increase of 16 per cent. in the canal irrigated area in Gujranwala, owing to the extended irrigation from the Upper Chenab Canal. In tahsils Hafizabad and Wazirabad, where a large area has been spoiled by water-logging from the Lower Chenab Canal, the opening and deepening of natural drainages have proved useful and have greatly checked further damage. These new drains saved the Lower Chenab Canal area from what might have been a great disaster owing to the excessive rains of August. The whole question of water-logging was discussed at a conference held in Lahore in April last and attended by the Inspector-General of Irrigation, the Financial Commissioners, the Chief Engineers, Irrigation Branch, the Director of Agriculture and a number of other officers of the Irrigation and Agricultural Departments, and the recommendations of this conference are now before Government. One hundred and ninety-six villages of the Gujrat District were irrigated during the year by the Upper and Lower Jhelum Canals. For the first time the Lower Chenab Canal was merged in a group with the Upper Chenab, Upper Jhelum, Lower Jhelum and Lower Bari Doab Canals for the purpose of distributing the combined supply available in the Jhelum and Chenab rivers. The actual distribution was determined and worked out without consultation with the revenue authorities, and the Deputy Commissioner of Lyallpur reports that it did not prove a success in that district; owing mainly it would appear to the absence of rain in the winter. The Financial Commissioners hope that arrangements will be made for the attendance of Revenue and Agricultural officers at any future annual meeting which may be called to consider the principles of distribution. Owing to the opening of the Upper Jhelum Canal for rabi irrigation and the unprecedentedly low river, the Lower Jhelum Canal flowed with a very restricted supply of water during the rabi harvest, with the result of a decrease in irrigation and consequently a decrease of Rs. 1,04,706 in the land revenue demand for rabi 1917 as compared with that for rabi 1916. For the first time rotational closures

were introduced on all branches, and, as the canal staff were unable to give any information beforehand as to the probable dates of closures, considerable discontent and confusion resulted. This defect has since been remedied. The completion of the Shahpur Branch was finally dropped owing to the opposition of the private canal owners. The working of the Lower Bari Doab Canal has been noticed in the Colony Report.

The supply of water in the Shahpur Inundation Canals was sufficient. The Upper and Lower Sutlej Inundation Canals worked better during the year under report than in the preceding year, the supply in the latter being excellent during the second half of the season. The Sidhnai series of canals opened late and the supply was much interrupted by frequent floods which necessitated closures in order to prevent siltage. For rabi sowings the supply was fairly good. Financial results for the year under report were not so satisfactory as in the previous year owing to a reduction in the area under cotton and indigo due to the late arrival of water in the hot weather, but the total area irrigated exceeded the figures of last year 1915-16 by about 28,000 acres. The Chenab Inundation Canals worked better than last year and did fairly well on the whole, though some of them closed rather prematurely. All the Inundation Canals in Multan were affected by the late rising of the rivers, but once the canals began to flow the supply of water was copious. The Inundation Canals in Muzaffargarh District worked very successfully. The area matured by canal water in the kharif on all canals was the largest for 10 years. The area both sown and matured in rabi was also a record. The effect of closing the Magassan and Maggi Canals on 15th October has been found to be beneficial to all tracts except the Thal as it prevents water-logging. The question of a drainage scheme for the whole district is under investigation but so far no suitable scheme has been devised and it is doubtful if any scheme will be practicable. In the meanwhile steady progress is being made with the clearing and enlarging of local drains, thus affording relief to certain localities. In Dera Ghazi Khan the supply of water in the inundation canals is stated to have been sufficient during the year under report. Income from owners' and occupiers' rates amounted to Rs. 2,93,750, an increase of Rs. 49,000 on the figures for the previous year. Floods in the hill torrents were satisfactory and irrigated a large area.

During the year under report nearly nine million acres were irrigated in the Province by Imperial and Provincial Canals, of which over 8½ million acres were matured, a record result due partly to good monsoon rainfall which helped to swell the sown area ultimately brought under irrigation, and partly to expansion of irrigation from the Triple Canal system; though low winter supplies in the rivers constituted an opposing factor. The Punjab thus continues to more than maintain its leading position among the canal irrigated tracts of the world.

Canals under district management.

22. In Hissar, the only canal scheduled under the Punjab Minor Canals Act, the Rangoi Canal in the Fatehabad Tahsil, receives its water from the Ghaggar; the bed of the Ghaggar however is reported to have become much deepened by erosion with the result that no water can flow into the Rangoi until the flood in the Ghaggar attains a height of about 10 feet. The area irrigated during the year was less than 5,000 acres. All bands in Gurgaon worked satisfactorily during the year and the income has gone up to Rs. 6,808, as compared with Rs. 2,229 in the preceding year. Certain improvements and repairs are required to the bands owing to the damage done by the heavy rains of last monsoon. These have not yet been carried out on account of lack of funds, but action is now being taken by the Deputy Commissioner to apply for a special grant from Government. The Sarsuti Canal in the Karnal District ran well this year and irrigated 32,569 acres against 21,303 last year. The drainage of the Naili tract in the Guhla sub-tahsil demands attention. The Commissioner has asked the Deputy Commissioner to submit proposals. There were no disputes among the co-sharers of the Kangra *kuhls* during the year as there was ample rainfall. There was an increase of 1,700 acres in the area

irrigated by the Shah Nahr Canal in Hoshiarpur which was due to extensive sowing following on early rainfall. The expenditure incurred during the year amounted to Rs. 37,700 and income to Rs. 68,000. The management of the Grey Canals in Ferozepore, according to the scheme which was introduced in the previous year, has worked well. Khush-haisiati (water-advantage) rate payable to Government amounted to Rs. 64,229, an increase of Rs. 3,373.

The Namal Lake in Mianwali had a plentiful supply throughout the year. It did ample irrigation in kharif 1916 and was yielding its normal supply to the canal throughout the rabi in spite of the scanty rainfall in the winter of 1916. The working of the Inundation Canals from the Indus in the same district was successful. The flooded and matured area irrigated from the Kitchin-Irving Canals in Montgomery rose from 9,171 and 4,189 acres to 25,893 and 15,241 acres, respectively, as compared with the corresponding figures for the preceding year. The working of the Mehdi Khan Canal was not satisfactory owing to a change in the course of the river near its head. The flooded and matured areas were only 3,573 and 2,600 acres as against 4,693 and 3,145 acres, respectively, in the preceding year. The management of these two canals was transferred from the District Board to the Deputy Commissioner. Proposals for the enhancement of the present water-rate of Re. 1 per acre which has been found inadequate to meet the expenditure on repairs and maintenance were recently approved by Government, and the enhanced schedule of rates is to come into force from kharif 1918. This schedule will be subject to reconsideration in connection with the reassessment of the Sutlej Tahsils, of the Montgomery District or after five years, whichever is earlier. The Jamlera, Bahliwala, Arjan and Umeda Lakhoka Bands were brought under Schedule I of the Punjab Minor Canals Act during the year. The other small irrigation cuts and bands in this district worked satisfactorily.

Land Acquisition Act.

23. Four thousand one hundred and seventy acres were acquired for public purposes for Rs. 4,10,794. The average price per acre comes to Rs. 99 as compared with Rs. 97 last year. Out of this 20 acres were acquired for roads at an average price of Rs. 865; 3356 for canals at Rs. 74 and 574 for railways at Rs. 99 per acre. Of the 574 acres for railways 424½ were acquired by the special officers of the North-Western Railway mainly for the Timber Depôt at the Head Works of the Upper Chenab Canal at Marala in the Sialkot District at an average price of Rs. 107 per acre. The average of the compensation paid for land acquired for roads is high on account of an award of Rs. 11,848 for 1½ acres at Sialkot.

Taccavi loans under the Land Improvement Loans Act (XIX of 1883).
Statements Nos. XVII, XIX, XX, XXI and XXII.

24. The same amount was advanced for improvements as last year, *viz.*, 1·4 lakhs. Advances were mainly made in the districts of Gurgaon, Jullundur, Mianwali and Multan. Tahsildars in Gurgaon received instructions to encourage the sinking of wells and to make loans under the Act generally more popular, and as a result advances rose from Rs. 8,150 to Rs. 24,110. In the province as a whole 3,735 new wells were sunk without advances, 369 more than last year, while the number sunk with the aid of advances has decreased from 394 to 289. The Financial Commissioners during the year called for the opinions of Commissioners as to the reasons for the decrease in the demand for these loans at the same time inviting their suggestions for making them more popular and they are now considering the opinions and suggestions received. Remissions of land revenue were given for 699 wells fallen out of use and protective certificates for 2,449 new wells. The realizations on account of principal of outstanding loans were 2·37 lakhs leaving Rs. 10,448 arrears. Collections of interest were Rs. 89,720 and the corresponding arrears Rs. 4,877. Arrears both of principal and interest were less than last year. The interest collected represented Rs. 6-8-2 per cent. of the mean balance outstanding. The average percentage for the last 10 years has been Rs. 4-14-1. The provincial gain on the year's working was Rs. 39,509.

Loans under the Agriculturists' Loans Act (XII of 1884).
Statements Nos. XVIII, XX, XXI and XXII.

25. The amount advanced under the Agriculturists Loans Act fell from 8 to 1·5 lakhs. The advances were mainly given in the districts of Gurgaon, Attock, Mianwali, Montgomery, Muzaffargarh and Dera Ghazi Khan. No advances at all were made in 9 districts. The decrease is due to no falling off in the popularity of the system. Agricultural conditions were favourable and the season was remarkably free from the calamities that affect the agriculturist and cause him to require financial help to purchase bullocks or seed In Gujrat Rs. 2,458 were advanced during the year for the purchase of bullocks and for the erection of huts to the zamindars of Fatehpur village which was damaged by floods. The amounts advanced under the Act are generally spent for the purposes for which they are given, but the Deputy Commissioner, Shahpur, notes that the tahsil officers do not as a rule, see that loans for the purchase of bullocks are properly applied. The Deputy Commissioner, Muzaffargarh, suggests that to ensure that aid given under the Act is not misapplied no cash advances should be made, but that seed and cattle should be provided by the authorities The Commissioner of Multan thinks that this is impracticable until Co-operative Credit Societies are in a position to act as Government's agents in this matter The Deputy Commissioner, Sialkot, thinks that under proper supervision advances might properly be made at the time of the various cattle fairs. The balance outstanding at the end of the year fell from 8·3 to 3·7 lakhs. There has been a decrease of arrears on account of principal from Rs. 90,000 to Rs. 24,441. Arrears of interest amount to only Rs. 1,428. The interest realized amounted to Rs. 5-13-6 per cent. on the mean balance, and there was a provincial gain of Rs. 10,315 on the year's working. The average rate of interest received on the mean balances for the past 10 years is Rs. 6-0-6.

Forest Act and Government lands.
Statement No. XXIII.

26. The investigation into the areas in Kangra on which all trees of spontaneous growth belong to Government has been proceeding rapidly, and final orders had been passed for the whole of Nurpur, more than half of Kangra, and almost the whole of Palampur and Dehra tahsils by the close of the year. In a speech delivered at a Darbar held at Kangra in October 1916, the Lieutenant-Governor enunciated the general policy of Government in regard to the Kangra forests. On that occasion Sir Michael O'Dwyer stated that that policy was to maintain a reasonable proportion of the forests for the use of future generations, and that to secure this it was necessary in the areas selected for conservation to arrest the denudation which is now taking place and which not only prevents any new forest growth from springing up but in many places threatens the safety of cultivation. These areas would be closed on a system of rotations. In the remaining areas the administration of the Forest Department would as far as possible be removed and they would be transferred to the district authorities to be managed as unclassed forests in co-operation with the people, as has already been done in part of the Nurpur tahsil. His Honour further emphasized the fact that the object of Government was not to derive income from the forests, but solely to put at the disposal of the people all forest areas which it was not essential to protect and to protect efficiently, subject to reasonable use (*bartan*) by the people, the remaining areas in the best interests of the people and of their descendants. The work of selecting the areas in which effective protection should be retained and regeneration secured and the delimitation of these areas into blocks for rotational closure has been carried on during the year by Mr. Mitchell, Assistant Commissioner, on special duty, and Mr. Walter, Deputy Conservator of Forests, and it is reported that owing to the carefulness and soundness of their methods the people have generally accepted their proposals without protest and are beginning to appreciate the object of their operations. Work has been completed in Nurpur and has been begun in the Kangra and Hamirpur tahsils. The forest area of 8 villages was transferred from the Forest to the Civil Department during the year. Four new *trihais* were formed with the consent of the rightholders and the total

number of *trihais* in charge of the Civil Department is now 36 and good regeneration is reported to have taken place in many of them. The claims of the tea-planters of the Kangra valley to trees growing on their estates and on waste lands attached thereto have been settled by Government in a liberal and practical spirit during the year under report. There were 43 cases under the Forest rules in the district during the year: in 42 of these compensation was taken while in the remaining case the accused was judicially tried and sentenced to fine. The management of the district forests in Montgomery is reported to be satisfactory. The area of unclassed forest and Government waste land in charge of the Deputy Commissioner has decreased from 1,175,007 to 1,088,839 acres as the result of allotments to new colonists consequent on the extension of irrigation from the Lower Bari Doab Canal. Temporary cultivalion (*kasht barani*) has increased from 40,596 to 89,583 acres owing to good rainfall. The tirni demand for the year was Rs. 28,201. The forest establishment of the Ravi tahsils was brought under reduction from 1st August 1917. Government has notified the reservation of 11,680 acres of forest land for an irrigated plantation at Chichawatni in the Montgomery district, and an area of 17,549 acres in different reserved forests in the Rawalpindi and Jhelum Forest Divisions has been proposed to be set aside for the browsing of Silladar Camel Corps on the line of march. This scheme has been accepted by the Military authorities and is now under the consideration of Government. Areas of 375½ acres in Montgomery tahsil and of 0·84 acres in Gugera tahsil were declared reserves for the same purpose. The details of the scheme approved by Government in letter No. 483-(Revenue), dated 19th July 1915, for the browsing of the 53rd Camel Corps in the Shahpur district are still under consideration. The management of the Shahpur Kandi forests is stated to be satisfactory. Less damage was done by fires than in the previous year. Resin and tapping operations continue to be profitable. Income from the forests during the year amounted to Rs. 2,217 against an expenditure of Rs. 3,044, but the excess in expenditure is due to resin and crimson powder (kamila) not having been sold before the close of the year. Rakh Shah Kuli, an unclassed forest, in Gujrat was disforested and transferred to the Upper Jhelum Canal Colony during the year. The improvement of Guzara forests of the Murree and Kahuta hills continued to engage the attention of the local officers. The appointment of a Guzara development officer did not prove a success. No fires whether accidental or intentional broke out in these forests during the year. As regards the absence of intentional fires the Commissioner remarks that it cannot yet be estimated how far this result is due to a season of abnormal rainfall and how far to the removal of incentives to firing by the liberal policy of Government in opening reserved forests to free grazing. Of the 40,000 acres of waste land in the Thal rakhs of the Mianwali district held by Government to be available for temporary cultivation nearly 10,000 acres have been given out on lease.

In order to extend the cultivation of wheat and other food crops and so increase their exportable surplus for the province all restrictions contained in rules II, III and IV (first sentence) on page 368 of the Land Administration Manual for the leasing of Government waste lands whether likely to be irrigated by a canal or not were relaxed towards the close of the year. Collectors were authorised to give out for cultivation of food crops only, on leases for periods not exceeding 2 years from and including Rabi, 1918, all such lands under their control, with the exception of the Lower Bari Doab Colony lands in Montgomery and Multan for which the Colonization Officer was directed to make arrangements under the canal rules. The rents prescribed were the ordinary land revenue rates, free of malikana, for similar land in the neighbourhood subject to a minimum of Re. 1 per acre and in addition to authorized water rates for canal irrigation. The development of the dairy farm near Lahore for which land was leased to the Hon'ble Rai Bahadur Lala Ram Saran Das and others has been somewhat hindered by unexpected difficulties. The jungle has, however, almost all been cleared and the land levelled and partly cultivated. The sinking of a 10″ tube well has now been completed and

an engine and pumps installed at a cost of over Rs. 10,000. Buildings for the staff have been started, the purchase of cattle is in hand and a capable manager has been engaged.

Punjab Land Preservation (Chos) Act.

27. The financial situation has prevented any progress being made in the notification of areas in Ambala and Hoshiarpur under sections 4 and 5 of the Chos Act. The efforts at re-afforestation in the Ambala District are showing definite and satisfactory results. A great deal of *Sanata Kabuli-Kikar* and *Shisham* seed has been sown in the Siwaliks and it has grown fairly well. In addition *Sarkanda* has been planted to a considerable extent in and along several chos in Ambala District. Paper mulberry has been recently sown at Mirzapur. Sixteen cases were instituted in this district under the Chos Act, of which 7 ended in conviction, 8 in acquittal and one is still pending. A sum of Rs. 12,428 was provided for expenditure during the year on account of the compensation for the stoppage of grazing of camels in Hoshiarpur, but was not spent as the case required further inquiry. The work of planting and sowing has been carried on strenuously in the hills but very little has been done in the matter of cho reclamation in the plains. The rotational closure of grazing areas in the former is stated to have diminished the amount of sand brought down by heavy rains. One large village, on the initiative of an enlightened proprietor, voluntarily closed a large tract of common land in the hills and found the experiment economically advantageous. This is an encouraging example which it is hoped will be widely followed. The results obtained in both districts by the restrictions imposed under the Chos Act appear to the Financial Commissioner to be decidedly encouraging and indicate clearly that operations under that Act should be prosecuted diligently and developed when financial conditions improve. It is also very desirable that the Deputy Commissioner should be in a position to give moderate and reasonable financial assistance under proper precautions to individuals and village communities who are really willing to undertake systematic and judicious measures for the reclamation and training of cho beds in the plains, this assistance taking the form of small grants-in-aid which should, of course, always be less than the full anticipated cost of the works, as it is most important that the matter of self-help should be duly emphasised. The assistance thus afforded is valuable not merely for the tangible results obtained, but also by way of encouragement and as a definite indication that Government is interested in a practical shape. Grants of Rs. 1,000 each to the Deputy Commissioners of Hoshiarpur and Ambala for reclamation and training of cho beds have accordingly been made during the current financial year and Rs. 3,000 has been entered in next year's budget for the same purpose.

General Statement of owned and mortgaged area, Statement III.

28. The total area of the Province as entered in Statement 6 of the village note books stands at 547 million acres. Of this a little over 34 million acres are owned by agricultural tribes, 5½ million acres by others and 15 million acres are divided between common lands, village sites and Government property. There has been an increase as compared with the figures recorded in the same statement in the previous year of 64,000 acres in the gross and one of 294,727 acres in the cultivated area. The increase in the total area is mainly due to remeasurements at quadrennial attestations and settlements. The increase in the cultivated area is mainly due to the cultivation of land given up by the Railway in the Hissar district to the original owners from whom it had been acquired, to the breaking up of waste land owing to favourable rainfall in Hissar, Karnal, Lahore and Mianwali and to extension of irrigation in Sialkot, Gujranwala and Montgomery. The cultivated area under mortgage has again slightly increased, but the percentage of this to the total cultivated area is the same as in the previous year, 11·5.

Transfers.

Statements XXIV—XXVII.

29. The cultivated (ownership) area sold during the year was 107,227 acres or only 428 acres more than in the previous year when the figures were the lowest for 20 years. Sales of uncultivated land fell from 126,700 acres (ownership) to 112,314 acres. Nearly half of this latter area was

in the Muzaffargarh district and the purchases in that district were probably mainly due as in the previous year to the anticipation of the construction of the Sind-Sagar Canal. The total cultivated (ownership) area redeemed during the year amounted to 187,400 acres, or 23,000 acres less than in the previous year. The reduction noticed in last year's report has thus continued. No very definite general reasons for the result can be gathered from the district reports, but doubtless it is partly, at any rate, attributable to war conditions in their economic aspect. The Financial Commissioners propose to investigate the matter further. Although redemptions have thus decreased, the Redemption of Mortgages Act appears to be slowly gaining in popularity and 2,932 cases against 2,708 in the previous year were disposed of under it. The Deputy Commissioner of Jullundur states that the majority of the applications under this Act were by second mortgagees or vendees to redeem the prior mortgage and the real object of the Act was often not achieved. The Deputy Commissioner of Sialkot says that the terms of mortgages in favour of non-agriculturists are generally severe and owing to the intricacies introduced into the mortgage-deeds redemption can often not be obtained by the simple means provided by this Act and resort must be made to a civil court. The cultivated (ownership) area mortgagad during the year was 219,712 acres or 7,684 acres less than in the previous year, but some 32,000 acres more than that redeemed during the year. The area transferred by gifts has advanced slightly from 79,600 acres last year to 86,000 acres this year. The Deputy Commissioner, Shahpur, thinks that the increase in his district is probably due to the cloaking of sales in the form of gifts to avoid claims for pre-emption. The area transferred by exchanges was 43,000 acres against 46,000 acres last year. The exchanges were chiefly due to consolidation of holdings and to killabandi operations. The former is a matter of great agricultural importance, and it is desirable that it should receive all possible encouragement. From the point of view of the importance of consolidating holdings, the Deputy Commissioner, Sialkot, thinks that the intricacy of the records in his district and the prevalence of unrecorded private partitions constitute a serious bar to free exchange.

Value of land.
Statement XXVI.

30. As pointed out in the preceding year's report recorded figures do not give a satisfactory guide to the real selling price of land. The average recorded price of cultivated land has risen from Rs. 216 to Rs. 227 per acre, and there is no doubt that the value of land is steadily rising. The rise is almost general throughout the Province and is mainly due to the general rise in the prices of agricultural commodities and in a probably smaller but still highly important degree to the popularity with the agricultural tribes of land as an investment. The Deputy Commissioner of Ferozepore thinks that it is also due to the diversion of capital to the purchase of land, confidence in other investments being shaken owing to failure of banks and loss of commercial credit. Forty-five acres of land in the Chunian Colony were sold at Rs. 241 per acre. The average price per acre realized at the auction sales of land on the Lower Bari Doab Canal during the year was Rs. 229 against Rs. 179 in the previous year. For the province as a whole the sale prices in the year under review represent 157 years' purchase of the land revenue assessed as against 151 years' purchase in the previous year. The mortgage value of the land mortgaged during the year was 283·03 against 293·04 lakhs in the previous year and represents 85 times the land revenue assessment of the land. In the previous year the mortgage value was 88 times the land revenue assessment. The average mortgage money per acre was Rs. 106 against Rs. 104 in the previous year.

Land Alienation Act.
Statement No. XXV.

31. No new tribe was notified under the Land Alienation Act during the year. Agricultural tribes gained by purchase a net increase of nearly 21,000 acres, against 20,000 in the previous year. The net decrease by mortgage and redemption was 45,000 acres as compared with 26,000 acres in the previous year, 1915-16. As already noticed in paragraph 29 the area redeemed by agricultural tribes was substantially less and this accounts for the above decrease. Sales by agricultural tribesmen fell from 206,529

acres to 182,718 acres and sales to them fell from 226,226 acres to 203,451 acres, while sales to others fell from 42,700 to 38,000 acres, the smallest figure for any year since the passing of the Act. The provisions of the Act are now well understood by the people. Few difficulties were experienced in its working and only one or two Deputy Commissioners state that it has thrown extra work on the district staff. A number of cases of evasion, mainly benami transactions, as usual came to light during the year. Mutation of such transactions is refused if the real facts are discovered, though they sometimes escape detection. No new forms of evasion calculated to materially hamper the working of the Act or the policy underlying it have been reported. The measure continues to command the increasing confidence and approval of the peasantry of the province. The Financial Commissioners have no hestitation in thinking that in areas which were in the past permeated with agricultural indebtedness it is regarded as having largely achieved its object.

Business Returns.
Statements Nos. XXVIII and XXIX.

32. There was a decrease in the total volume of work but a slight increase in the number of pending cases. The decrease was under all heads except under 'Revenue Officers' cases under the Tenancy Act' and the Redemption of Mortgages Act in which slight increases occurred. The largest decreases took place in Jullundur and Gujrat and were due to the termination of settlement operations in those districts. The Deputy Commissioner of Hoshiarpur remarks that a good deal of extra work has been caused by the number of petitions received from soldiers from the front. Two thousand one hundred and ninety-five petitions of this kind were received in the Hoshiarpur district during the year. The district staff has spent much time and taken special trouble in settling, or endeavouring to settle, difficult cases and the Deputy Commissioner thinks that soldiers on service have nothing to complain of in the way their petitions have been dealt with. There was a decrease in decided cases of 173 in Revenue Judicial appeals in the Courts of Commissioners and the Financial Commissioners and the pending file shows an increase of 86 cases. Two thousand nine hundred and thirty-eight Revenue executive appeals were decided and 463 cases were pending at the close of the year or 32 cases less than in the previous year. The Revenue case work of the Province has been disposed of in a satisfactory manner during the year in spite of the great strain thrown on Revenue Officers of all grades by much extra work entailed by the War.

Tours of Commissioners.

33. The following returns of touring done by Commissioners refer to the year ending 31st March 1917 :—

Ambala.—The Hon'ble Mr. C. H. Atkins, I.C.S., was Commissioner throughout the year and remained 120 days on tour.

Jullundur.—Mr. W. C. Renouf, I.C.S., was Commissioner for 37 days and did no touring. Mr. C. J. Hallifax, I.C.S., was Commissioner for 328 days, of which he spent 130 days on tour.

Lahore.—Mr. H. A. Casson, C.S.I., was Commissioner throughout the year, spending 98 days on tour.

Rawalpindi.—Lieutenant-Colonel F. Popham Young, C.I.E., I.A., was Commissioner for 309 days, remaining 73 days on tour.

Lieutenant-Colonel P. S. M. Burlton, I.A., was Commissioner for 42 days, of which he spent 6 days on tour. The Deputy Commissioner of Rawalpindi held charge for 14 days in addition to his own duties.

Multan.—Lieutenant-Colonel C. Powney Thompson, I.A., was Commissioner throughout the year and remained 110 days on tour.

Extracts from District Reports.

LYALLPUR.

There are many points of interest in the Revenue administration of the Lyallpur District which cannot be considered conveniently under any of the prescribed heads of the Revenue Report, but which are worthy of mention.

Mutations.—The mutation disposals of the last three years are of especial interest—

	Building sites.	*Land.*	*Total.*
1914-15 ...	30,388	9,752	40,140
1915-16 ...	18,149	7,115	25,264
1916-17 ...	5,281	5,908	11,189

The reduction in the land mutations is due in the main to the decrease in the area in which proprietary rights have been and can be acquired. There is a further reason that the entry of unnecessary mutations is discouraged.

The reduction in the number of mutations concerned with village sites is the direct result of the new orders by which changes of possessions are not recorded in mutation orders of village sites any more than they are recorded in mutation orders of agricultural land. The new orders only operated during part of the year 1915-16 and during the whole of the year 1916-17. This immense reduction in the mutation work has proved an enormous relief to the Revenue establishment. The new orders are working very well and as the result of constant enquiries and inspections I have still left them unaltered. As I stated last year, there is nothing new about them, but the provisions of Financial Commissioners' standing Order No. 23 are now being observed.

Temporary cultivation.—The success of the arrangements made in this district for the extension of area under food crops will belong more properly to the next year, but it may be of interest to describe briefly how the charagah lands were thrown open to cultivation and with what success. As soon as the orders of the Government of India were received, I called a mass meeting of lambardars and zamindars at Lyallpur on 10th August. Meanwhile I approached the Canal Officers whose co-operation was prompt and most effective. We agreed that no temporary outlets would be given, that existing distribution arrangements should be left unaltered, and that an increase of canal irrigation in excess of 10 per cent. on each outlet should not be allowed; also that no one except existing shareholders on outlets should be allowed to participate. On the other hand, I made no attempt to mix up extension of cultivation with recruiting or crime or war loan or any other object. The method of distribution excluded at once all large owners for the peasant villages only have any charagah. Moreover all Government land was excluded which could not be irrigated from existing outlets. I explained the intention of Government to a mass meeting of zamindars containing many thousands of irrigators, and exhorted them to distribute the land by consent, offering assistance only when they quarrelled, in case of dispute distribution to be by lot. "A file for each village was prepared by the patwari and each village was attested on the spot by the Tahsildars or Naib Tahsildars. The work has since been checked by me personally. We found it necessary to exclude from distribution vacant land adjoining the village sites, except when the people agreed to their division which was seldom the case. The net result of the distribution up to 15th October is as follows:—

Tahsil.	Area allotted in acres. *Nahri.*	*Barani.*	*Total.*
Lyallpur	13,542	13,323	26,865
Toba Tek Singh	9,784	5,446	15,230
Samundri	9,481	5,042	14,523
Jaranwala, Lower Chenab ...	5,608	1,586	7,194
Jaranwala, Upper Chenab ...	595	28	623
Total for the District ...	39,010	25,425	64,435

This is most satisfactory.
POWNEY THOMPSON,
Commissioner.

Allotments are not entirely finished. Most of the land allotted has already been broken up and ploughed; except in the Lyallpur tahsil, disputes

were rare. Generally the people did their own distribution. In the Lyallpur tahsil where the land is valuable and water abundant, disputes were almost general and distribution was generally made by lot. Some of the patwaris and kanungos displayed the avarice of their kind, but generally there was not much trouble. The results in tons of food grains has yet to be seen, but prospects are very good.

Crop forecasts.—In a district of the agricultural importance of Lyallpur correct crop estimates and forecasts are of supreme importance. I have been trying to improve them by getting estimates of sowings from patwaris. The result has not been satisfactory, owing to carelessness in the patwari and kanungo staff, but it is abundantly clear that accurate returns can be obtained and that pressure brought to bear on patwaris will be successful in achieving this object. Under my orders a census of all the wheat on all threshing floors throughout the Lyallpur tahsil was held in June 1917. The result was most encouraging and undoubtedly approximated closely to accuracy.

Village sites.—A reference has been made recently to Government on the subject of the sale of village sites and orders are awaited. The original sites allotted to the original colonists were bought at the same nominal rate at which they acquired proprietary rights in agricultural holdings. The demand for additional sites still continues and always will continue as families multiply and holdings are divided. There is *primâ facie* reason why such additional allotments should not be made at market value, but it would be impossible to report all such cases for the orders of any supervising authority.

This case has only recently gone on to the Financial Commissioner.
POWNEY THOMPSON,
Commissioner.

SERVICE GRANTS.

Grantee Camel Corps.—The administration of the Grantee Camel Corps has been full of difficulty. There are four complete corps. The 59th and 62nd Corps were mobilised last year and sent to Egypt. After about a year the sarwans returned. Most of the camels had died in Egypt and those which survived were bought by the Egyptian Government. Neither compensation nor pay was distributed until many months after it was due, but it has been paid now, the rate of compensation for camels being ultimately disbursed at the maximum rate of Rs. 150 per camel. These two corps have since been re-raised and the numbers are now almost complete. The 61st Grantee Corps went on service to Seistan two years ago, and is still on service. The 60th was mobilised in May 1917 for service with the Waziristan Field Force and is still away. The grantees have on the whole done well, but they have not failed to give a good deal of trouble. The total number of camels registered for replacements in the year ending 31st September 1916 is as follows :—

A

59th	874
60th	322
61st	132
62nd	932
Total ...	2,260

It is remarkable that the grantees were able to buy so many camels, for the price of camels (from Rs. 150 to Rs. 200) continues to rise and camel purchasing officers were buying camels all over the Province without limit of numbers throughout the year. *Surra* continues to rage among the camels. Compensation is now paid for embodied camels dying or destroyed for *surra*, but no compensation is given for unembodied camels cast for this disease nor can they be destroyed. There are at present 61 cases of *surra* in unembodied corps. A very large percentage of the camels of the country are suffering from *surra* and nothing is being done to check its ravages which increases with every infected camel discharged from Government service.

A

I am sending an extract A—A to the Revenue Secretary to Government, Punjab, for information, as I consider the facts reported by Mr. Kitchin indicate a very serious state of affairs which appears to me to necessitate action by the Military and Civil Veterinary authorities.
POWNEY THOMPSON,
Commissioner.

Mule breeding grants.—All lambardars of peasant grantees villages hold a square of land on mule breeding conditions. To this general rule there are a few exceptions. Some lambardars were appointed before mule breeding became a condition of the lambardari square, and their successors will be bound. Some recent lambardars were appointed too late to receive lambardari squares. The mule breeding conditions are enforced rigidly and with marked success. Considerably more than a third of the lambardars holding bound squares sold young mules to Government in the year under report. Generally mule breeding continues to increase in the district, but other purchasers are competing with Government for the stock of unbound mares, so that the number of mules bought for Government is decreasing. Horse breeding is going down in popularity and the number of branded mares decreases steadily. It seems to be generally agreed that horse breeding is a matter of personal interest for the well-to-do. Subdivision of property and sale by large owners is always diminishing the number of the well-to-do who take interest in owning, keeping and breeding good horses.

POWNEY THOMPSON,
Commissioner.
30*th November* 1917.

A. J. W. KITCHIN,
Deputy Commissioner, Lyallpur.
29*th October* 1917.

STATEMENTS.

No.

I.—Analysis of chief statistics.

II.—Cultivating occupancy of land.

III.—Owned and mortgaged area.

IV.—Incidence of revenue.

V.—Fixed land revenue (including service commutation), demand, collections and balances.

VI.—Amount of land revenue held under suspension.

VII.—Alterations in the fixed land revenue demand.

VIII.—Collections and balances of fluctuating and other land revenue.

IX.—Alluvion, diluvion and destructive inundation.

X.—Land revenue assignments.

XI.—Coercive processes for collection of land revenue.

XII.—Progress made in re-measurement and attestation.

XIII.—Progress made in re-assessment.

XIV.—Duration and cost of settlement operations.

XV.—Enhancement or reduction of cash rents.

XVI.—Ejectment proceedings under the Tenancy Act.

XVII.—Disbursements, collections and outstandings on account of Act XIX of 1883.

XVIII.— Ditto ditto ditto Act XII of 1884.

XIX.—Remission orders and certificates of exemption.

XX.—Account of Local Government with agriculturist borrowers.

XXI.—Loans made under the Land Improvement and Agriculturists' Loans Acts.

XXII.—Result of loan operations to Local Government.

XXIII.—Area and income of unclassed forests and of other Government lands.

XXIV.—Sales, mortgages, redemptions and other transfers.

XXV.—Abstract of mortgages, sales and redemptions.

XXVI.—Sales of land.

XXVII.—Mortgages of land.

XXVIII.—Work done by Revenue Officers.

XXIX.—Appellate and revisional work of Commissioners and Financial Commissioners.

Proceedings of His Honour the Lieutenant-Governor of the Punjab in the Department of Revenue and Agriculture—(Revenue), No. 9363, dated 5th April 1919.

READ—

The Annual Report on the Land Revenue Administration of the Punjab for the year ending 30th September 1918, forwarded with letter No. 491—53-I-3, dated 26th February 1919, from the Senior Secretary to the Financial Commissioners, Punjab.

REMARKS.—The agricultural conditions of the year ending with the Rabi harvest of 1918 were on the whole favourable for the cultivator. The monsoon rains were abundant but in many places excessive, and the sown area in both harvests exceeded the normal, in the kharif by five per cent. and by no less than twenty-five per cent. in the rabi. Over much of the province and especially in the Gurgaon district, damage was done to the kharif crops by floods, and excessive rain at the end of October reduced the outturn of cotton and most food grains and made timely sowings for the rabi difficult. There was a partial failure of the winter rains. The failed area in both harvests fell little short of the normal and amounted to 19 per cent. in the kharif and 11 per cent. in the rabi. It is noteworthy that the sown area of unirrigated land showed an increase of 37 per cent. on the normal. The total matured area for the year was 28,253,017 acres—20 per cent. above the normal of 23,784,946 acres. To this result not only climatic conditions but also special efforts made to stimulate the production of food grains, by the grant of temporary leases of crown waste, etc., contributed. The agriculturist benefited not only by increased production but by a rise in the average price of wheat from Rs. 3-10-0 to Rs. 3-15-0 a maund, while the average price of cotton rose from Rs. 8-10-0 to Rs. 12-1-0 a maund.

2. The fixed land revenue demand rose from 231·52 to 235·07 lakhs, mainly owing to progressive assessments. Of this sum, 98·4 per cent. was collected. The sum outstanding at the close of the year, apart from that remaining under suspension or written off as irrecoverable, was Rs. 18,000 as against Rs. 8,000 in the two previous years. The amount of revenue suspended during the year was swollen by the Gurgaon figure, where owing to the destructive floods in addition to a remission of Rs. 19,000 suspension of 1·75 lakhs was found necessary. Another half lakh was suspended in Rohtak and Gurdaspur.

Collections of fluctuating land revenue amounted to 144·26 lakhs or nearly 6 lakhs more than in the previous year, while the outstanding balance rose slightly from Rs. 28,000 to Rs. 30,500. Most of the increase is accounted for by extensions of canal irrigation in the new colonies, but good rain in the dry tracts such as Mianwali and Hissar also contributed appreciably to the result.

Collections of " other land revenue " show a net increase from 40·33 to 46·53 lakhs. Sales of Government land and temporary leases alone account for more than this difference. During the year sanction was accorded to a maximum of 80,000 acres out of the area reserved for military grantees on the Lower Bari Doab Canal being given out for temporary cultivation for two or four harvests, and it is to be hoped that this measure has in some degree mitigated the unsatisfactory features attaching to cultivation on single harvest leases.

3. The number of coercive processes issued on behalf of lambardars decreased by 15 per cent. while those issued against lambardars increased by 12 per cent. In all, 11,434 processes or about 1,000 less than in the previous year were issued. These included four cases of imprisonment but none in which direct management of land was undertaken or distress or sale of immoveable property ordered. In the Lyallpur District an increase in the number of processes is ascribed to the refusal of zamindars to realize their grain in the expectation of rising prices, while in Lahore their reluctance to be in evidence during the stress of recruiting is said to explain the very large increase in the number of processes against lambardars. As usual the Multan division called for the greatest measure of coercion.

The system of serving revenue processes through the post has continued to be utilized and met with varying degrees of success in different districts. The reports from Ambala and Dera Ghazi Khan indicate that this method, like that which it replaces, cannot always surmount the reluctance of a party or a witness to accept service. Only in Karnal has the adoption of the system yet resulted in any reduction of the establishment of tahsil peons, while in Gujranwala Government recently found it necessary to sanction the temporary re-entertainment of twenty peons who had been dispensed with in the preceding year. On the whole, however, the system of service through the post may be said to promise satisfactory results, and the Lieutenant-Governor hopes that efforts will be made to extend its use wherever conditions are favourable to it.

4. The number of districts in which settlement operations were in progress was four. Of these, the settlement of the Multan District was begun during the year, and operations were brought to a close in the Rupar and Kharar Tahsils of Ambala. Re-measurement and record work were completed in Kangra and all tahsils of Ambala. In connection with the Sind Sagar Canal Colonization Project a beginning was made with triangulation operations carried out by a party of the Northern Circle, Survey of India, and an area of about 7,430 square miles was triangulated preliminary to the location of the corners of the 4,000 acre blocks into which the tract will be divided.

5. The practice of remitting land revenue by money order is increasing in popularity and nearly 18 lakhs were thus paid during the year. In some districts, such as Gujranwala, the lambardar has learnt that for sums exceeding Rs. 15 remittances of currency notes are cheaper than remittances by money order. Notes are not always, however, readily available in the villages and their remittance is in some parts distrusted by the people as attended with a certain amount of risk. The lambardars of Lyallpur were able to profit by the fact that currency notes were offered in the bazar at a discount, with the result that the whole of the rabi instalment of land revenue found its way to the treasury in notes.

6. The working of the canals under departmental management was satisfactory, but the demand for water diminished with the ample rainfall, in some districts, for instance Multan. Rules for the distribution of river supplies between the Jhelum, Chenab and Lower Bari Doab Canals have been drawn up, but will be subject to revision as irrigation extends on the newer links of the system.

An important step has been taken in the formation of a Provincial Drainage Board for the more systematic investigation of the problems of water-logging and seepage throughout the province and formulation of remedial measures. It is recognized that water-logging is not exclusively an irrigation problem and that imperfect or obstructed natural drainage is not infrequently its main cause ; but the evil is naturally most common in irrigated tracts and parts of the areas irrigated by the Upper Chenab and Upper Jhelum Canals and also by the Shahpur Inundation Canals suffered from it in a pronounced degree during the year. On the Upper Chenab Canal the modifications of the zone system which are under contemplation and which include a proposal to realign the water-courses in certain areas along natural water-sheds are likely to effect a mitigation of the evil.

7. Of canals under district management those in Gurgaon matured nearly twice the acreage of the preceding year, but the damage from floods added considerably to the cost of maintenance. Flooding impaired the working of some of the Grey Canals in Ferozepore, and the total matured area though 33 per cent. higher than in 1916-17 was still below the five-year average. The Montgomery Canals, the Rangoi Canal in Hissar, the Shah Nahr in Hoshiarpur and the Sarusti Canal in Karnal showed improved results. The Nammal lake in Mianwali recorded the highest water level it has yet attained, and in October 1917 the accumulated reserve was sufficient to provide for the needs of three succeeding harvests. It is satisfactory that the cultivators on this canal have begun to learn the disadvantages of overlavish waterings and the importance of dividing their fields into '*kiaris*.'

8. Advances under the Land Improvement Loans Act amounted to less than Rs. 77,000 compared with an average for the previous quinquennium of over two lakhs. The main cause of this large decrease lies in the prohibitive cost of materials and labour for the sinking of wells. The recent simplification of the procedure for the distribution of taccavi loans in tracts where a demand for them on a large scale is likely to be forthcoming should prove efficacious when more normal conditions recur. His Honour is glad to notice a healthy tendency to resort to co-operative societies rather than to Government for assistance in agricultural improvements such as the sinking of wells. In the Upper Chenab Colony some of the settlers are arranging to co-operate in the joint management of brick kilns and the manufacture of bricks, and there appears to be no reason why the provision of materials, if not the engagement of labour, should not be undertaken by co-operative enterprise on a more extended scale than hitherto. Advances under the Agriculturist Loans Act totalled just over 3 lakhs or double the sum advanced in the previous year, the floods in certain districts and the measures for extending the cultivation of food-grains having stimulated the demand. These taccavi loans are reported to be generally popular and to be freely resorted to when the need arises.

9. The policy of granting temporary leases for the cultivation of wheat, gram and other food-grains brought a large additional area under the plough, especially in the Mianwali, Montgomery and Jhang Districts, where extensive areas of Government waste are available and sowings were encouraged by a plentiful monsoon. The Lieutenant-Governor would be glad if the Financial Commissioner will examine the expediency of permitting in special cases temporary leases of longer duration than the maximum period now prescribed.

10. Operations under the Chos Act were not extended during the year, but proposals are now under consideration for the adoption of remedial measures throughout the Ambala district. The interests involved are numerous and the task of determining the compensation for their disturbance no light one. The outlay devolving upon Government is likely to be heavy and the share of Government in the benefits that will accrue by no means a major one. None the less the Lieutenant-Governor cannot but recognize that without a lead from Government the difficult problems involved in cho reclamation are not likely to be solved by the people themselves ; he is confident, however, that, as in Hoshiarpur, the zamindars of Ambala, once effective measures are put into operation, will not be slow to associate themselves in their successful prosecution.

11. Sales of both cultivated and uncultivated land have decreased, in the former case the area sold (100,650 acres) being less than in any year of the past two decades. The Financial Commissioners' report does not define the causes of this decrease with any certainty, but it is probable that the large profits derived from agriculture in recent years and confidence in their continuance deters owners from selling. It is noteworthy that where large areas are reported to have been sold, as in the Mianwali Thal, these were of poor quality. The total area redeemed from mortgage was 284,355 acres or practically the same as in 1916-17, though the cultivated proportion was greater, and the mortgage debt discharged was higher by some 22 per cent. There has thus been a reversal of the tendency prevalent in recent years towards a progressive decline in the area redeemed, the causes of which are no doubt to be found in the abundance of money furnished by high prices of produce and steady remittances from men in the army. On the other hand, the cultivated area mortgaged, though less than last year, is little short of the area redeemed. The sale price of cultivated land averaged Rs. 252 per acre against Rs. 227 in 1916-17, a rise being recorded in almost all districts. Land now sells on the average at 171 years' purchase of the land revenue, the rise in this respect representing no less than 14 years' purchase in a single year,—a striking proof of the rapid appreciation in the value of land. Still more remarkable are the prices realised at auctions of State land on the Lower Bari Doab Canal which have been steadily rising since 1915, and last month reached an average of Rs. 493 per acre on an area of 9,000 acres.

12. The Land Alienation Act continues to work satisfactorily. A certain number of *benami* and other dubious transactions in the guise of

legitimate mortgages continue to come to light and the occurrence of such is probably inevitable. These, however, are of minor importance when weighed against the success with which the Act as a whole is administered.

13. Revenue case work has been kept well in hand in spite of the volume of war work which has had the first call upon the time and energy of all revenue officers. Both institutions and disposals were fewer than in 1916-17 and the pending file in September 1918 was 30 per cent. lighter than twelve months earlier. The appellate work of the Financial Commissioners and of Commissioners also show largely reduced pending files, and a particularly gratifying feature of the returns is a decrease from 252 to 30 in the number of appeals pending for more than three months.

14. Some of the statistical returns attached to the report appear to require checking. The fact that the area of Montgomery district is shown in Statenent III to have more than doubled since last year cannot be due solely to a more accurate measurement by *killabandi* of the waste. The figure for the total number of villages in the province in the same statement is also wrong.

15. For the past three years Sir Michael O'Dwyer has had occasion to acknowledge year by year the untiring and self-sacrificing spirit with which revenue officials of all grades have faced the heavy additional responsibilities thrown upon them by the war and its manifold demands upon their energies. In repeating his appreciation of their valuable services, he desires to congratulate the Financial Commissioners and the body of Revenue officers serving under them on the high degree of efficiency which they have maintained throughout a difficult period in the discharge of the important, though often monotonous, duties connected with the administration of the land revenue.

ORDER.—Ordered that a copy of the above review be forwarded to the Senior Secretary to the Financial Commissioners, Punjab, for information and guidance, also that it be published in the *Punjab Government Gazette* and circulated with the report as usual.

By order of His Honour the Lieutenant-Governor, Punjab,

E. JOSEPH,

Offg. Revenue Secretary to Government, Punjab.

2998 CS—267—7-4-19—SGPP Lahore.

No. 491—53-I-3.

FINANCIAL COMMISSIONERS' OFFICE:
Dated Lahore, 26th February 1919.

FROM

V. CONNOLLY, ESQUIRE, I.C.S.,

Senior Secretary to the Financial Commissioners, Punjab,

To

E. JOSEPH, ESQUIRE, I.C.S.,

Offg. Revenue Secretary to Government, Punjab.

The Hon'ble Mr. H. J. Maynard, C.S.I., I C.S.
The Hon'ble Mr. C. J. Hallifax, C.B.E., I.C.S.

SIR,

I AM directed to submit the Annual Report on the Land Revenue Administration of the Punjab for the Agricultural year ending the 30th September 1918.

The charge of the offices of Financial Commissioner was held by the following officers for the periods noted :—

Hon'ble Mr. H. J. Maynard, C.S.I.	...	1st October 1917 to 3rd May 1918.
Hon'ble Mr. P. J. Fagan, C.S.I.	...	Throughout the year.
Hon'ble Mr. C. J. Hallifax, C.B.E	...	4th May 1918 to the end of the year.

I have the honour to be,
SIR,
Your most obedient servant,
V. CONNOLLY,
Senior Secretary to the Financial Commissioners, Punjab.

214 FC—252—1-3-19—SGPP Lahore.

Annual Report

ON THE

Land Revenue Administration

OF THE

Punjab

FOR THE

Agricultural year ending the 30th September 1918.

General summary of agricultural conditions.

1. The year was on the whole very favourable for agriculture. The monsoon broke in the beginning of June with abundant rain almost everywhere in the Province and it was abnormally active in August and September, the rain continuing until about 25th September in most districts while the eastern part of the province had a heavy fall in October. Although floods to some extent hampered sowings and also did damage to standing crops, the total kharif sown area amounted to 12,038,714 acres or 5 per cent. above the normal, while the failed area was 19 per cent. against a normal of 20 per cent. Failed area was high in Rohtak (28 per cent.), Lahore (35 per cent.) and Gurgaon (51 per cent.). There was abundant moisture for rabi sowings, although excessive rain in some places made ploughing and timely sowing difficult, and the total sown area amounted to 20,829,237 acres, which was 25 per cent. above normal for both irrigated and unirrigated land and 37 per cent. above normal for unirrigated land alone. The winter season was almost rainless and until March, when moderate or heavy rain fell throughout the Province. Until this rain fell the moisture in the ground was sufficient for the growing crops on unirrigated land, while the water-supply in the canals was ample for the canal-irrigated areas. The weather was favourable at harvest time. The percentage of failure was 11 for the rabi against a normal of 13. Failed area amounted to over 20 per cent. in Ambala, Ludhiana and Hoshiarpur. The increase in sown area for both kharif and rabi was of course mainly due to the favourable seasons, but a part of the increase was the result of the efforts made by Government during the year to extend the area under food-grains by leasing out all available Government lands on temporary leases at favourable rates. The total matured area for the year amounted to 28,253,017 acres against a normal of 23,784,946 acres, and high prices were realised by the zamindars for the produce they sold. The average price of wheat rose to Rs. 3-15-0 per maund and that of cotton to Rs. 12-1-0 per maund.

Fixed land revenue.
Statements V, VI and VII.

2. The total demand of the year for fixed land revenue was 235·07 lakhs. Of this 231·35 lakhs, equivalent to 98·4 per cent., was collected. 1·23 lakhs were irrecoverable including Rs. 45,000 remitted on account of calamities of the season. Only Rs. 18,000 remained outstanding without suspension. 3·84 lakhs were suspended; of this Rs. 36,000 were remitted and 1·18 lakhs collected, leaving a balance of 2·30 lakhs suspended during the year. The year opened with 5·63 lakhs under suspension; of this Rs. 95,000 were remitted and 2·32 lakhs collected, so that the year closed with 2·36 lakhs still under suspension for previous years. At the end of the year 4·66 lakhs were under suspension altogether. The demand for the previous year increased by 4·17 lakhs, of which 2·22 lakhs were due to progressive assessments mainly in Ludhiana, Ferozepore and Amritsar, and 1·08 lakhs to revised assessments, mainly in Ambala and Kangra. Of the other causes of increase the most important were alluvion, Rs. 37,500, and the assessment of waste lands, etc., Rs. 23,500. On the other hand, there was a gross decrease

of Rs. 62,000 on the demand of the previous year, of which Rs. 16,000 was due to diluvion, Rs. 6,000 to grants of land revenue free, and the rest to miscellaneous causes. There was no difficulty in collections. The feature of the year was the heavy suspension in Gurgaon This was due to floods in the kharif and amounted to 2·85 lahhs; of this over Rs. 9 ,000 was collected later and about Rs. 19,000 remitted, leaving 1·75 lakhs suspended at the end of the year. In Gurdaspur the state of the harvests necessitated the suspension of over Rs. 35,000, of which over Rs 32,000 remained outstanding. In Rohtak about Rs. 25,000 were suspended owing to floods, but all except a little over Rs. 8,000 was collected later. In Sialkot orders were issued for the suspension of Rs. 22,607, but the people voluntarily paid in a large part of this, and only Rs. 3,244 of the year's demand remained under suspension. In the 24 districts not mentioned above, suspensions amounted to only Rs. 16,000. The balance for the current and past years outstanding at the end of the year exceeded Rs. 10,000 in five districts only, of which Gurgaon accounted for Rs. 3,19,294, Gurdaspur Rs. 53,235 and Rohtak Rs. 46,441. The Province thus has a very clear balance sheet.

Alluvion and diluvion.
Statement No. IX.

3. Owing to heavy floods alluvion and diluvion operations resulted in a net loss of Rs. 22,200 in the fixed land revenue roll as compared with an increase last year of Rs. 21,149, the total assessable area of the Province being reduced by 21,395 acres. The revenue was enhanced on 12,294 acres, while it was reduced on 8,419 acres. The United Provinces lost to Karnal two whole villages and a part of a third, aggregating 3,063 acres in area. There were decreases in land revenue of Rs. 1,661 due to the action of chos and of Rs. 3,850 due to streams, the net area lost being 1,444 acres from the former, all in the Hoshiarpur District, and 2,500 from the latter, chiefly in the Gurdaspur, Hoshiarpur, Sialkot and Dera Ghazi Khan Districts.

Fluctuating land revenue.
Statement VIII.

4. The collections of true fluctuating land revenue have again risen, the increase being from 138·32 lakhs last year to 144·26 lakhs this year; the outstanding balance was Rs. 30,500 against Rs. 28,000 last year. The assessments made by Deputy Commissioners on canal-irrigated lands were 12·31 lakhs and of these 6·76 lakhs were contributed by Multan where the extension of canal irrigation led to an increase of about Rs. 50,000 on the figures of 1916-17; in the other districts of importance in this connection – Sialkot, Gujranwala, Muzaffargarh and Dera Ghazi Khan—the assessments were 514 lakhs or about Rs. 99,500 less than in the previous year, the decrease being attributed to decreased canal irrigation in consequence of early monsoon rains as well as to damage by floods and the partial failure of the winter rains. The assessments of land revenue and water advantage rate made by the Irrigation Department increased by 5·55 lakhs, due chiefly to extensions of canal irrigation in Gujrat, Montgomery and Multan, to the large areas placed under cultivation in Jhang and Lyallpur owing to the favourable start of the monsoons and also to the efforts made to increase the area under food-grains. In the case of assessments of other than canal-irrigated lands there has been an increase of about Rs. 86,000 on the previous year's figure. The principal variations were increases due to good rain, aggregating 1·22 lakhs, in Mianwali (·45), Hissar (·34), Multan (·22) and Montgomery (·21) and a decrease attributed to excessive rains and a flood of ·36 lakh in Muzaffargarh. Objections to these fluctuating assessments have been noticed only in the Mianwali and Sialkot reports. In the former district, owing to a considerable development of cultivation since settlement, the patwari and supervising staff are overworked—" or would be " as the Commissioner puts it " if work was done thoroughly "—and the great size of fields makes it difficult to work the system accurately and supervise it efficiently. In Sialkot 26 Raya riverain villages under fluctuating assessment expressed a dislike to it, but this was doubtless prompted by the exceptional circumstances of the year and cannot cancel the considered opinion which induced these villages at settlement to adopt the fluctuating system at their own option. The Chief Engineer, Irrigation Department, was addressed by the Financial Commissioner with reference to His Honour the Lieutenant-Governor's remarks on paragraph 4 of last year's report as regards the delay in granting remissions for crops damaged by hail in Lyallpur and measures have been taken to obviate such delay in future.

5. Collections of other land revenue have risen from 40·33 lakhs in the previous year to 46·53 lakhs this year. There is an increase of ·94 lakh from the sale of proprietary rights in Government estates, mainly in Montgomery, Lyallpur, Jhang and Muzaffargarh Districts, and of 4·31 lakhs from the sale of proprietary rights in Government waste lands, mainly in the colony area in Montgomery, Lyallpur and Multan Districts, owing to extensions of canal irrigation in those districts. There has also been an increase from 2·69 lakhs to 4·09 lakhs under lands leased out for temporary cultivation, principally in Montgomery (3·28 lakhs), Multan and Lahore. The Deputy Commissioner of Montgomery remarks that the steady increase of single harvest leases is an unfortunate feature of the returns, as they discourage good cultivation and unsettle the minds of tenants so that satisfactory progress cannot be expected until the land is permanently allotted. The Commissioner dissents because for obvious reasons permanent allotment cannot be accelerated, while, apart from the desirability of cultivating last year every available acre of food-grain producing land, temporary cultivation is better than none. There has been an increase of nearly Rs. 7,000 in the receipts from royalty on Kankar in Karnal The other heads call for no remarks. In Jhelum two of the three firms engaged in the coal industry are working satisfactorily, but the two firms engaged in the oil industry have been hampered by want of the necessary machinery. The uncollected balance has risen to 1·46 lakhs against ·92 last year, the increases occurring chiefly in Gujranwala, Gujrat, Shahpur, Mianwali and Multan. The only items which need be noted here are Rs. 24,000 due in Gujranwala from auction purchasers on the Upper Chanab Canal and Rs. 23,000 referred to in last year's report as being due in Shahpur from the Jalpana estate ; Rs. 3,000 was recovered from this estate during the year, but this was credited to the interest account.

Other land revenue.
Statement VIII.

6. Fifteen new jagirs—1 of Rs. 750, 3 of Rs. 500 each, and 11 of Rs. 250 each—were granted in recognition of distinguished services rendered in connection with the war and in public life. A new revenue assignment of Rs. 400 per annum in the Jullundur District was granted under the orders of the Government of India to Khan Sahib Sheikh Ahmad, late Sub-Assistant Surgeon, attached to the Kashmir Residency Dispensary. The Sikri Jagir of Rs. 3,076 per annum in Karnal District lapsed with effect from Kharif 1918 owing to failure of heirs. Two pattidari jagirs, amounting in value to Rs. 661 per annum, were confiscated in the Karnal and Ambala Districts on account of the conviction of the Jagirdars concerned for flagrant crimes.

Land revenue assignments.
Statement No. X.

7. There has been a further decrease in the number of coercive processes from 12,430 in the last year to 11,434 in the year under report. The amount of arrears for the realization of which these processes were issued was 10·87 lakhs against 8·51 lakhs last year. 91·7 per cent. of the arrears were collected. Collections made after issue of processes amounted to 2·34 per cent. of the total collections made. Of the 11,434 processes issued, 6,837 were writs of demand, and of the remaining 4,597 processes only 2,633 were executed. Of these 2,633, 1,923 were for arrest, 4 for imprisonment, 664 for distress and 42 for sale of moveable property. As regards warrants for arrest as last year a large number of these were issued in the districts of Multan, Jhang, Dera Ghazi Khan, Gurdaspur and Gujranwala, while there has been an increase in their number in Lahore and Lyallpur. These districts also account for a large number of the executions in cases of distress. In Shahpur 24 processes for sale of moveable property were executed. There were no cases of direct management farm, or transfer or of attachment of immoveable property. Processes were issued in six districts for the recovery of canal water rates, and in six districts for the recovery of other demands not included in land revenue. The number of processes issued against lambardars for the recovery of land revenue in the four districts Dera Ghazi Khan, Ferozepore, Lahore and Gujranwala exceeded the number of the last year by 100 in each case ; and these districts with Muzaffargarh, Hoshiarpur, Lyallpur and Karnal accounted for an excess of more than one thousand such processes over those issued in 1917. But elsewhere such processes were fewer, and their provincial total of 3,565 was only 382 above that of the previous year. Processes issued at the instance of lambardars decreased by 1,378 to 7,869 ; in most, however, of the districts

Coercive processes.
Statement XI.

mentioned above, particularly Dera Ghazi Khan, Lahore and Karnal, as also in Gurdaspur there were increases. Where district totals for processes are small, variations are not of great significance ; and an increase as a rule indicates a healthy effort to remedy laxity in payments. In some cases, however, other explanations are given. Thus in Lyallpur revenue-payers held up their wheat for a rise in prices ; in Lahore lambardars absented themselves to avoid giving help in recruiting ; and in Gurdaspur there was an apprehension that the shortage of the winter rains would delay payments. The processes issued in the Multan Division as usual bulk largest in the Provincial totals, and those of the Rawalpindi Division are the least. In the Multan Division processes against lambardars have increased from 1,147 to 1,321, but there are considerable decreases in Montgomery and Jhang, and the increases elsewhere are justified by the necessity of keeping up to date lambardars who are accustomed to delay payments. The effect of this is that, in spite of an increases in Dera Ghazi Khan, the processes which lambardars themselves have found it necessary to take out against revenue-payers have been reduced from 4,957 to 3,521 in the division, the decrease being particularly marked in the Jhang and Multan Districts.

Process-serving establishment.

8. Twelve districts entertained temporary assistance for short periods for serving coercive processes at a total cost of Rs. 504. In Karnal the system of serving revenue processes through the post was introduced and the establishment of tahsil peons was in consequence reduced from 80 to 65. In Ludhiana only 10 processes were served through the post. In Lahore the scheme was tried with 45 post offices and some relief was given, but the Deputy Commissioner thinks it is too early yet to judge of its success. In Rawalpindi the system worked well throughout the year and apparently proved more reliable than service through peons. The Deputy Commissioner remarks that its real success depends much on the co-operation of the postal staff and that it is doubtful whether it will eventually result in a reduction in the number of tahsil peons, but the system will be continued and the results reported again next year. In Muzaffargarh the system was introduced towards the close of the year for 267 villages out of a total of 937 villages in the district and has proved successful so far as it has been tried. The system is working very well in Amritsar District. In Ambala no general attempt was made to serve summonses in revenue cases through the post, but the system has been usefully adopted in certain cases. In the Deputy Commissioner's opinion the system is more likely to succeed in appeals where the parties only are summoned and they are usually anxious to appear, than in original trials where the witnesses as a rule are more reluctant to attend court. In Ferozepore the system received attention and instructions were issued for the maintenance of appropriate registers by different courts, but no practical steps were generally taken for some time owing to lack of funds to meet the extra expenditure on service postage stamps. Funds were subsequently provided and the working of the scheme will be noticed next year. In Jhang a scheme was drawn up for introducing the system. For the short time it was under trial it is reported to have worked satisfactorily, but the postal service in the district is still very inadequate and there is a very large number of villages which only get a delivery once a week, while with all the miscellaneous war work no reduction of the process serving staff could be undertaken. In Dera Ghazi Khan the system was also tried in certain selected villages which had a daily postal delivery and were situated at a distance from the tahsil head-quarters, but it has not proved a marked success so far. In a few cases only was service duly made while in the majority of cases the parties concerned either declined to take delivery or evaded service. The Deputy Commissioner states that in an educationally backward district like Dera Ghazi Khan with an overwhelming majority of illiterate persons in each village the parties concerned do not consider themselves bound to attend in a court unless and until their thumb marks are obtained on the document by a process-server in token of service of the process. The success of the system is therefore doubtful, but the Deputy Commissioner thinks that, if courts show that they are prepared to accept as duly served all notices which there is reasonable ground to believe have been tendered to the persons concerned, further experience may show that the system can be put on a proper footing.

Progress in re-measurement, revision of records, etc.
Statements XII and XIII.

9. During the year there were four settlements in progress. In Kangra and Ambala Districts re-measurement and record work were completed. In Dera Ghazi Khan the work of final attestation of the record was almost completed by the close of the year in Sanghar Tahsil, was approaching completion in the Dera Ghazi Khan Tahsil and was fairly well advanced in the other two tahsils. The hill torrent record of irrigation rights has been almost completed in Sanghar. In Multan Settlement operations commenced in the Kabirwala and Mailsi Tahsils in the beginning of the year and notwithstanding a delay in obtaining a full staff and a bad outbreak of malaria progress in measurements and records work was satisfactory. The riverain survey of the Ravi was completed and maps and records prepared on the data supplied by the Survey Department. In Ambala the new assessments in the Rupar and Kharar Tahsils were announced and the bachh papers filed, The assessment reports of Ambala and Naraingarh were submitted during the year as also those of Sanghar and Dera Ghazi Khan Tahsils of Dera Ghazi Khan District. Orders were passed on all these reports except on that of the last named tahsil which is now under review.

Final settlement reports.

10. The orders of Government were received on the Final Settlement Reports of Sialkot, Jullundur and Simla Districts. In the canal-irrigated tract of Sialkot, where the conditions have not yet reached stability, the term has been fixed for 10 years while for the remainder of the district not affected by the Upper Chenab Canal the term is 30 years. For Jullundur and Simla 30 years is also the term.

Comparison of estimates and forecaste in regard to duration, cost and results.
Statement Nos. XIII and XIV.

11. No settlements were completed during the year under report. The Kangra Settlement is due to end by the end of January 1919.

Proposed future Settlement operations.

12. The Forecast reports of the Sutlej tahsils and of the portion of the Ravi tahsils outside the colonised area in the Montgomery District and of the Sirsa Tahsil of the Hissar District were considered during the year, but for various reasons it was decided to postpone re-settlement in the Sutlej Tahsils and in Sirsa Tahsil until October 1919, and in the Ravi Tahsils for another five years.

Forecast reports of the Muzaffargarh District and of the Colony villages on the Jhang Branch and on the Gugera Branch, Circle I, of the Lower Chenab Canal in the Lyallpur District have been called for.

Settlement staff.

13. Settlement operations in the Rupar and Kharar Tahsils of Ambala having been finished and measurements in the other three tahsils being completed the entire staff in the former and half the staff in the latter left the settlement, some of the staff being transferred to the Multan Settlement which began during the year. Reductions began to be made in the staff in Kangra where settlement operations will shortly come to an end. Service in Dera Ghazi Khan is said to be very unpopular and the Settlement Officer has experienced some difficulty in obtaining good kanungos.

Surveys.

14. Riverain surveys were carried out by the Punjab Riverain Detachment of the Survey Department on the Indus, Ravi and Sutlej rivers in connection with the Dera Ghazi Khan and Multan Settlements. 440 linear and 706 square miles of main circuits and 3,904 linear and 762 square miles of minor traverses were run and 780 theodolite stations of the former and 16,282 of the latter were fixed in the area under river action. Corners of 173 squares in 1,181 square miles were demarcated with permanent mark ∧ stones on both banks of the Indus and the Ravi to serve as bases for the future survey and demarcation of boundaries and fields in the beds of the rivers. 2,935 plotted and 816 boundary mapping large scale sheets and 40 four-inch sheets were traced and supplied to the Settlement Officers. Besides these 377 miscellaneous traces were prepared and all the traverse stations marked during the year were plotted on 58 four-inch sheets. Some of the Kangra computation volumes were completed. The total expenditure of the detachment during the year was Rs. 1,09,132.

Topographical survey operations were continued under No. 1 Party (Northern Circle) of the Survey of India which surveyed an area of 1,525 square miles on the scale of 1 inch =1 mile in the Hoshiarpur, Jullundur and Kangra Districts and Chamba and Simla Hill States. This party also surveyed 61 square miles on the scale of 3 inch=1 mile for the Artillery Practice Camp near Hoshiarpur.

Triangulation operations for laying out on the ground the temporary marks from which the actual corners of rectangles will be fixed in connection with Sind-Sagar Canal and Colonization Project in the Punjab were begun and completed during the year by Sind-Sagar Party of the Northern Circle, Survey of India. The area triangulated was approximately 7,430 square miles in Mianwali, Shahpur, Muzaffargarh and Jhang Districts, with a view to the location of the corners of 4,000 acre rectangles to be undertaken next season. To assist this party in its work a new series of triangles extending from Sananwan in Muzaffargarh District to Hadali in the Shahpur District was laid out, built and observed by the Survey Department and observations were also completed at all stations built in the preceding year.

Boundaries.

15. There was no important alteration in district boundaries during the year. There is some disagreement between the local officers and the State officials in regard to the location of 2 or 3 pillars on the boundary line between Sialkot and Jammu State, and the matter is now before the Settlement Commissioner of the Jammu State. It is hoped that the question will be finally settled and the new pillars erected at an early date. Some disputes exist as to the correct position of the fixed boundary laid down some years ago between the Bahawalpur State and the Multan District owing to inaccuracies in the two sets of maps in which it was incorporated. The Settlement Officer of the district and the Director of Land Records of the Bahawalpur State have drawn up a scheme for the settlement of outstanding disputes and the demarcation of the disputed line during the present cold weather. A boundary dispute between Karnal District and Jind State was decided and the boundaries between Kangra District in the Beas and Chakki riverain and the Hoshiarpur and Gurdaspur Districts were settled during the year.

Revenue record rooms.

16. In most districts of the Province the accommodation in revenue record rooms is adequate. Jhelum, however, is said to be badly in need of a new record room, while the Ambala and Kangra offices are still cramped for want of suitable accommodation. The extension sanctioned for Kangra and noticed in last year's report has not yet been carried out, with the consequence that the Settlement Records of Palampur and Kangra have not yet been brought into the head-quarters. In Ambala too the new records from two tahsils have been stored as a temporary measure in a spare room provided with temporary racks. The question of providing suitable and up-to-date iron racks both in Simla and Ambala should be taken up at an early date.

The weeding out of old records ripe for destruction received due attention in almost all districts—the only exception being in the Montgomery District where during the whole year no files or other papers were destroyed in the Sadr Kanungo's office presumably on account of the fact that no Muharrir could be found for several months to work for Rs. 10 per mensem.

The new copying rules form the subject of conflicting opinions, but the whole question is being thoroughly sifted in the light of certain observations made by the Hon'ble the Judges of the Chief Court. It appears that some minor alterations in the rules may be ultimately necessary. The misappropriation of certain sums pertaining to the copying department in the Gujranwala District, alluded to in last year's report, is still being enquired into by the Police. The inordinate delay in bringing the culprits to book is accounted for by the fact that the question of the reponsibility for certain signatures – which according to the hand-writing expert may be forged—is still involved in mystery.

The scheme of appointing a special kanungo to attend civil courts with revenue records and to prepare excerpts where necessary has been extended to most districts. The scheme is entirely of a tentative nature and will be fully examined next year. In Ferozepore the post created for the purpose has been brought on to the permanent list and the District officers of Rohtak and Sialkot describe it as useful.

It is reported from Shahpur that the staff in the Revenue record room is overworked, but there is no reason to suppose that this is generally the case as no other district has raised this question. The subordinate staff is, in view of the prevailing high prices, undoubtedly under-paid and the necessity of making Rs. 20 per mensem the minimum pay for all Muharrirs is apparent.

On the whole the outturn of work and the supervision have been entirely satisfactory.

Other matters.

17. Nearly 18 lakhs of land and other revenue were paid by money order during the year against nearly 15 lakhs last year. Advantage was taken of this system in twenty-three districts. The system is becoming popular particularly with those who live at a distance from the tahsil head-quarters or have only small sums to remit. More than 3½ lakhs of revenue were paid by currency notes through the post in 12 districts. Currency note remittances have been adopted especially in Gujranwala, where they markedly displaced money order remittances. The amount paid in currency notes in this district was Rs. 1,36,059. Other districts with considerable currency note payments were Jhang, Rs. 45,668, Attock, 44,300, Jhelum, Rs. 30,503, Gujrat, Rs. 31,470 and Lyallpur, Rs. 28,414. But these payments are as yet curiously localised. Thus they were not used at all in the Rawalpindi District; in the Ambala Division they were used only in the Jhajjar and Gohana Tahsils of Rohtak; while in the Jullundur Division less than Rs. 2,800 were paid in currency notes. In Jhang their use is attributed to a shortage of coins and a distrust of notes, but this is not a reason of general application. Elsewhere the shortage of notes in villages has probably more accurately been put forward as a reason for failure to use them as a means of paying in revenue. Payment in notes has advantages similar to those of payment by money order, and it is cheaper for considerable sums, though dearer when the payment to be made is Rs. 15 or less. In some districts, however, it is distrusted as risky; and that a risk is involved was proved by the theft of a remittance of Rs. 1,420 by a Sub-Postmaster in the Gujranwala District, who was subsequently on conviction sentenced to two years' imprisonment and fine. Remittances in currency notes cause a certain amount of inconvenience to the Accountant staff, but this is outweighed by the convenience which the system will afford to the people as soon as its adoption becomes more general. In Lyallpur the whole of the rabi land revenue was paid into the treasury by the lambardars in notes, the reason for this being that as notes were selling at a discount the lambardars changed their cash for notes in the bazar.

The practice adopted in certain districts by which the Revenue Accountant of the head-quarters tahsil attends the district treasury during the payment of revenue instalments continues to save time and trouble to the revenue-payers. The system of collection of land revenue on successive fixed dates for each village on a regular roster which has been introduced in certain districts continues to work satisfactorily.

Abstract village note-books are completed in the manner suggested in paragraph 110 of the Clerical Establishment Committee's Report by the Sadr Kanungo and his assistant during their visits to the tahsils after the rabi jinswars have been filed in Amritsar, Gurdaspur, Muzaffargarh and Dera Ghazi Khan. The Deputy Commissioner, Ludhiana, points out a difficulty which has arisen in adopting this suggestion owing to the fact that the figures relating to cultivated area and area under mortgage cannot be ascertained in the case of villages of which the quadrennial jamabandis have to be prepared until the 7th September.

Enhancement of rent. Statement XV.

18. The numbers of suits brought for enhancement of rent (1,035) and of successful suits of that class (920) continue to decrease. The large decrease in the figures in Gujrat District is due to the disposal in the preceding year of cases which arose from the new settlement. On the other hand there has been an increase in the number of suits in the Hoshiarpur, Jullundur and Gurdaspur Districts. In Jullundur the rise is mainly due to the enhancement of land revenue in the recent settlement. The increase in Gurdaspur follows a similar one in the previous year. No explanation has been offered, and enquiries will be made. There has been an increase in the number of suits for reduction of rent from 13 last year to 28 this year. The

Deputy Commissioner of Ambala writes that the majority of the occupancy tenants in the district paying cash rents pay at revenue rates with a malikana; the maximum rate allowed by law is so low that there can be no hesitation in enhancing on suit rents which are less than those rates even after an increase in the demand upon re-assessment. The Commissioner does not agree. It is better he thinks where there has been a considerable rise of revenue not to enhance the malikana for five years or so after settlement and then the rise should be gradual. Tenants he thinks can of course pay at full rates, but being occupancy tenants they have rights and deserve considerate treatment and a share in the growing prosperity of the country. As regards this the Financial Commissioner would observe that the maximum cash rents which can be decreed legally against occupancy tenants are in themselves favourable rents, and more especially so in view of the general lightness of our revenue assessments He agrees, however, that it is not generally desirable to decree the maximum rate of malikana where this course would involve a heavy proportional enhancement on the rate previously payable. The matter is, however, more properly one for judicial ruling. Section 24 (3) (*a*) of the Tenancy Act appears to place difficulties in the way of the Commissioner's suggestion for postponing enhancement for a period of five years subsequent to settlement.

Ejectment. Statement XVI.

19. There were 111 decrees for ejectment of occupancy tenants under Section 39 of the Tenancy Act as against 120 last year, the largest number being again in the same two districts, *viz.*, Hoshiarpur and Shahpur. The total number of ejectments of occupancy tenants actually made during the year was only 48 against 131 last year. There has been a large decrease in the total number of applications for service of notice of ejectment and of notices of ejectment of tenants-at-will and in consequence the ejectments only total 3,992 against 6,592 last year. This may possibly be attributable to a scarcity of tenants owing to large enlistments in the Army.

Decent of Jagirs Act.

20. Four Jagirs—two held by members of the Bhai family in the Lahore District and two by members of the Mandal family in the Karnal District—were notified during the year under the Descent of Jagirs Act. This brings the total number of jagirs notified under the Act to 149.

Canals under departmental management.

21. All these canals worked well during the year as the result of the heavy monsoon rainfall and of good cold weather supplies in the rivers. The copious rainfall, however, naturally led to a decrease in the demand for canal water. Thus there was a considerable decrease in the area irrigated by the Western Jumna and Sirhind Canals in Karnal, Ferozepore, Ludhiana and Hissar Districts and by the Agra Canal in the Gurgaon District. In the Amritsar District there was a decrease of 42,716 acres or 12·3 per cent. in the total area irrigated by the Upper Bari Doab Canal. Unauthorised irrigation continued to be a constant source of trouble in the Upper Chenab Canal area in Sialkot. On April 30th and May 1st, 1918, a Conference of Revenue, Irrigation and Agricultural Officers was held at the Financial Commissioners' Office to consider whether any and, if so, what modifications were necessary in the Zonal system in force on this canal and also whether the rules regarding irrigation to well areas on the same canal should be modified. Certain modifications in the Zonal system and irrigation rules in force were proposed by this Conference and are now under consideration. There was an increase of 52,356 acres or 7 per cent. in the cultivated canal-irrigated area in the Gujranwala District owing to extensions of the Upper Chenab Canal. Excessive rains increased by 1,081 acres the water-logged area in Wazirabad and Hafizabad Tahsils, where, however, the opening of new and the deepening of old drainages continue to prove beneficial in checking water-logging. Some villages in the Gujrat District have also suffered from water-logging caused by the Upper Jhelum Canal. The villages affected are partly in the Bet Jhelum where there is a sandy slope to the river, and partly in the Gujrat Tahsil where the canal crosses an old drainage. Government passed orders during the year on the recommendations of the Conference on water-logging held in April 1917. His Honour the Lieutenant-Governor decided that the question should be taken up for the Province as a whole by a Drainage Board

consisting of officers of the Revenue, Engineering and Agricultural Departments with power to co-opt the Sanitary Commissioner or Sanitary Engineer as members in the disposal of cases in which questions of public health are important, and also with power to co-opt local civil officers, representatives of the Railway Administration and one or two representatives of the local body concerned when necessary. Except in respect of the sanitation of large village sites this Board will take the place of the present Sanitary Board in rural areas and its functions will be —

(1) to investigate the causes and effects of all cases of water-logging on a large scale that affect the health and prosperity of the rural population or the Government revenue;

(2) to propose remedies, which would generally take the form of the opening up of natural drainages, surface or sub-soil drainage schemes, or contraction of irrigation where its excessive use is undoubtedly the cause of deterioration, etc. etc.;

(3) to prepare the measures necessary to give effect to (2);

(4) to decide on the agency for carrying out those measures, which would usually be the Irrigation Branch in canal tracts, the Roads and Buildings Branch or the railway or local bodies concerned in other cases; and

(5) to advise Government as to the equitable distribution of the cost.

Rotational closure of outlets on the Mungi and Nasrana Rajbahas of the Lower Chenab Canal had to be resorted to in August and September 1918. It was ascertained that the closure on the Nasrana was due to the outlets being of an old type; supplies passing through these outlets are subject to variation both from silt movement in the rajbaha and from the action of the cultivators in clearing their water-courses; except by the rotational closure of outlets the action of these causes could not be controlled promptly enough to secure that supplies reached the tail of the rajbaha in time to save existing crops. On the Mungi Distributary Kennedy Gauge Outlets had been fixed, but the need for closure was caused by silt movements resulting from the channel being in a state of transition while adjusting itself to a recent remodelling. The Lower Bari Doab Canal and the Lower Jhelum Canal worked well. The opinion of the Commissioners and Deputy Commissioners concerned was obtained as to the suitability of the rules which govern the distribution of river supplies as between the five linked canals and it was found that the rules laid down by the Irrigation Department were suitable for the present, but they will require reconsideration in two years' time when irrigation from the Lower Bari Doab Canal and the Upper Jhelum Canal has further developed.

Nearly the whole area irrigated by the Shahpur Inundation Canals became a swamp from floods in the autumn and was unfit for sowing until the spring. The Upper Sutlej Canals worked much better in the Montgomery District than in the preceding year and matured area amounted to 317,029 acres as against 219,375 acres in 1916-17. All the Inundation Canals in the Multan District worked well and gave an abundant supply of water. But on account of copious rains, the demand for water was of course not so keen as usual. Owing to excessive rainfall and the frequent occurrence of floods the canals of the Sidhnai series had to be closed for a time. The remodelling of the channels in the Mailsi Sub-Division is nearly completed. The Diwanwah and Muhammadwah Canals have been widened to carry a larger supply of water, and work on the Luddan Division of the Mailsi Canal is in hand. In Muzaffargarh heavy rains reduced the demand for canal water and abnormal floods and "soma" damaged the crops. Steady progress continues to be made in this district in replacing kacha outlets with iron pipes to the great advantage of the cultivators at the tail of the channels. The Inundation Canals in Dera Ghazi Khan opened very late, but subsequently heavy rains and hill torrent floods rendered irrigation from the canals almost unnecessary.

The total area irrigated in 1917-18 by all the canals in the province under departmental control amounted to 9,063,901 acres including 463,743 acres in Native States. The total area matured by them in the same year was 8,437,724 acres including 461,639 acres in Native States.

Canals under district management.

22. Owing to heavy rainfall during the month of September 1917, the Gurgaon bunds matured 10,441 acres as compared with 5,592 acres last year, and the income from them rose in consequence from Rs. 6,808 to Rs. 14,989. The cost of maintenance was Rs. 11,456 as compared with Rs. 8,284 in the preceding year as it was necessary to repair the damage done to certain bunds by heavy rains, and that caused by the bursting of bunds in the Alwar State. A special grant of Rs. 20,000 was sanctioned by Government for these repairs. The Rangoi Canal in Hissar irrigated 576 acres in kharif and 13,908 acres in rabi as compared with 520 and 4,042 acres, respectively, in the preceding year. The area irrigated by the Sarusti Canal in Karnal was 35,835 acres as compared with 32,569 acres last year. In both of these cases the increase was due to good rains in September and October 1917. The water channels or kuhls in Kangra continued to supply valuable irrigation and no difficulty occurred in their management. The Shah Nahr Canal in Hoshiarpur worked well and irrigated 15,687 acres as against 15,804 acres in the previous year; the matured area was 15,540 as against 15,444 acres; the expenditure was Rs. 14,100 less than in 1916-17, but the higher expenditure of the former year is accounted for by an investment of Rs. 11,000 in the War Loan.

On the Grey Canals in the Ferozepore District the area sown exceeded that of the previous year, but the matured area—110,793 acres—was below the average of the previous five years. One reason for the decrease is difficulty in providing suitable heads for two canals—the Jalalwah and the Bachherewah. On the former an expenditure of Rs. 29,411 was incurred during the year, but the ultimate result was not altogether satisfactory. On these two canals 18,444 acres were sown and 13,748 matured—the sown area being 17 per cent. less than that of the previous year and the matured area 29 per cent. less. A further reason for the unsatisfactory working of the canals as a whole was the damage done by floods in the lower lying parts of a number of the canals. This flooding not only restricted sowings, but also damaged the crops when they were nearing maturity. Five canals were affected by it, and their sown and matured areas of 56,224 and 38,883 acres, respectively, amount to a decrease of 12 per cent. in the sown and nearly 36 per cent. in the matured areas as compared with the previous year. The necessity for the improvement of the drainage of the tract affected is under consideration and a scheme has been prepared. The provision of escapes for the canals is also receiving attention. The other 8 canals of the system worked well. With the assistance of contributions made by Government and the District Board considerable improvements by means of silt clearance have been affected in these canals, and they are securing a large increase in the area irrigated. The total area sown on these 8 canals was 73,930 acres and of this 58,162 acres matured. The sown area was 44 per cent. greater than that of the previous year and the matured area was 33 per cent. greater.

The canals under the management of the Deputy Commissioner of Montgomery worked very satisfactorily. The area irrigated increased from 44,971 to 60,095 acres while the increase in the area matured by them was from 31,966 to 48,794 acres. The largest of these canals is the Kitchin and Irving Canal which matured in the year under report 24,040 acres. All these canals except the Gark Garkana draw upon the Sutlej. The canal named irrigates from the Ravi and an improvement of its management is under contemplation.

Owing to good rainfall in 1917 the water in the Nammal Lake in Mianwali rose to a level never attained before. On the 1st October 1917 the reservoir contained 1,428 million cubic feet of water, which was sufficient for the rabi and kharif crops of 1918 and in spite of the almost complete failure of rains last year there is still sufficient water for the coming rabi crop. The total area irrigated during the year was 10,678 acres and the water rate collected amounted to Rs. 42,478 The cultivators are beginning to realize that careful cultivation leads to better crops and there was a marked improvement in the rabi of 1918 in the area irrigated per cusec of discharge The "duty" per cusec in rabi 1917 was 160 acres and the average depth of water over a field was 2·20 feet, while in rabi 1918 these figures were 177 acres and 1·94 feet, respectively. The Kurram Canals in Isa Khel and the Indus streams in Mianwali and Bhakkar Tahsils worked well during the year. The proposal to construct a weir in the Kurram and the Kotki Dam Scheme are still under consideration. The hill torrents in Dera Ghazi Khan at first flowed satisfactorily,

but later on they flooded the country and damaged the standing kharif crops; the flooding, however, proved very useful for rabi sowings.

Land Acquisition Act.

23. The outstanding feature of the acquisitions under the Act is that whereas in the preceding year a total area of more than four thousand acres was acquired for a little over 4 lakhs of rupees the consideration paid this year for 2,841 acres exceeds six lakhs of rupees This great rise in the amount of compensation is due to the fact that urban land was taken up in Ambala, Lahore, Amritsar and Gujranwala. In Lahore alone an area slightly less than 5 acres absorbed nearly one lakh and forty thousand rupees. Such exceptional factors render all comparison between past and present rates of compensation useless and illusory and for the same reason no accurate conclusions can be drawn from an analysis of the figures showing the price paid in terms of the number of year's purchase of the land revenue.

More than half of the total area acquired during the year was for canals, being 1,651 acres, while roads accounted for 252 acres, railways for 179 acres and buildings, etc., for 762 acres.

It has been reported from Gujranwala that on the Lower Chenab Canal land has been occupied by canal officials in many cases long before the publication of the Gazette notification. Elsewhere there is no such complaint and the provisions of the law as to the proper method of taking possession and paying compensation have been strictly followed. Everywhere the registers have been reported to be properly kept.

Altogether 780·61 acres were surrendered during the year as against 626·69 acres surrendered last year. The Hissar District alone accounts for a surrender of more than 500 acres to the owners from whom the land was acquired. Two hundred acres out lof these were surrendered free of cost as the owners had not accepted any compensation when the land was originally acquired. In Muzaffargarh too 49 acres were restored to the original owners free of cost.

Land Improvement Loans Act XIX of 1883.

Statements Nos. XVII, XIX, XX, XXI and XXII.

24. As compared with last year the amounts advanced for land improvements dropped from 1·4 lakhs to a little less than Rs. 77,000. On account of the principal of outstanding loans 2·09 lakhs were realised leaving Rs. 17,091 arrears. Collections on account of interest amounted to Rs. 75,843 and the corresponding arrears to Rs. 5,750. Arrears both of principal and nterest were greater than last year. The interest collected represented 6 per cent. of the mean outstanding balance, which is the average of the last 10 years. The provincial gain on the year's working has been Rs. 28,750. Remissions of land revenue were given for 1,496 wells which fell out of use, and protective certificates for 860 new wells.

Except for the construction of embankments in a few districts, taccavi loans were taken practically for wells only. A number of causes at work during the year restricted the sinking of wells generally. In some districts these causes were of purely local operation, such as floods in parts of Gurgaon, the extension of canal irrigation in Gujrat, and the effects of settlement operations in Jullundur and Dera Ghazi Khan; but the high prices of all necessary materials and labour had a general restrictive effect. Nevertheless where the people require wells they are increasingly able to undertake their construction without the help of taccavi. The war has in many ways increased their resources, and it is noticeable that much of the large remittances lately received from men in army service has been applied in their home districts to the sound object of agricultural improvements. Moreover there is an increasing tendency to resort for assistance if necessary to co-operative societies rather than to Government. In view of the above considerations the decrease to 117 (or 60 per cent.) in the number of wells for which taccavi loans were taken when compared with the decrease to 2,4 9,, or 3? per cent., in that of other wells sunk during the year indicates that there has been no hesitation about asking for taccavi loans where necessary, and that it has been liberally granted As it is usually taken by zamindars whose credit makes it difficult for them to finance improvements otherwise, it is not unnatural that in some cases a little difficulty in realisation has been experienced; but the advances are said to be properly applied and their recovery is satisfactory. Action has lately been

taken to ensure that where there is an ascertained scope for improvements, the procedure for the distribution of taccavi loans shall be simplified. In many places it is not under existing conditions economically sound to press the sinking of wells either with or without taccavi, as for instance in Karnal where the sub-soil water is brackish or in the Mianwali Thal, where the conditions for successful well-sinking have not yet been ascertained. But in tracts in which taccavi loans can, with advantage, be encouraged it has been decided by Government that applications should be dealt with and disbursements made by officers on tour, and the limits which formerly were fixed for grants by different classes of officers have been extended. The Deputy Commissioner of Ambala suggests that taccavi loans might usefully be given with the object of arresting darar or ravine cutting, but he notes that the return on the principal sunk for this purpose is problematical and that zamindars cannot risk capital on appropriate schemes. The Commissioner of Ambala is of opinion that there should certainly be some way, *e.g.*, by purchase of the land or by a long lease, in which a district board could undertake and recover expenditure on schemes of this kind and on soil improvement.

Loans under the Agriculturists Loans Act XII of 1884.
Statements Nos. XVIII, XX, XXI and XXII.

25. The amount advanced under the Agriculturists Loans Act rose from 1·5 to 3·1 lakhs. The balance outstanding at the end of the year fell from 3·7 to 3·4 lakhs. There has been an increase of arrears on account of principal from Rs. 24,441 to 42,893. Arrears of interest amount to only Rs. 1,883. The interest realized amounted to Rs. 6 per cent. on the mean balance, and there was a provincial gain for the year's working of Rs. 4,821. The average rate of interest received on the mean balances for the past 10 years is Rs. 5-3-0. In seven districts no advances were made, and in 6 districts only did the advances exceed Rs. 10,000 each. But taccavi is reported to be generally popular, and it is taken freely when necessary. It is only when conditions are exceptional that large advances are required. Thus the advances made in Gurgaon aggregate Rs 87,000, as relief was required for sufferers from floods. In the other districts where large advances were made they were due to the encouragement of the cultivation of food-grains. It does not appear that advantage was taken of the permission accorded during the year for loans for the construction of country carts intended to relieve difficulties of transport caused by the war. Taccavi, however, proved valuable in relieving distress caused in the remote Spiti tract through the failure of the local harvest in 1917 and the loss of many animals due to early snowfall in the autumn of the same year. The Assistant Commissioner of Kulu organised measures for the import of food stuffs into Spiti and its cheap sale, and he also distributed Rs. 2,500 in taccavi for the replacement of yaks and bullocks.

Forest Act and Government lands.
Statement No. XXIII.

26. The work of defining the limits of forest areas, the trees on which are the property of Government, by, reference to field numbers was completed in the five tahsils of Kangra Proper except for two tikas in the Palampur and twenty tikas in the Kangra Tahsil respectively by the close of the year. The allied work of delimiting the portions of these areas, which will in future be under the departmental control of the Forest Department and of the Deputy Commissioner, respectively, was continued by Messrs Mitchell, Assistant Commissioner, and Walters, Deputy Conservator of Forests. Their report concerning the Nurpur Tahsil has recently been submitted and except for the Jagir tracts they had completed their work in the Hamirpur and Dehra Tahsils by the close of the year. No new area of protected forest was transferred from the Forest to the Civil Department. There were 39 cases under the Forest Act and Rules in the Kangra District during the year. 37 cases were withdrawn on compensation being paid and in 2 cases the accused were tried and convicted. The management of the Shahpur Kandi Forests is reported to have been satisfactory. Income from these forests during the year rose from Rs. 2,217 to Rs. 5,937 and the expenditure from Rs 3,044 to Rs. 3,531. After deducting the debit balance of the last year the net profit from these forests comes to Rs. 1,578. Resin and tapping work continued to be profitable, and very little damage was done to the forests by fire during the year. Income from unclassed forests in the Hoshiarpur District increased from Rs. 986 to Rs. 10,696 owing to the sale of chil trees in Ban Nandhir. Grazing leases in the Lahore District realised Rs. 11,260 as against Rs. 5,525 in the preceed-

ing year, probably owing to the good monsoon. Rs. 1,763 of this amount of Rs 11,260 was, however, afterwards remitted, as part of the area leased for grazing was subsequently given out on temporary leases in order to increase the area under food-grains. In connection with the scheme for the browsing of the 53rd Camel Corps in the Shahpur District arrangements are being completed to lease parts of Rakhs Khabakki and Shin Dhakki on favourable terms to villagers who have certain rights in the area to be reserved for the Corps as compensation for these rights. In Rawalpindi some 12 forest fires occurred in the Eastern and 19 in the Western Forest Divisions and burnt areas of 1,013 acres of Reserved and 138 acres of Protected Forests. These fires are stated to have been generally accidental and they cannot be called extensive as the year was dry. The villagers afforded help in putting out the fires. Cultivation of Thal-lands in Mianwali is growing very popular among zamindars owing to extension of gram cultivation in the Thal. A portion of the Government Thal rakhs, 9,900 acres in area, in the Mianwali Tahsil was accordingly leased out for cultivation during the year on a consolidated rate of Re. 0-4-0 per kanal (=Re. 1-8-0 acre) matured, and an assessment of Rs. 17,876 was made. The Bhakhar Thal rakhs did not attract any cultivators in the year under report owing mainly to the extensive private shamilat areas there available for cultivation. The Deputy Commissioner states also that the term of 2 years which is now allowed for a temporary lease of Government waste land is not sufficiently attractive to induce people to come forward. In the Mianwali Tahsil the Deputy Commissioner is giving such leases as rewards for recruiting work. In Montgomery there are several scattered patches of forest reserved for a period of 10 years. It is stated that these have proved troublesome in many ways. They attract graziers from all parts of the Sandal and Ganji Bars and form a rendezvous for stolen cattle. It thus seems to be possible that they cause more harm than good and an enquiry will be made into the matter. The area let out in this district for cultivation increased considerably owing to good rainfall and on account of the temporary leases given for the cultivation of wheat and other food crops in order to increase the exportable surplus of the Province. A large proportion of the increase in total income is due to this cause. An area of 10,877 acres was leased out on temporary leases in Jhang District in order to increase the area under food-grains and of this 7,760 acres were cultivated in Rabi 1918. There was a decrease of Rs. 40,266 in income in Dera Ghazi Khan District owing to the failure of kharif crops on the Dhundi Estate as the result of floods and excessive rainfall. 97 temporary leases of Government land were granted in the Multan District in pursuance of measures taken for the expansion of food-grain areas. The total income from all unclassed forests and from other Government lands under the control of the Collectors amounted to Rs. 75,10,170 as against Rs. 60,67,456 in the preceding year.

Punjab Land Preservation (Chos) Act.

27. Financial conditions prevented the extension of operations under the Chos Act in the Ambala District during the year under report. In reviewing last year's report the Lieutenant-Governor observed that further action should be no longer delayed and that proposals for extending these operations both in Ambala and Hoshiarpur districts should be formulated and provision made for giving effect to them as early as possible. A sum of Rs. 1,50,000 has accordingly been entered in the schedule of new expenditure for the financial year 1919-20 and proposals for the assessment and payment of compensation for restrictions under section 5 of the Chos Act in the Rupar and Kharar Tahsils, which are estimated to cost approximately Rs. 1,28,000, are now before Government. The Financial Commissioner has also recommended that a forest officer should be put on special duty to report in consultation with the local officers on the whole question of remedial measures against Cho action in the Morni ilaqa and in the hills and plains of the Naraingarh, Jagadhri and Ambala Tahsils. A grant of Rs. 2,000 was placed at the disposal of the Deputy Commissioner, Ambala, for the reclamation and training of Cho beds in the district. In Hoshiarpur experiments on a fairly large scale were made in the Maili Cho with a view to confining the Cho water to its proper course. These experiments were carried out by the zamindars themselves, acting under directions, and they have proved most valuable. The afforestation of the Siwaliks in that district is proceeding satisfactorily. Shisham and bamboos have been sown to certain extent while the grass crop was abundant. Grazing of

camels is now permanently prohibited in the Hoshiarpur Siwaliks and Rs. 3,488 were paid during the year as compensation on this account.

General statement of owned and mortgaged area. Statement III.

28. The total area of the Province, as entered in the revenue records is now a little over 56¼ million acres. Of this nearly 34½ million acres are owned by agricultural tribes, 5¼ million acres by others and a little over 16½ million acres consist of common lands, village sites and Government property. There has been a gross increase of a little over one-and-a-half million acres compared with that shown in Statement III last year and an increase of a little over three-quarters of a million acres in the cultivated area. The increase in the former is due mainly to the correct measurement of waste areas of shamilat and Government estates in the course of killabandi operations in the Montgomery Colony; it is also to some extent due to similar operations in Gujrat, to remeasurement in Kangra District and to a large area transferred from the United Provinces to Karnal by alluvion. The increase in the cultivated area is due to good rainfall, to the efforts made to increase the area under food-grains and to the extension of canal irrigation. The cultivated area under mortgage shows a slight decrease as compared with last year and the percentage of this to the total cultivated area is now 10·9 against 11·5 last year.

Transfers. Statements XXIV to XXVII.

29. The cultivated area (ownership) sold during the year was 100,650 acres or about 6,500 acres less than in the previous year. This is the lowest figure for 22 years Sales of uncultivated land (ownership) have also fallen from 112,314 to 71,803 acres Muzaffargarh was again the district in which the largest area was sold, but even in that district the area sold, owing, it is reported, to the prevailing financial stringency, bad seasons and possibly also to feelings of uneasiness owing to the war, was considerably less than last year. In Mianwali a large area of shamilat land of very poor quality was sold owing to the extension of gram cultivation. The total cultivated area (ownership) redeemed during the year was 200,855 acres against 187,407 acres last year and the mortgage debt discharged was Rs. 1,77,00,000 against Rs. 1,45,00,000. The increase in redemption is marked in the districts of the Ambala Division and is ascribed to a good rabi harvest, to high prices of produce and to remittances from men in the Army. The reason for the progressive decrease in the area redeemed last year and in previous years has been under enquiry and a report on the subject will be submitted shortly. There has been a slight drop in the number of cases under the Redemption of Mortgages Act, from 2,932 cases last year to 2,464 cases this year, but notwithstanding this the Act is said to be gaining in popularity. The cultivated area (ownership) mortgaged during the year was 199,779 acres against 219,712 acres last year, this being a drop of nearly 20,000 acres and 1,000 acres less than that redeemed. In the previous year mortgages had exceeded redemptions by 32,000 acres. The area transferred by gifts has also fallen from 86,000 to 75,000 acres during the year, these gifts being mainly as usual transfers for religious and charitable purposes and transfers to relations. The area transferred by exchanges was 31,600 acres against 43,000 acres last year and was mostly due to consolidation of holdings.

Value of land. Statement XXVI.

30. The average recorded price of cultivated land has again risen, the price for 1917-18 averaging Rs 252 per acre as compared with Rs. 227 for 1916-17. The rise continues to be almost general throughout the Province, and as remarked last year it is due to the general rise in prices of agricultural produce and to the large sums of money available owing to large remittances by men in the Army. The few districts which report a fall in the price of land attribute this fall variously to diminishing popularity of land as an investment for money, to the War loan, to the sale of land of inferior quality as in the Mianwali Thal and to the sale of their holdings in colonised areas to Government tenants at rates much below the market value. The sale price for the Province as a whole this year represents 171 years' purchase of the land revenue assessed as against 157 years' last year. The mortgage value of land, the ownership of which was mortgaged during the year, was 329·86 lakhs against 283·03 lakhs last year and represents 91 times the land revenue assessment of the land against 85 times in the previous year. The average mortgage money per acre on the whole area mortgaged was Rs. 140 against Rs. 106 last year.

Land Alienation Act
Statement XXV.

31. No new tribe was notified under the Land Alienation Act during the year. Agricultural tribes gained by purchase a net increase of 9,000 acres against a gain of 21,000 acres in the year preceding The net loss to agricultural tribes in cultivated and uncultivated land by mortgage and redemption taken together was 28,000 acres against 45,000 acres last year. Sales by agricultural tribesmen have again fallen from 183,000 to 146,000 acres, and sales to them have fallen from 203,000 to 155,000 acres, while sales to others show a decrease from 38,000 to 31,000 acres. A few districts report the detection of cases of benami transactions, which were all set aside. These transactions appear to be on the decrease, but the Deputy Commissioner, Multan, thinks there is still a considerable amount of transfer in his district which is contrary to the provisions of the Act. The Deputy Commissioner of Mianwali states that frequent applications are received for the determination of the balance of the mortgage debt under Section 7 (3) of the Act and in the course of investigations in connection with these applications unconscionable bargains have come to light; on the other hand the procedure is being used by some zamindars in order to avoid the result of a deal that was *primâ facie* perfectly fair but has actually turned out to the considerable advantage of the mortgagees.

Business returns.
Statements XXVIII and XXIX.

32. Military service and pre-occupations reduced the number of revenue cases for disposal in districts. The time of district revenue officials was much taken up with war work, but revenue case work was kept well in hand. The pending file was 30 per cent. less than in September 1917, though disposals of court cases and Revenue Officers' cases were over 9 per cent. and 11 per cent., respectively, less than in 1917-18. Some noticeable changes in the classification of Revenue Officers' cases have occurred in a few districts, and it is doubtful whether the statistics are maintained in all districts on exactly similar lines Thus the disposal of soldiers' petitions appears to have been differently dealt with; in many districts they gave much work, but whereas in some, *e.g.*, Hoshiarpur with 2,405 disposed of, they appear to be included in the returns, in others, *e.g.*, Rawalpindi with 3,287 such petitions, they were excluded. In Gurgaon, verification rolls, which were included last year, were excluded in the present year's returns. In the courts of Commissioners and Financial Commissioners 1,157 Revenue Judicial appeals were decided in the year against 938 decided last year and the number of pending cases has been reduced from 277 to 127. 2,891 Revenue executive appeals were decided against 2,938 last year and there were only 201 cases pending against 463 last year. The number of appeals pending for more than three months has also fallen from 252 to 30.

Tour of Commissioners.

33. The following returns of touring by Commissioners refer to the year ending 31st March 1918 :—

Ambala.—The Hon'ble Mr. C. H. Atkins, I.C.S., was Commissioner for 183 days, of which he spent 21 days on tour. Mr T. Millar, I.C.S., was Commissioner for 9 days and did no touring. Mr. H. A. Casson, C.S.I., I.C.S., was Commissioner for 173 days, of which he spent 69 days on tour.

Jullundur.—The Hon'ble Mr. C. J. Hallifax, C.B.E., I.C.S., was Commissioner throughout the year and remained 118 days on tour.

Lahore.—Mr. H. A. Casson, C.S.I., I.C.S., was Commissioner for 133 days of which he spent 11 days on tour. Mr. C. M. King, C.I.E., I.C.S., was Commissioner for 232 days and remained 73 days on tour.

Rawalpindi.—Lieutenant-Colonel Sir F. Popham Young, K.B.E., C.I.E., I.A., was Commissioner for 335 days, of which he spent 93 days on tour. Lieutenant-Colonel A. E. Barton, I.A., was Commissioner for 30 days and did no touring.

Multan.—Lieutenant-Colonel C. Powney Thomspon, I.A., was Commissioner throughout the year and remained 108 days on tour.

Extracts from District Reports.

LYALLPUR.

THERE are a few special points connected with this district which may be conveniently noticed here.

Temporary cultivation.—Small areas continue to be given out in addition to the areas given out last year for the production of additional food-grain stocks. It is not, however, expected that the produce of the area in the coming *rabi* season will be as great as it was in the *rabi* harvest of 1918 when a vigorous monsoon stimulated sowings.

Village sites.—A further reference has been made to the Financial Commissioner on the subject of the sale of sites in villages to proprietors. A constant demand for new sites or additional sites exists, some of the applications are speculative, but a large proportion of the applications come from owners whose families and dependents have increased or whose holdings have been sub-divided. New tenants, menials and shop-keepers are constantly arriving in this district. The district is still undermanned from the point of view of agricultural labour and the demand for sites is expected to continue.

Service grants.—Two out of the four camel corps were on service at the beginning of the year and the other two corps were mobilized during the year and are now serving at Rawalpindi. Constant attention is required to keep the corps up to strength and replacement of camels and sarwans has been and continues to be a difficult business. Sarwans become sick on service, desert, or are declared unsuitable and struck off. In nearly every case the camel-owning tenant has given the sarwan a substantial advance in order to persuade him to enrol and he feels the financial burden of having to produce another sarwan to fill the gap. The Janglis and Ravi Hitharis dislike military service and it needs a substantial advance to persuade one of this class to take service as a sarwan with a mobilized corps. Very often the camel-owning tenant failing to find a sarwan has to go off on service himself, which causes local difficulties regarding cultivation of his grant, payment of dues and recovery of takavi advances. Camels are becoming increasingly difficult to obtain. Some grantees have had to go as far as Sind to find replacements. The Camel Purchasing Officer purchased a few replacements in this district and Jhang under the Military Transport Act for camel-owning tenants, but the number was small. There have been a good many complaints connected with the administration of the corps which are still *sub judice*. Surra still causes considerable loss. Under the present law we can only advise an owner to destroy a camel cast for surra. He invariably takes back the camel to the herd of female camels in his *Jhok* where it becomes a centre of danger to the few breeding camels left in the Bar.

Mule-breeding grants.—A satisfactory effort is being made to keep up conditions and Government obtains a substantial number of mules from these grants. The number of unbound breeders is increasing : at present their stocks are largely bought by dealers, who are paying higher prices than the Army Remount Department. It would be of interest to apply the Punjab Military Transport Act to these unbound mules and purchase by prices fixed by a committee under the Act. Horse-breeding has gone down. There are several reasons. The chief reason has been that the very high prices have tempted owners to sell and many a good mare has been sold because a dealer offered a good price. The loss of some of the good Jangli mares is irreparable or will take years of care and stimulation to repair. I think also that, while the department have been most successful in promoting mule-breeding, their officers have got somewhat out of touch with the horse-breeders. Some mares were struck off the register in past years for not appearing before the Army Remount Department Officer on tour. There was rather a tendency to deal with horse owners, who are unbound by any conditions, as if they were owners of a mule-breeding bound mare or a branded bound mare of the Jhelum Canal Colony. There seems to have been an idea that the source of supply would cultivate the convenience of the department instead of the department cultivating the idiosyncracies of the source of supply. This circle has been without a Veterinary Officer for some time which has thrown additional work on the Superintendent of the Circle. When conditions make it possible to strengthen staff, it may be possible to visit and encourage the owners of unbound horse

stock in their homes and to begin to build up again that considerable promise as a horse-breeding centre which this district once possessed. Looking at matters from the broadest point of view, the inhabitants of this district are certainly the richest agricultural population of any district in the province at the present time. Horse-breeding is essentially the pastime of the well-to-do yeoman farmer and if it can be worked up in any district it can be worked up here with the maximum hope of success.

G. F. DEMONTMORENCY,

The 1st November 1918. *Deputy Commissioner, Lyallpur.*

214 CS—252—1·3·19—SGPP Lahore.

STATEMENTS.

No.

I.—Analysis of chief statistics.

II.—Cultivating occupancy of land.

III.—Owned and mortgaged area.

IV.—Incidence of revenue.

V.—Fixed land revenue (including service commutation), demand, collections and balances.

VI.—Amount of land revenue held under suspension.

VII.—Alterations in the fixed land revenue demand.

VIII.—Collections and balances of fluctuating and other land revenue.

IX.—Alluvion, diluvion and destructive inundation.

X.—Land revenue assignments.

XI.—Coercive processes for collection of land revenue.

XII.—Progress made in re-measurement and attestation.

XIII.—Progress made in re-assessment.

XIV.—Duration and cost of settlement operations.

XV.—Enhancement or reduction of cash rents.

XVI.—Ejectment proceedings under the Tenancy Act.

XVII.—Disbursements, collections and outstandings on account of Act XIX of 1883.

XVIII.— Ditto ditto ditto Act XII of 1884.

XIX.—Remission orders and certificates of exemption.

XX.—Account of Local Government with agriculturist borrowers.

XXI.—Loans made under the Land Improvement and Agriculturists' Loans Acts.

XXII.—Result of loan operations to Local Government.

XXIII.—Area and income of unclassed forests and of other Government lands.

XXIV.—Sales, mortgages, redemptions and other transfers.

XXV.—Abstract of mortgages, sales and redemptions.

XXVI.—Sales of land.

XXVII.—Mortgages of land.

XXVIII.—Work done by Revenue Officers.

XXIX.—Appellate and revisional work of Commissioners and Financial Commissioners.

Proceedings of His Honour the Lieutenant-Governor of the Punjab in the Department of Revenue and Agriculture—(Revenue) No. 12077, dated 17th April 1920.

READ—

The Annual Report on the Land Revenue Administration of the Punjab for the year ending 30th September 1919, forwarded with letter No. 491-52-L.-4, dated 13-18th March 1920, from the Senior Secretary to the Financial Commissioners, Punjab.

REMARKS.—The agricultural conditions of the year were unfavourable for the cultivator. There was practically no rain in the second half of April 1918 and the whole of May, and the light showers in June were not sufficient to help the kharif sowings which were consequently restricted. Again the cessation of the monsoon in the beginning of September resulted in considerable damage to the crop that was sown, the failed area being 41 per cent. The deficient rainfall and the influenza epidemic account for the rabi sowings being late and short, but the percentage of crop failure in the rabi was fortunately only 10 as against 11 in the preceding year. The total matured area for the year was 17,104,179 acres or only 72 per cent. of the normal as compared with 28,253,017 acres last year. The outturns of wheat, barley and cotton per acre were respectively 1, 5 and 29 per cent. above normal, but in the case of all other important crops the yield was below normal. The agriculturists, however, benefited by a considerable rise in prices; the average price per maund of wheat went up from Rs. 3-15-0 to Rs. 5-9-0 and that of cotton from Rs. 12-1-0 to Rs. 14-14-0.

2. The fixed land revenue demand rose from 235·07 to 236·61 lakhs, of which 91·4 per cent. was collected. The amount of revenue suspended during the year was 22·36 lakhs, which is considerably larger than in any year since 1907-08, the districts of Gurgaon and Rohtak accounting for more than one-half of the total amount. A number of villages were during the year granted a remission of a portion of their land revenue as a reward for recruiting services. The balance of unsuspended and unremitted land revenue at the close of the year amounted to only Rs. 11,000.

Collections of fluctuating land revenue amounted to 133·38 lakhs, or 11⅛ lakhs less than in the previous year. The decrease is accounted for by the unfavourable agricultural conditions of the year and the unsatisfactory working of the inundation canals owing to the low supply in rivers.

Collections of "other land revenue" show a net increase of nearly 6 lakhs. The increase is due to the extensive sale of proprietary rights in Government estates and the enhanced realizations from sale-proceeds of waste lands. A part of the increase can be accounted for by the introduction on the Lower Bari Doab Canal of a differential scale of malikana on lands leased for temporary cultivation varying from Rs. 2 to Rs. 16 in lieu of the old flat rate of Re. 1 per acre.

3. In spite of the unfavourable agricultural conditions of the year the number of coercive processes fell from 11,434 to 9,597. This included three cases of imprisonment and only four of actual attachment of immovable property. The Multan Division, as usual, called for the greatest measure of coercion; but the district with the largest number of actual attachments in cases of distress was Gujranwala. The system of serving through the post revenue processes other than those for the recovery of land revenue was extended with success, but the system did not result in any reduction in the number of tahsil peons. In fact additional process-servers were entertained in six districts for short periods to recover land revenue at a total cost of Rs. 308. The difficulties mentioned in the Report such as the evasion of service by the addressee or collusion of postmen were only to be expected but are not insurmountable. Sir Edward Maclagan thinks that the system which reduces the opportunities for illegal exactions on the part of the tahsil chaprasis should be welcome to the people and should be given an extensive trial in the province.

4. The payment of revenue through the post in currency notes or by money order has grown in popularity. Rs. 7·9 lakhs were remitted in notes in 24 districts as against 3·5 lakhs in 12 districts in the last year. Revenue paid by money order amounted to nearly 19 lakhs in 25 districts. The remittance of revenue by currency notes is likely to be more extended if it is realized that for remittances of large amounts it is a more economical method than payment by money order and that with due safeguards any small possible risks can be avoided.

5. The system of *girdawari* by appraisement is theoretically a more satisfactory system than the existing one but it is beset with difficulties. The trained eye and deliberate judgment required to estimate the outturn with any degree of accuracy are not found in the average Patwari and the system after trial in certain selected areas has been abandoned. In the preparation of crop forecasts, which were previously purely conjectural, better use is now made of the special knowledge of the officers of the Agricultural Department.

6. An important feature of the year was the formation of the Board of Economic Enquiry for the scientific study of the economic problems of the province. Investigation will not be confined to rural economics, but will include urban problems such as the rise in wages and in the price of food, the housing of the poor, the retailer's profits in some selected trades, etc. Government has provided during the current year Rs. 20,000 for a grant to the Board so as to enable it to conduct research and publish the results of its enquiries. The institution of the Board has aroused interest outside the Punjab and some other local Governments have already applied for copies of the publications of the Board.

7. The working of the canals under departmental management was satisfactory. The demand for water which was keen owing to the failure of the monsoon in 1918 was satisfactorily met by the canals The perennial canals irrigated a larger area as compared with 1917-18, but the inundation canals owing to the river supplies being lower than usual showed poor results. The total area matured by both classes of canals under departmental control rose, however from 8·4 to 8·6 million acres (approximately). The working of the inundation canals calls for all the energy and skill of the Irrigation Department and His Honour agrees with the Financial Commissioner as to the vital need of the most expert and unremitting supervision for canals of this kind. The Punjab may well be proud of its 19,654 miles of canals and subsidiary channels which insure it against famine and were calculated to produce crops valued at 55 crores of rupees or more than 2½ times the total capital expenditure to date on the construction of the canals.

8. The decrease in area irrigated by the canals and other irrigation works under district management was attributable to deficient rainfall and low supply in the rivers. The area matured in Ferozepore from the Grey canals fell to 57,400 acres or half the area in 1917-18, but the districts of Gurgaon and Hissar were the worst sufferers. The irrigation from the Namal reservoir also decreased on account of the failure of rain over the catchment area, but even with the restricted supply of water, the crop was a very fair one. The practical results achieved by this forced economic use of water may help to convince the agriculturists of the desirability of economy in the future use of canal water.

9. The total of advances made under the Land Improvement Loans Act rose from a little less than Rs. 77,000 to Rs. 1,80,000 during the year under review. The loans were taken in practically all cases for the repair or construction of wells. Although takavi advances were made on a large and liberal scale for the sinking of wells in the Upper Chenab Colony, progress was hampered by the lack of waggons to carry coal from Bengal. His Honour is glad to notice that the increased wealth of the agricultural classes is enabling them more and more to finance their own agricultural improvements. A decrease, therefore, in the amount of loans under the Act may be due to the increased prosperity of the zamindars rather than to the diminishing popularity of the measures of assistance designed by Government. Advances under the Agriculturists Loans Act totalled just under 9 lakhs or nearly three times the sum advanced in the previous year. The increase is due to the unfavourable

character of the seasons. Large sums were advanced for the purchase of fodder of which there was great scarcity in the south-eastern districts, and for the purchase of seed or cattle when good rains in the earlier part of the monsoon of 1919 held out brighter prospects for the agriculturist after a bad kharif and a poor rabi.

10. It was decided during the year under review to extend the operations under the Chos Act to the Rupar and Kharar Tahsils in the Ambala District. Sir Edward Maclagan has expressed his agreement with the Financial Commissioner in holding that action under the Land Acquisition Act is not desirable and he trusts that early steps will be taken to revise the estimated expenditure on compensation. It is satisfactory to note that the zamindars of the Hoshiarpur District in general appreciate the advantages of conserving grass and trees and that the inhabitants of Maili village in particular by their co-operation in maintaining the embankment works have succeeded in stopping further erosion and reclaiming 50 acres of land.

11. The large area which changes hands by exchange is a notable feature which has not escaped the notice of the Financial Commissioner. It is doubtless mainly due to the desire to consolidate holdings and the Lieutenant-Governor is glad to see that the matter is being further investigated. It may be found advisable at some future date to consider the possibility of legislation to meet cases in which desirable exchanges for this purpose are frustrated by the opposition of small minorities among the proprietors concerned.

12. Sales of agricultural land and redemptions of mortgages are larger than last year. The Lieutenant-Governor notes with interest the Financial Commissioner's view that the restricted redemptions of recent years were due not so much to want of funds or to economic depression as to a desire on the part of the people during the earlier years of the war to hoard their savings for want of trust in the future political stability of the country. This conclusion has gained weight from the realisation of the Financial Commissioner's expectation that the conclusion of hostilities would see a reversion to the pre-war standard. Now that the political horizon is clearer and high prices bring large sums of money into the pockets of the agricultural classes, it may be anticipated that encumbrances will be paid off on a still larger scale.

13. The average recorded price of cultivated land for the whole province has fallen to Rs. 184 per acre but this is no true index to the value of land, as the transactions include land of every quality and also a large area of uncultivated land. The sale of a considerable area of Government land at a nominal price in the Sohag-Para and Sidhnai Colonies has also depressed the provincial average. The true value of land has continued to rise as land is widely considered to be the safest form of investment for the large amount of money that exists in the country. The average price realised from auction sales on the Lower Bari Doab Canal last month reached the unprecedented figure of Rs. 593 per acre for nearly 3,500 acres; although the land was on the whole of an inferior quality to that sold in previous years. The late Mr. Warburton's estate on the Lower Chenab Canal is understood to have been sold for 10½ lakhs of rupees and Mr. P. Broadway's farm at Sargodha also changed hands recently for a large sum of money.

14. A slight decrease in the number of revenue cases decided during the year may be attributed to the hindrances caused by the influenza epidemic and the April disturbances. The pending file was, however, lighter than at the end of the preceding year. The appellate work in the offices and courts of Commissioners and Financial Commissioners is also generally well in hand. Special mention is made in the Report of the number of petitions received from men in military service which in the case of the single district of Hoshiarpur numbered no less than 2,484. The Lieutenant-Governor is gratified to observe that these applications which are bound to throw much extra work on district officials, are as a rule, dealt with promptly and with consideration.

15. In conclusion, Sir Edward Maclagan desires to thank the Financial Commissioners for their capable administration of the Revenue Department. His acknowledgments are also due to the efficiency and success with which Revenue officers of all grades discharged their work during a particularly arduous year.

ORDER.—Ordered that a copy of the above review be forwarded to the Senior Secretary to the Financial Commissioners, Punjab, for information and guidance, also that it be published in the *Punjab Government Gazette*, and circulated with the report as usual.

By order of His Honour the Lieutenant-Governor of the Punjab.

E. JOSEPH,

Revenue Secretary to Government, Punjab.

104 CS—327—19-4-20—SGPP Lahore

No. 491—53-L-4.

FINANCIAL COMMISSIONERS' OFFICE:
Lahore, dated 13th March, 1920.

FROM

V. CONNOLLY, ESQ., I.C.S.,
Senior Secretary to the Financial Commissioners,
Punjab,

To

THE HON'BLE MR. E. JOSEPH, I.C.S.,
Revenue Secretary to Government, Punjab.

The Hon'ble Mr. H. J. Maynard, C.S.I., I.C.S.
The Hon'ble Mr. P. J. Fagan, C.S.I., I.C.S.

SIR,

I AM directed to submit the Annual Report on the Land Revenue Administration of the Punjab for the Agricultural year ending the 30th September 1919.

The charge of the offices of Financial Commissioner was held by the following officers for the periods noted :—

The Hon'ble Mr. C. J. Hallifax, C.B.E.	...	1st October 1918 to 11th November 1918 and 31st January 1919 to 30th March 1919.
The Hon'ble Mr. H. J. Maynard, C.S.I.	...	12th November 1918 to 30th September 1919.
The Hon'ble Mr. P. J. Fagan, C.S.I.	...	1st October 1918 to 30th January 1919, and 31st March 1919 to 30th September 1919.

I have the honour to be,
SIR,
Your most obedient servant,
V. CONNOLLY,
Senior Secretary to the Financial Commissioners, Punjab.

244 FC—276—16-3-20—SGPP Lahore.

Annual Report

ON THE

Land Revenue Administration

OF THE

Punjab

FOR THE

Agricultural year ending the 30th September 1919.

General summary of agricultural conditions.

1. Climatic conditions during the year were unfavourable for both the sowing and maturing of the Kharif crop and for the sowing of the Rabi crop. The total rainfall was very much below the average in all districts except Simla where it was slightly in excess. This led to low rivers and consequent restricted supplies in canals; inundation canals opened later and closed earlier than usual and the quantity of water brought down by hill-streams was very small. In the second half of April and in the whole of May there was practically no rain and thus the time available for the sowing of cane and cotton was shorter than usual. Light showers fell in June but were generally insufficient to help sowings or to benefit the crops already sown. The monsoon was extremely weak in July and in the first half of August but became more active in the second half of that month and gave frequent rain till the 3rd of September, chiefly in the northern and southern districts. There was scarcely any rain after this, though ordinarily the monsoon lasts till the middle of September. The total rainfall from June to September was 49 per cent. below the normal. Kharif sowings were therefore generally restricted while the crops sown suffered considerably from want of sufficient rain. The total Kharif sown area was 8,435,553 acres or 27 per cent. below the normal as against 12,038,714 acres or 5 per cent. above the normal in the previous year, while the failed area was 41 per cent. against 19 per cent. in 1917-18 and a normal of 20 per cent. Percentages of failure were high in Gurgaon (90), Hissar (86), Rohtak (84), Karnal (71), Ambala (68), Attock (55), Jhelum and Rawalpindi (49), Hoshiarpur (48), Gujrat (39), Ludhiana (35), Dera Ghazi Khan (34) and Gurdaspur (30). Sowing operations for the Rabi were considerably interfered with by the influenza epidemic of the autumn as well as by the failure of the monsoon. Climatic conditions continued unfavourable in the autumn and early winter months. There was little or no rain from the beginning of September till the second week of December when a fall was received in all districts except those in the south-east of the Province. A period of dry weather then ensued and lasted till the end of January when there was a substantial fall of rain throughout the Province which greatly benefited the standing Rabi crops. No more rain fell until the end of March when there was a light general fall which did further good to the Rabi crops and helped the extra Rabi sowings. Sowings for the Rabi were therefore small in area and were generally effected late and the winter rainfall was insufficient in the south-eastern districts for maturing the unirrigated crops. The total sown area in the Rabi was 13,417,875 acres or 36 per cent. below the area of the previous year and 19 per cent. below the normal. Sixty per cent. of the total sown area was irrigated as against 36 per cent. in the previous year and a normal percentage of 42. The total matured Rabi area declined by 34 per cent. as compared with the previous year and by 27 per cent. as compared with the normal. The percentage of crop failure was 10 as compared with 11 in the preceding year and the normal percentage of 13. Percentages of failure were high in Attock (26), Jhelum (25), Ambala (23), Hissar (19), Hoshiarpur (17), Rawalpindi and Dera Ghazi Khan (15). The total matured area for the year was only

72 per cent. of the normal and amounted to 17,104,179 acres against 28,253,017 acres last year. Outturn per acre was below normal in the case of all important crops except wheat, barley and cotton, the outturns per acre of which were respectively 1, 5 and 29 per cent. above normal. Owing to unsatisfactory total outturn, increased demand for export from the Province and restrictions on goods traffic, prices were considerably higher than in the previous year. The average prices per maund for jowar rose from Rs. 3-7-0 to Rs. 7-4-0, bajra from Rs. 3-2-0 to Rs. 6-14-0, rapeseed from Rs. 4-7-0 to Rs. 10-7-0, wheat from Rs. 3-15-0 to Rs 5-9-0, gur from Rs. 5-1-0 to Rs. 7-14-0 and cotton from Rs. 12-1-0 to Rs. 14-14 0. In the case of other food-grains the increases varied from 54 to 85 per cent. There was acute scarcity of fodder in the south-eastern districts and considerable scarcity in many other districts. It was necessary to sanction concession rates for the carriage of fodder for the districts most affected and there was considerable import into these districts from the canal colonies.

Fixed Land Revenue.
Statements V, VI and VII.

2. The total demand of the year for fixed land revenue was 236·61 lakhs. Of this 216·33 lakhs or 91·4 per cent. of the demand were collected, 2·11 lakhs were irrecoverable and Rs. 1,135 remitted on account of calamities of the season. The amount suspended was 22·36 lakhs, of which subsequently Rs. 4,400 were remitted and 4·48 lakhs collected, leaving a net balance of 17·83 lakhs for suspensions allowed during the year. The year opened with 4·66 lakhs under suspension for previous years; of this Rs. 40,000 were remitted and Rs. 27,000 collected and 3·99 lakhs were still under suspension at the end of the year. The demand as compared with figures for the previous year shows an increase under various heads, amounting to 2·28 lakhs, of which 1·64 lakhs were due to progressive assessments, Rs. 14,000 to revised assessments in the Kangra district, Rs. 14,000 to alluvion, Rs. 8,000 to lapses and resumption of revenue-free lands and Rs. 25,000 to miscellaneous causes. On the other hand, there were decreases under other heads of Rs. 74,000, of which Rs. 37,000 were due to diluvion, Rs. 9,000 to new assignments of land revenue and Rs. 26,000 to miscellaneous causes. Of the total amount of land revenue suspended Rs. 15·73 lakhs were suspended out of the kharif instalment and 6·63 out of the rabi instalment. The total amount suspended was large, considerably larger in fact than in any year since 1907-08. But, owing to the unfavourable harvests, suspensions would have been necessary on an even larger scale had not the prevailing high prices of agricultural produce aided probably to some extent by the existence in certain districts of surplus stocks from the good harvests of the previous year, enabled the zamindar in most districts to pay his moderate revenue demand without much difficulty even under unfavourable agricultural conditions. Suspensions were indeed only necessary on a considerable scale in 10 districts, namely, Gurgaon (Rs. 8,56,000), Rohtak (Rs. 4,84,000), Sialkot (Rs. 2,74,000), Jhelum (Rs. 1,19,000), Gurdaspur (Rs. 1,00,000), Ambala (Rs. 95,000), Shahpur (Rs. 86,000), Attock (Rs. 68,000), Karnal (Rs. 67,000), and Hissar (Rs. 40,000). These ten districts account for Rs. 21,90,000 out of the total suspensions of Rs. 22,36,000, while considerably more than one half is debitable to two districts alone, Gurgaon a notably insecure tract, and Rohtak. Thus the total amount suspended in all the remaining 18 districts of the province was less than half a lakh of rupees. In most districts collections of revenue are reported to have been made without any great difficulty, though payments were not so punctual as usual, and at the close of the year the balance of unsuspended and unremitted land revenue amounted to only Rs. 11,000. The irrecoverable amount of 2·11 lakhs is largely made up of sums remitted as a reward for war services, the recruiting services of a number of villages having been rewarded during the year by a remission of portion of their land revenue. The total amount of land revenue remaining under suspension at the close of the year was 21·82 lakhs. Of this amount Gurgaon and Rohtak districts account for 11·43 lakhs and 4·20 lakhs, respectively, or a total of 15·63 lakhs. The revenue administration of Gurgaon district will require great care and attention for several years to come, and the Financial Commissioner has accordingly drawn the special attention of the local officers to this matter.

Alluvion and diluvion.
Statement IX.

3. Owing to the scanty monsoon rainfall there were few destructive floods in the rivers and riverain action resulted in a net increase in the cultivated area. The

total assessable area of the Province was increased by 4,454 acres against a reduction in the same area of 21,395 acres in 1917-18. 25,900 acres of riverain land were newly assessed at a total assessment of Rs. 14,743 during the year, while on 21,400 acres the entire assessment amounting to Rs. 21,912 was reduced. The action of the Sutlej which affected six districts resulted in a net gain of 6,600 acres while the Jhelum eroded 8,173 acres and surrendered 6,374 acres with a net loss from its action of 1,800 acres. The revenue was enhanced by Rs. 8,488 on 12,284 acres owing to improvement while it was reduced by Rs. 10,516 on 9,085 acres owing to deterioration. The net loss for the year was Rs. 9,680 in the fixed land revenue roll against a net loss in the previous year of Rs. 22,200. The action of the chos in the Hoshiarpur district caused a loss of 176 acres and Rs. 143 of land revenue against a loss of 1,444 acres and Rs. 1,661 respectively in the previous year.

Fluctuating land revenue. Statement VIII.

4. The collections of true fluctuating land revenue have decreased from 144·74 lakhs last year to 133·38 lakhs this year. The total demand assessed was collected with the exception of a small balance of Rs. 22,000. The decrease in the collection is entirely due to the unfavourable agricultural conditions of the year already described in paragraph 1. Of the total decrease of nearly 11 lakhs as compared with 1917-18, the Multan Division alone accounts for over 8 lakhs, the Multan district showing a decrease of 3½ lakhs. In that district the inundation canals ran very badly, the influenza epidemic was very severe and harvests were particularly poor.

Other land revenue. Statement VIII.

5. Collections of other land revenue rose from 46·53 lakhs in 1917-18 to 52·30 lakhs. The sale of proprietary rights in Government estates brought in 9·20 lakhs, or 1·86 lakhs more than in the previous year, the increase being mainly in the Lyallpur, Jhang and Montgomery districts. The increase of nearly one lakh in Jhang district is ascribed to the extensive purchase of proprietary rights in Colony grants owing to the large profits made by the colonists as the result of the prevailing high prices of agricultural staples. Sale-proceeds of waste lands realized 30·60 lakhs, or 2·72 lakhs more than in the previous year. There was an increase of nearly one lakh in the amount realised by the sale of Government waste land in Montgomery, while sales of proprietary rights in land on the Lower Bari Doab and Sidhnai Canals in Multan district realised nearly 5½ lakhs more than in the previous year. On the other hand, there was a decrease of nearly 3 lakhs in the receipts under this head in the Lyallpur district where nearly all the colonists have now acquired full proprietary rights. Collections from rents of lands leased for temporary cultivation amounted to 5·26 lakhs, or 1·16 lakhs more than in 1917-18. The receipts were principally in the Lower Bari Doab Colony where these temporary leases were given on an extensive scale and the increase is due partly to the greater demand for temporary cultivation in the Colony chaks owing to the high prevailing market price of cotton, a crop which thrives in the Colony, and partly to a recent enhancement in the malikana rates charged for such leases. Royalties on kankar, stone and coal realised Rs. 52,000, or Rs. 14,000 more than in the previous year. In Jhelum the coal industry is continuing to progress satisfactorily and the output of coal from the mines during the year was nearly 40 000 tons. The operations of the two firms engaged in the oil industry in the same districts were still hampered by the want of necessary machinery. Under "Tirni" and "Other items" the receipts have fallen by Rs. 16,000 and Rs. 17,000, respectively as compared with the previous year. In the case of the former head the decrease is due to scanty rainfall and to extensions of cultivation. The uncollected balance for the whole province at the close of the year amounted to Rs. 73,000 after deduction of a sum of nearly Rs. 40,000. incorrectly shown as a balance in the Gujranwala district, this amount being apparently not an established demand and therefore not an uncollected balance.

Land Revenue assignment. Statement X.

6. A large number of new grants in the form of personal muafis for life varying in value from Rs. 10 to Rs. 100 per annum in each case were given during the year as rewards for good services in connection with the war. The total number of such grants and the amount of

the land revenue assigned amount to Rs. 651 and Rs. 14,910 respectively for the Ambala, Jullundur, Lahore and Multan Divisions. The figures for the Rawalpindi Division were not yet available when this report was being written. Three grants of Rs. 600 per annum each were also made to 3 Indian Mutiny veterans, while a grant of the same amount was released in favour of Rai Bahadur Lal Singh, Sub-Assistant Superintendent in the Survey of India. There is an increase of Rs. 10,324 in the total revenue assigned in the Ferozepore District mainly on account of progressive assessments. A decrease of Rs. 35,677 in assigned revenue in the Gujranwala District as compared with the figures for 1917-18 is due to a decrease owing to unfavourable agricultural conditions in the sown area of lands the fluctuating land revenue of which is assigned. No important grants lapsed during the year.

Coercive Processes. Statement XI.

7. The total number of coercive processes issued amounted to 9,597 a considerable decrease on the figures of 11,434 and of 12,430 for 1917-18 and 1916-17 respectively. The amount of arrears for the realization of which these processes issued was 7·72 lakhs against 10·87 lakhs in 1917-18 and 95 per cent. of these arrears were collected. Collections made after issue of processes amounted to 1·91 per cent. of the total collections made. Of the 9,597 processes 5,571 were writs of demand and of the remaining 4,026 only 2,442 were executed. Of these 2,442 processes 1,753 were for arrest, 3 for imprisonment, 660 for distress and 22 for sale of moveable property. The largest number of warrants for arrest were issued in the districts of Jhang, Multan, Muzaffargarh, Dera Ghazi Khan, Lahore, Karnal, Gurdaspur and Gujranwala. The districts with the largest number of actual attachments in cases of distress was Gujranwala where 252 such attachments were effected. Only four actual attachments of immoveable property took place during the year. There were no cases of direct management, farm or transfer. Processes were issued in 9 districts for the recovery of canal water rates, and in 10 districts for the recovery of other demands not included in land revenue. The total number of processes issued against lambardars was 3,309 against 3,535 issued last year or a decrease of 226. Processes issued at the instance of lambardars have decreased from 7,869 in 1917-18 and 9,247 in 1916-17 to 6,288 for the year under report. The general decrease in the number of processes which had to be issued shows that in spite of an unfavourable agricultural year the land-owners were able to pay their revenue without difficulty. With the high prices now prevailing the land revenue demand is now very lightly felt in all districts unless there is very extensive crop failure. Where this occurred during the year the revenue payers were relieved by the liberal grant of suspensions of land revenue.

Process Serving Establishment.

8. Six districts entertained temporary assistance for short periods for serving coercive processes for recovery of land revenue at a total cost of Rs. 308. In all other districts the processes were served by the tahsil peons. The attention of all Commissioners was drawn to the remarks made in paragraph 3 of the Government review of last year's report and they were instructed to extend the system of service of revenue processes other than those for the recovery of land revenue through the post wherever conditions were favourable to it. The system is reported to have worked well during the year in Karnal, Ambala, four tahsils of Ferozepore, Amritsar, Attock, Rawalpindi, and Muzaffargarh districts and the Kasur Sub-Division. It has been introduced in the Jullundur District. In Muzaffargarh and also apparently in Amritsar District it appears to have been used in some cases for service of writs for recovery of land revenue which is contrary to the procedure prescribed in paragraph 9 of Standing Order 29. In the Moga Sub-Division difficulty was experienced owing to the fact that some of the processes sent by post were not returned and when the persons against whom the summons were issued did not appear in court, a fresh summons had to be issued through a process-server. The Deputy Commissioner hopes that this difficulty will be overcome if sufficient time is allowed by the Courts for the service of the processes and for the return of the acknowledgment slip or of the original cover as the case may be. In cases where neither the process nor the acknowledgment slip is returned by the Post Office the Deputy Commissioner thinks

it will be easy to trace the missing cover and get a few postal peons adequately punished for their negligence. The system is not favourably reported on by the Gujranwala Courts and the Deputy Commissioner thinks this may be due to passive resistance to the introduction of the change and also to the fact that its working has been hampered by village postmen learning and adopting the methods of the process-server. In Dera Ghazi Khan the system is still under trial. As noted in the last year's report the parties concerned either decline to take delivery or they evade service. The Courts were, however, instructed to treat such cases in the absence of special circumstances as if service had been effected. The advantage in the opinion of the Deputy Commissioner of the ordinary system over that of the postal system is that in the case of the former the party to be served is told by the process-server what the contents of the notice are while in the case of the latter he has, if illiterate, to get it read to him by some one. On the whole the result of the year's working seems to the Financial Commissioners to be distinctly encouraging though it is to be regretted that the introduction of the system has as yet resulted in little or no reduction in the number of process-servers. The attention of Deputy Commissioners will again be drawn to the fact that the scheme was introduced with the object of effecting this reduction and that where it is working successfully they should endeavour to reduce the number of process-servers.

Progress in remeasurement, revision of records, etc.
Statements XII and XIII.

9. There were four settlements in progress during the year. In Ambala the new assessment was announced and distributed in both the Ambala and Naraingarh tahsils with the exception of the Morni hill tract. The new assessments have been well received and have given rise to no complaints. In Kangra the re-assessment of the Nurpur tahsil was completed and operations came to a close in that district in January 1919. The new assessments of this settlement have also been well received. In the Multan Settlement operations commenced in the Multan, Shujabad and Lodhran tahsils at the beginning of the year, but owing to the late arrival of the full staff and a serious outbreak of influenza measurement work was somewhat retarded. Leeway has however been made up and the outturn during the year was satisfactory. Measurement work has been entirely completed in the Mailsi and the Kabirwala tahsils and all the new records filed. In the other three tahsils the provisional programme has been considerably exceeded and by the end of the year the new records of 409 villages with their connected papers had been filed. The riverain survey the Chenab and Sutlej was completed and maps and records prepared on the data supplied by the Survey Department. In the Dera Ghazi Khan district measurements in the Jampur and Rajanpur tahsils were finished thus completing the re-measurement work of that district. The new records of the Sanghar and Dera tahsils were completed and filed while in the other two tahsils they were nearing completion at the close of the year. The hill torrent records of Sanghar have been completed and those of the Dera tahsils are being finally attested. In the Lyallpur district the re-measurement of 27 estates, situated in the Upper Chenab Canal Colony, the greater part of the area which had been allotted was started during the year for the purpose of preparing a record-of-rights. The work has been completed in 15 estates. In the Dipalpur and Pakpattan tahsils of the Montgomery district and in the Sirsa tahsil of the Hissar district where setttlement operations were due to begin in October, 1919, scrutiny of the current jamabandis, the writing-up of mutations and the checking of existing field maps were undertaken by an advance settlement staff during the year. The assessment reports of the Jagadhri tahsil and of the Morni tract of the Naraingarh tahsil of Ambala district, of the Kabirwala tahsil of Multan district and of the Jampur and Rajanpur tahsils of Dera Ghazi Khan district were received by the Financial Commissioner during the year. The Kabirwwala report was submitted to Government with the Financial Commissioner's review before the close of the year and the other reports were similarly submitted after the close of the year. Government orders have since been passed on all these reports except that of the Mailsi tahsil.

Final Settlement Reports.

10. The orders of Government were received on the Final Settlement Report of the tract in the Shahpur district lying outside the irrigation limits of the Lower Jhelum Canal. In the Thal and Mohar circles of the Khushab tahsil the term of

settlement has been fixed for 15 years subject to the condition that it will be open to revision in any estate on the earlier introduction of irrigation from the Sind Sagar Canal. It is anticipated that a considerable part of the Mohar Circle will come under irrigation from this canal, but should the canal not be constructed within the term of settlement now sanctioned Government has ordered that the question of the extension of that term can be reconsidered for this circle. In the rest of the tract under settlement the term will be 30 years.

Comparison of estimates and forecasts in regard to duration, cost and results. Statements XIII and XIV.

11. The Kangra Settlement was the only settlement which came to an end during the year. The Final Settlement Report of the Nurpur, Palampur and Kangra tahsils has been received and has been reviewed by the Financial Commissioner and will shortly be submitted to Government. Settlement operations began in these three tahsils in October 1913 and it was then anticipated that the work would finish in September 1916. Owing however to various causes such as the breakdown in health of the Settlement Officer first appointed, the necessity for complete remeasurement in most difficult country, the delimitation of areas containing Government trees and other intricate forest questions, it was not found possible to complete the work by the date fixed and the period was eventually, with the sanction of Government, extended up to the end of January 1919, when the operations were finally completed. In consequence of these extensions the cost of the operations was exceeded, the actual cost being 4·79 lakhs against an estimate of 3·48 lakhs in the forecast report. The cost will be recovered in seven years from the enhanced demand. The enhancement sanctioned was Rs. 69,977 or 14·5 per cent. Including the tahsils of Dera and Hamirpur the actual enhancement anticipated for all five tahsils in the forecast report was Rs. 80,000 or 9 per cent. while the enhancement actually sanctioned amounts to Rs. 1,05,077 or 12·9 per cent.

Proposed future Settlement operations.

12. The Forecast reports of the Muzaffargarh district and of the 527 villages on the Jhang Branch, Circles I, II and III and the Gugera Branch Circle I in the Lyallpur district and of the tract irrigated by the Lower Jhelum Canal in the Shahpur district have been received. The two former are under consideration. In the case of the latter further information has been called for. Partly owing to their excellent war services the term of settlement of the Jhelum and Rawalpindi districts has been extended by 10 years, while that of the Talagang tahsil has been extended so as to expire simultaneously with the settlement of the Attock tahsil in Rabi 1925.

Settlement Staff.

13. Settlement operations came to an end in the Ambala and Naraingarh tahsils during the year. The field staff in the Jagadhri tahsil was reduced. All the remaining settlement staff in Kangra was transferred by January 1919 when operations came to an end. Two naib-tahsildars and 13 kanungos were sent as advance staff to the Sirsa Tahsil during the year and three naib-tahsildars and 20 kanungos were similarly sent to the Dipalpur and Pakpattan tahsils in both of which tahsils settlement operations were due to begin on 1st October, 1919. In Dera Ghazi Khan the staff of the two northern tahsils was all transferred while that of the two southern tahsils was reduced during the year. Great difficulty was experienced in providing the requisite number of patwaris for the riverain measurements in the Rajanpur tahsil.

Surveys.

14. The Punjab Riverain Detachment of the Survey Department carried out riverain surveys on the Indus, Sutlej, Chenab and Ravi rivers in connection with the Dera Ghazi Khan, Multan and Muzaffargarh settlements. Five hundred and fifty-six linear and 611 square miles of main circuits and 3,115 linear and 611 square miles of minor traverses were executed, and 944 theodolite stations of the former and 13,003 of the latter in 179 villages were fixed in the area under river action Corners of 342 squares were demarcated in 982 square miles with permanent mark stones on both banks of the rivers Indus, Sutlej, Chenab and Ravi to serve as bases for the future survey and demarcation of boundaries and fields in the beds of the rivers. Two thousand and thirty-four plotted and 646 boundary large scale mapping sheets and 41 four-inch sheets were traced and supplied to the Settlement Officers concerned. Besides these 436 boundary large scale mapping sheets were partly compiled and 190

miscellaneous traces were prepared and all the traverse stations marked during the year were plotted on 38 four-inch sheets. Corners of 51 rectangles were demarcated with pegs in 22 square miles forming 46 blocks and 176 stations were fixed with theodolite and 34 linear miles traversed in 5 riverain villages on the Sutlej in the Mailsi tahsil of the Multan district. In the Jhelum town survey 209 stations were fixed with theodolite and were permanently marked with stones, and 23 linear miles were traversed in 1,280 acres. Two plotted sheets on the scale of 16 inches to a mile were supplied to the Deputy Commissioner of Jhelum. The total expenditure of the detachment during the year was Rs. 1,17,074.

Topographical survey operations were continued under No. 1 Party (Northern Circle) of the Survey of India which surveyed an area of 1·68 square miles of Lahore City Railway Station and part of Anarkali, and 0·51 square mile of Ferozepore City and City Railway Station on the scale of 16 inches to one mile for the purpose of Town Guide Maps.

Rectangular survey operations in connection with the Sind-Sagar Canal and Colonization project were continued during the year 1918-19 by the Sind-Sagar Party, with the assistance of a revenue staff of tahsildars, naib-tahsildars, kanungos and patwaris deputed for service with the Party. From the temporary marks fixed by triangulation in field season 1917-18 and those fixed by traversing in field season 1918-19 1920 4,000-acre corners and in some cases 2,000-acre corners forming 1,342 4,000-acre rectangles (partial and complete) were located on the ground over an aproximate area of 7,863 square miles in the Mianwali, Shahpur, Muzaffargarh and Jhang districts, and 623 4,000-acre rectangles (partial and complete) were broken into 23,324 100-acre rectangles over an area of 3,644·4 square miles in the Mianwali, Shahpur, and Jhang Districts, leaving 719 4000-acre rectangles (partial and complete) for 100-acre sub-demarcation to be undertaken next field season. Traversing for laying out temporary marks near the 2,000 and 4,000 acre corners which were used subsequently in the location of these corners was also carried out by the Party in a strip of thickly wooded country along the western edge of the Thal in the Muzaffargarh district in which triangulation was impracticable to a total length of 279·9 linear miles extending over an approximate area of 405 square miles.

Revisionary precise levelling was carried out by the Survey Department for a distance of 56 miles from the Pathankot-Palampur Road to the Chambi bridge and thence by the bridle road *vid* the Kotwali and Macleod Ganj Bazaars to Dharamkot Hill (Dharamsala).

Boundaries.

15. There was no important alteration in district boundaries during the year. No boundary disputes arose except in the case of two villages of the Multan district and Bahawalpur State. It is expected that this dispute will be amicably settled. Boundary pillars between the Pathankot tahsil of the Gudaspur District and the Basohli tahsil of the Jammu State were erected during the year.

Revenue record rooms.

16. In Ambala the want of accommodation noticed in last year's report has been remedied. An adjoining Court room has been added to the land record room and iron racks are being put in. It is reported that there will now be sufficient accommodation for all records of the present settlement. The absence of iron racks in Simla is still causing inconvenience. In Kangra a new room is being built for the records of the settlement recently closed while in Jhelum on the other hand the construction of the new Record room has yet to be undertaken and the difficulty alluded to in last year's report still continues. Accommodation in Montgomery is reported to be insufficient. The reports show that the destruction work now more than keeps pace with time-expired files in practically all districts. The Financial Commissioner believes that the simplification of procedure relating to work in Record rooms introduced on the recommendation of the Clerical Establishments Committee will to a certain extent obviate the necessity of building new Record rooms for some years to come. The copying rules were altered during the year and the difficulties experienced under the old rules are disappearing. The appointment of paid examiners was sanctioned during the course of the year and it is expected that this will secure better supervision and attestation.

The scheme of appointing a special kanungo to attend Civil Courts with revenue records and to prepare excerpts where necessary is reported to have been an unqualified success practically all over the province and its extension to Revenue Courts is under consideration.

Other matters.

17. Land and other revenue paid by money order during the year amounted to nearly 19 lakhs in 25 districts against nearly 18 lakhs in 23 districts last year. The system is growing in popularity especially with those who have small sums to remit or who live either at a distance from their tahsil head-quarters or in districts where communications are bad. It is stated that in the Jhelum district it is used frequently by lambardars who have been habitually dilatory in payments and who know that they will be taken to task for this if they go to the tahsil. The districts in which the largest amounts were paid by money orders were :—Karnal Rs. 2,65,000 (21 per cent. of the total land revenue), Gujranwala, Rs. 2,20,000, Lahore, Rs. 1,36,000, Jhang, Rs. 1,34,000, Gurgaon, Rs. 1,30,000, Muzaffargarh, Rs. 1,16,000, and Montgomery, Rs. 1,10,000 Revenue amounting to 7·90 lakhs was paid by currency notes remitted through the post in 24 districts, a considerable increase on last year's figures of 3½ lakhs in 12 districts. The districts showing the largest currency note payments are Gujranwala, Rs. 1,60,000, Sialkot, Rs. 76,000, Attock, Rs. 68,000, Jhang, Rs. 65,000 and Hissar, Rs. 52,000. Three districts (Ambala, Ludhiana and Ferozepore) have given no details separately of the two kinds of payments and the total sums reported by them for remittance through the post have therefore been given under money orders. The system of payment by remittances of notes through the post is undoubtedly gaining ground and will become more popular when the advantage of it becomes more generally known. In some districts, however, it has as yet made little headway. Some districts complain that arzirsals and chaukidar's receipts are not received with the remittances or if they are received that they are not correct. In this connection appropriate instructions were issued during the year.

The system of collection of land revenue on successive fixed dates for each village on a regular roster which has been introduced in certain districts continues to work satisfactorily, and has to some extent diminished clerical work in the treasuries in the Muzaffargarh district. In the Amritsar, Gurdaspur, Gujrat, Muzaffargarh and Dera Ghazi Khan districts the abstract village note-books were completed in the manner suggested in paragraph 110 of the Clerical Establishment Committee's Report by the Sadr Kanungo at the time of his visit to the tahsil office after the rabi jinswars had been filed.

In order to encourage the scientific study of the economic problems of the Province a very important step was taken by Government shortly before the close of the year. Arrangements were made for the creation of a Standing Board of Economic Enquiry. The Board as constituted is divided into two branches which are intended to deal respectively, the one with rural investigation and problems such as the size of holdings, the economic holding, the consolidation of holdings, agricultural indebtedness, the transfer and value of land and the incidents of tenancies, and the other with urban problems such as the housing of the poor, infantile mortality, prices of food and wages. The members of the Board are appointed partly *ex-officio* and partly by nomination by Government, the Financial Commissioners, the Director of Public Instruction, the Registrar, Co-operative Societies, and the Syndicate of the University. While the members will ordinarily each serve on one or other branch, the two branches will not be rigidly distinct but will work in co-ordination and when necessary hold joint sessions. Membership of the Board will be honorary, but Government has stated that it is prepared to finance the Board liberally in order to enable it to conduct research through the agency, when necessary, of paid investigators and to publish in a generally accessible form the results of its enquiries.

The appraisement system of girdawari was recently tried for four harvests in 9 districts in the circles of specially selected patwaris. The Revenue Officers of the districts concerned gave their special attention to the supervision of the experiment which was also kept under special observation by the Director of Land Records and his Assistants. The opinions of the majority of these officers based on the results of the experiments were unfavourable to the introduction of the new system and after careful consideration of the matter it was decided to discontinue the experiment and to maintain the present system. The main difficulties found in endeavouring

to work the system were the extra time required for the girdawari, the inability of many patwaris to estimate outturn with a sufficient accuracy and the absence of fully reliable standards of produce for different classes of land.

Instructions were issued during the year with a view to the improvement of the existing method of preparation of crop forecasts in accordance with the recommendations of a Conference of revenue and agricultural officers and representatives of commercial firms held at Lyallpur in 1917. In order to arrive at more accurate figures in the preliminary forecasts of area, it was decided by Government as an experimental measure that in the preliminary forecasts of wheat and cotton for the colony districts the estimate of area should be built up from estimates made by patwaris. The Conference of 1917 had further suggested that the estimates of outturn contained in the final forecasts were defective :—(1) because the original percentage estimates are framed with reference to the various ideas of what is a normal crop entertained by the numerous tahsildars employed in framing them, whereas the normals with reference to which the percentage estimates are subsequently converted into maundage estimates are fixed quantities which may be quite different from the normals assumed in the original estimates ; (2) because little or no use is made of the special knowledge of officers of the Agricultural Department. It has therefore been decided to have the original estimate made by the tahsildars in maunds and seers per acre, no standard or normal being laid down for their guidance. In order to associate the Director of Agriculture and the officers of his department more closely in the work of estimating outturns it has been decided that, as a rule, the Director of Agriculture should in future prepare the final forecasts of all crops which are at present prepared by the Director of Land Records. Steps are also being taken by which officers of the Agricultural Department when on tour will take every opportunity of testing the capacity of tahsildars and other revenue functionaries to estimate outturns in maunds and seers and of instructing these officials in the best methods of making such estimates. The Agricultural Department is at present working out a scheme for arriving at standard outturns by proper crop experiments in fields selected so as to leave as far as possible only the errors of random sampling and to minimise these. Such experiments are highly desirable both from the point of view of agricultural science and development as well as from that of revenue administration.

17-A. In order to supply figures required by the Franchise Committee constituted in connection with the Reform Scheme statistics were collected during the year from all districts of the number of land-owners in each district paying not less than Rs. 20 per annum of land revenue and also of all village headmen. Revenue-payers were divided into six grades and lambardars into three grades according to the amount of land revenue they paid. Females and minors were excluded from the figures and only adult males of not less than 21 years of age were included. Instructions were issued so as to ensure that so far as practicable no land-owner or village headman would be counted more than once in the same district. The collection of this information entailed much labour and it necessitated the assembling of all patwaris at tahsil headquarters where they worked under the direction of field and office kanungos and tahsildars or naib-tahsildars, the whole work being supervised by Revenue Assistants and the sadr kanungos. The statistics so compiled are of considerable interest and the Financial Commissioner thinks some reference to them will not be out of place in this report. As regards the number of land-owners who pay not less than Rs. 20 per annum in land revenue, the statistics show that by Divisions the figures are :—

Ambala	60,045
Jullundur	71,869
Lahore	86,312
Rawalpindi	34,421
Multan	64,891

or a total for the whole Province of 317,538 as compared with a total of 3,954,317 of all land-owners given in column 5 of statement III appended to this report. In the latter figures however both minors and females are included, while in the former they are excluded. Similarly the figures in the latter are swollen to some extent owing to some land-owners being counted

more than once whereas the figures of the former are as far as possible free from this defect. The statistics thus show that so small a proportion as somewhat less than one-tenth of the land-owners of the Province pay not less than Rs. 20 as annual land revenue on the land owned by them while somewhat more than nine-tenths or 90 per cent. pay less than that sum. This result serves to exhibit in a vivid light the extent to which the Province is one of small peasant proprietors.

As regards lambardars or headmen the statistics show that by Divisions the total figures are—

Ambala	14,731
Jullundur	12,568
Lahore	15,978
Rawalpindi	9,777
Multan	9,169

or a total for the Province of 62,223. Of this total of lambardars over one-half pay less than Rs. 25 annual land revenue for the land owned by them. Proposals for the reduction of small and unnecessary lambardaris are constantly being dealt with by the Financial Commissioner and the table appended shows the number of cases of reduction which have been decided during the last three years :—

	Cases in which the reduction of lambardaris has been sanctioned.	*Cases in which proposals for reduction have been rejected.*
1916-17	116	19
1917-18	97	27
1918-19	90	33
Total ...	303	79

It was considered desirable during the year to lay down somewhat more definitely than had hitherto been done the principles and the more important matters which should receive due consideration in framing proposals for reduction and this was accordingly done in correction slips issued to paragraphs 330—332 of the Land Administration Manual.

Enhancement of rent. Statement XV.

18. The number of suits brought for enhancement of rent was 681, of which 570 were successful. The similar figures for the previous year were 1,035 and 920. The figures are too small to call for any special explanation of the reduction and no very satisfactory reasons have been put forward in the district reports. It is perhaps sufficient to say that in the districts where cash rents paid by occupancy tenants are common a period has elapsed since the last reassessment of land revenue sufficient to exhaust or materially reduce the remaining cases in which such suits are likely to be instituted. Cash rents of tenants generally are reported to be rising in Hissar, Rohtak and Ferozepore owing to the rise in prices of agricultural staples. The number of suits for reduction of rent has fallen from 28 in 1917-18 to 5 this year.

Ejectment. Statement XVI.

19. There were only 11 decrees for ejectment of occupancy tenants under section 39 of the Tenancy Act as against 111 decrees last year. The total number of ejectments of occupancy tenants actually made was 15 against 48 in the previous year. There has again been a large decrease in the total number of applications for service of notice of ejectment and of notices of ejectment of tenants-at-will and in consequence the aggregate number of ejectments was only 2,838 against 3,992 last year. The chief reasons given for the decrease are bad seasons, the influenza epidemic, the disturbances, scarcity of tenants and enlistments in the army. No reason is given for a large decrease in Ferozepore and Amritsar districts. A marked scarcity of tenants in the non-colony portion of the Montgomery district is attributed to emigration to the Lower Bari Doab Colony.

Descent of Jagirs Act.

20. No jagir was notified during the year under the Descent of Jagirs Act. The total number of jagirs notified under the Act is 149.

Canals under departmental management.

21. Owing to the failure of the monsoon of 1918 the demand for canal water for the Kharif harvest on the perennial canals was very keen and was on the whole satisfactorily met, as the river supplies, though lower than usual, were under complete control. There was a scarcity of water, however, for rabi sowings, much of the water available in the autumn being used by the cultivators for the maturing of their kharif crops. Taking the year as a whole most of the districts receiving irrigation from perennial canals report an increase in the area irrigated as compared with 1917-18. Thus the irrigated areas in the Karnal and Ambala districts served by the Western Jumna Canal, in the Ludhiana and Ferozepore districts served by the Sirhind Canal, in the Gurgaon district served by the Agra Canal and in the Amritsar district by the Upper Bari Doab Canal, all show increases. Owing to the failure, however, of the supply in the Western Jumna Canal due to the trouble at its head the area under irrigation in Hissar decreased from 172,633 to 167,831 acres. There was an increase of 75,000 acres in the area irrigated by the Upper Chenab Canal in the Gujranwala district owing to extension of irrigation from that canal. The Lower Chenab Canal worked well in the Lyallpur district where the irrigation was on the whole satisfactory and generally no complaints of the shortage of water supply were made, but in the Jhang district the supply both in this canal and in the Lower Jhelum Canal was short and in consequence there was a decrease in nahri cultivation. There was also some decrease in the area irrigated in the Shahpur district by the latter canal owing to short supplies. The working of the Lower Bari Doab Canal in Montgomery and Multan districts has been noticed in the Colony Report. In the Gujrat district 394 villages and chaks were irrigated by the Upper and Lower Jhelum Canals. Owing to the difficulty found in practice in working the existing rule prohibiting canal irrigation to well areas in zone C of the Upper Chenab Canal area, the penal rate charged on such irrigation has been suspended temporarily pending reconsideration of the zonal system of irrigation which was originally introduced on the Upper Chenab Canal. The measures adopted by the Canal Department for checking water-logging in the Wazirabad and Hafizabad tahsils continue to afford much relief, 274 acres of water-logged land having been brought under cultivation during the year. Action has been taken by the Irrigation Department to remedy the water-logging in some villages in the Gujrat district referred to in the last year's report, but so far with little success. The problem is a large one as the damage already done is considerable and tends to increase. As a measure of relief some land has been given out on temporary cultivation to some of the villages damaged by water-logging while remissions of revenue have been allowed to five other villages owing to the same cause. The whole question is now under the consideration of the Drainage Board. Low river supplies and climatic conditions adversely affected the working of the Inundation Canals under departmental management. The area matured by the Upper Sutlej series in Montgomery district decreased from 317,029 to 165,082 acres and the amount of water advantage rate realised fell from Rs. 2,35,247 to Rs. 1,41,336. The Khanwah Branch of this series failed almost entirely owing to defects at the head. The poor results shown for the year by these canals were, however, partly due to the influenza epidemic which interfered with rabi sowings. The inundation canals in the Multan district did not run well and supplies ceased before the usual date. The Sidhnai series matured 193,474 acres on which the consolidated land revenue and water rate amounted to Rs. 5,15,031. The Chenab series matured 97,573 acres and the Sutlej series (including the Hajiwah) 145,056 acres. The head of the Mailsi Canal in this latter series has recently been changed. The Financial Commissioner has recently seen something of the Sutlej and Chenab groups of canals in the Lodhran, Shujabad and Multan tahsils in connection with the re-assessment of land revenue now in progress. Their function is one of overwhelming importance for the tracts concerned and it appears on the whole to be performed satisfactorily in spite of the natural difficulties which have to be faced. Complaints of insufficient or unpunctual supply are, as might be expected, numerous, but most

of them appear to be inevitable in view of the essential conditions of irrigation from canals of the inundation type and many of them are more or less groundless. At the same time the Financial Commissioner is more than ever impressed with the vital need for the most skilled and unremitting supervision which exists in the case of canals of this kind. In Muzaffargarh, in spite of the low state of the rivers and a dry year, the inundation canals worked fairly well. The Chenab river rose sufficiently high early in May to enable most of the canals served by it to be opened in the middle of that month. Supplies in the river were low, however, for the rest of the season and consequently some of the canals did not work satisfactorily. The Indus series began to flow on the 11th May and continued to give irrigation until the middle of October, the usual date of closure. The effect of closing the Magassan and Magi Canals, which run through *soma* lands, on the 15th October has been beneficial as it enabled the lands to dry more quickly and consequently to be fit for rabi sowing. The question of a drainage scheme for the whole district is under investigation, but so far no really sound and comprehensive scheme has been framed. The relief drainage of Sanawan village has now been working for some time and has been of benefit to the village. The inundation canals in Dera Ghazi Khan opened about the first week of May 1918, but the river remained low throughout the season and irrigation from most of the canals was consequently insufficient. The receipts from water advantage and occupiers' rates accordingly fell from Rs. 2,00,196 in 1917-18 to Rs. 1,73,207. The only canals in which the flow was satisfactory were the Chibri, Sahiban and Nur Dhundi. The Nur Dhundi ran till a late date and proved of immense help to the Dhundi Estate for the rabi crops.

The total area irrigated in 1918-19, by all the canals in the Province under departmental control, amounted to 9,015,984 acres including 600,511 acres in Native States and the total area matured by them 8,571,442 acres including 597,025 acres in Native States. The irrigated and matured areas in 1917-18 were 9,063,892 and 8,437,724, respectively, including Native States. The total value of the crops raised has been estimated by the Irrigation Department to be Rs. 55,08,14,095 as compared with Rs. 33,36,99,916 in 1917-18, the increase being mainly due to the rise in the value of agricultural produce. The average value of the produce per acre matured in the year under review has been estimated at Rs. 64 for which the cultivator had to pay only Rs. 5-3-0 for water rates. It is interesting to note that the total value of the canal irrigated crops for the year according to this estimate amounts to two-and-a-half times the total capital outlay on all the canal systems up to date. The length of canal channels in operation at the end of March 1919 was 19,654 miles, of which 4,408 miles were main and branch canals and 15,246 miles distributaries. Five miles of main and branch channels and 120 miles of distributaries were opened for irrigation for the first time during the year.

Canals under district management.

22. Owing to the failure of the rains, fewer floods and low rivers the area irrigated by the canals and other irrigation works under district management shows a decrease as compared with 1917-18. The area matured by the Gurgaon bunds decreased from 10,441 acres in 1917-18 to only 1,081 acres for the year under report and in consequence the income realized was only Rs. 2,085 as against Rs. 15,000 in the former year. Owing to the damage done by the heavy floods of 1917 expenditure on maintenance and repairs of these bunds was slightly greater this year. A special grant of Rs. 20,000 was made by Government towards the repair of this damage, but a considerable portion of this amount does not appear to have been spent. The Rangoi Canal in Hissar irrigated only one acre in the kharif and 576 in the rabi against 574 and 13,905 acres last year. This was due to low supplies in the Ghaggar river. Owing to the deepening of the bed of that river by erosion no overflow can take place into this canal until the river floods reach a height of 10 feet. There was a decrease of 21,000 acres in the irrigated area on the Sarusti Canal in Karnal, the area actually irrigated being only 15,000 acres against 36,000 acres in 1917-18, and the receipts for water rate fell from Rs. 64,399 to Rs. 22,439. The expenditure on maintenance was Rs. 18,000 against Rs. 17,000 last year. The water channels or *kuhls* in Kangra worked satisfactorily and were well managed. A new record of customs relating to each *kuhl* has recently been drawn up. The Shah Nahr Canal in Hoshiarpur irrigated 15,632 acres against 15,687 acres

in 1917-18, the area matured being 13,486 as against 15,540 acres in the latter year. The total receipts amounted to Rs. 28,616 and the expenditure to Rs. 35,000 and there was a closing balance of Rs. 37,000 in hand. Owing to the high cost of materials the programme of new works had to be curtailed and a revised programme has been drawn up.

There was a decrease in the area irrigated by the Grey Canals in Ferozepore from 149,000 acres in 1917-18 to 83,000 acres in the year under report, while the matured area fell from 111,000 acres to 57,400 acres and the income from Rs. 2,36,206 to Rs. 1,77,000. The decrease in irrigated area was due mainly to lowness of the river Sutlej and to defective working of some of the canal heads. The large proportion of crop failure is attributable to deficient rainfall and to defective supplies in the canal in the latter part of the irrigating season. The canals also suffered during the year from several changes in the post of Superintendent and this hampered their efficient management. At the same time the Financial Commissioner is satisfied that a much closer degree of control and supervision over the work of girdawari and assessment is required. He is glad to learn that there has recently been a considerable improvement in supervision. Silt clearances were carried out in 41 miles of head reaches and 140 miles of main channels and branches during the year. Out of the Government and District Board contributions special silt clearances were carried out for a length of 24 miles of the Mubarikwah Canal, and it is satisfactory to note that very good results were obtained by this clearance. Due attention is being paid to the reduction of the loans raised for the Kingwah and Ilahwal Canals.

The minor canals and irrigation works in the Montgomery district all show decreases in their flooded and matured areas owing to inadequate rain and low river supplies and partly also owing to the influenza epidemic. One irrigation work, the Mary Bund, was however washed away by river floods. The total area irrigated by all these works was 25,000 acres only against 58,000 acres in 1917-18 and the matured area 15,000 against 48,000 acres in the previous year. Owing to an almost complete failure of the monsoon rains over the Namal catchment area in Mianwali the supply in the Namal reservoir on the 1st October 1918 was only 552 million cubic feet which was barely sufficient for the rabi crop. The lake was completely dry by the 14th March 1919 and had not some rain fallen in May no zaid rabi crop could have been irrigated The total area matured was 12,897 acres, and the water rate collected Rs. 49,581 against Rs. 42,478 last year. This is a distinct advance over previous years having regard to the volume of water used. The duty per cusec in the rabi of 1919 was 258 acres and the average depth of water over the area irrigated was 1·40 feet against 177 acres and 2·20 feet respectively in the previous year. These figures would tend to show that the methods of irrigation have much improved and that the cultivators are beginning to realise that economy in the use of water leads to increased prosperity. The Deputy Commissioner however thinks that it is doubtful whether the irrigators really have learned much about economy in the use of canal water. The fact is, he states, that the lake ran dry and it was impossible to give all the water that the irrigators asked for. In spite of this the crop was a very fair one and in the civil station of Mianwali the yield on the District Board Farm was over 16 maunds to the acre. The Kurram Canal in Isa Khel and the Indus streams in Mianwali and Bhakkar tahsils worked well. The proposal to construct a weir in the Kurram and the Kotki Dam scheme are still under the consideration of the Irrigation Department. The hill torrents in Dera Ghazi Khan did not flow satisfactorily for want of rain.

Land Acquisition Act.

23. The total area acquired during the year shows a falling off from 2,844 acres to 1,073 acres. The decrease occurs under all the heads, but is most marked under the head " Canals " for which only 516 acres were acquired as against 1,651 in the previous year. It was reported last year that compensation for 2,844 acres exceeded Rs. six lakhs. The compensation for 1,073 acres this year is very nearly the same as last year. The reason for this high average is the inclusion of some very valuable land. It has been reported that in the Lahore city alone, the acquisition of 20·31 acres entailed an expenditure of Rs. 2,64,818. Speculation in land in the urban area of Lahore is very active. The provisions of the Act seem to have been observed generally all over the Province except that the Rawalpindi report shows that the military authorities have

occupied about 640 acres of land at Chak Lala without the publication of a gazette notification. The prescribed registers have been reported to be duly kept.

Altogether 559 acres were surrendered during the year. The area surrendered in Hissar alone amounted to 219 acres; and out of this 196 acres were restored to the original owners In the Multan district also, the area restored was considerable, being 125 acres. No compensation had been paid at the time of the acquisition of these 125 acres and this area was accordingly restored to the original owners free of any charge.

The work is fairly well in hand; but the district returns show some very old cases. A case of 1917 has been reported to be still pending in Sialkot, while another of 1916 is said to be pending in Montgomery. Commissioners of Divisions should pay particular attention to the prompt disposal of all claims for compensation.

Land Improvement Loans Act XIX of 1883.
Statements XVII, XIX, XX, XXI and XXII.

24. The amounts advanced for land improvements rose from a little less than Rs. 77,000 in 1917-18 to Rs. 1,80,000. Rs. 2,16,000 were realized on account of principal outstanding loans, leaving Rs. 9,407 arrears. Collections on account of interest amounted to Rs. 81,046 and the corresponding arrears to Rs. 3,662. Arrears both of principal and interest were less than last year. The interest collected represented Rs. 6-13-8 per cent. of the mean outstanding balance. The average percentage for the last 10 years has been Rs. 6-1-7. The provincial gain on the year's working has been Rs. 28,230. Remissions of land revenue were given for 970 wells which fell out of use and protective certificates for 1,326 new wells.

As was the case last year except for the construction of embankments in a few districts taccavi loans were taken practically in all cases for the repairs or construction of wells. The advances made were with few exceptions utilized for the purposes for which they were obtained and the works constructed by the help of the loans were duly inspected in the course of construction by the tahsil officers when on tour. The districts where the demand for loans was keenest were Montgomery (Rs. 36,600), Gujranwala (Rs. 28,150) principally in the chaks in the Upper Chenab Canal Colony receiving only kharif canal irrigation, Gurgaon (Rs. 20,550), Multan (Rs. 16,000), Mianwali (Rs. 11,860) and Muzaffargarh (Rs. 11,660) and Sialkot (Rs. 11,250). Few or no loans were taken in Hissar, Karnal, Lahore, Jhelum, Rawalpindi, Lyallpur and Jhang districts. The recovery of advances was satisfactory. Though there has been a considerable increase in the amount advanced during the year as compared with the previous year, a number of causes, mainly occasioned by the war, such as the remittance of earnings of men on military service, the continued high prices of material and the dearness and scarcity of labour, have operated to restrict the demand for loans. The increase may therefore be considered satisfactory and it is hoped that the measures recently approved by Government for making these loans more popular will result in a still greater increase next year. There is no doubt however that the increasing prosperity of the agricultural classes makes it more and more easy for them to finance their own agricultural improvements. Out of the total number of 2,704 new wells sunk during the year, only 172 were constructed with the aid of Government loans, while advances were taken for the repairs of 5 wells only out of the total number of 592 wells repaired during the year.

Loans under the Agriculturists Loans Act XII of 1884.
Statements XVIII, XX, XXI and XXII.

25. The amount advanced under the Agriculturists Loans Act rose from 3·1 lakhs to 8·9 lakhs. The balance outstanding at the end of the year rose from 3·4 to 8·5 lakhs. There has been a decrease of arrears on account of principal from Rs. 42,893 to Rs. 34,680 which is very satisfactory in view of the unfavourable agricultural conditions of the year. Advances were recovered without much difficulty except in Multan district, where the instalments of loans were not generally paid up by the due date, this necessitating the exaction of penal rates of interest. Arrears of interest amount to Rs. 2,068. The interest realized amounted to Rs. 2-15-11 per cent. on the mean balance and there was

a provincial loss for the year's working of Rs. 14,515. This loss will however be recovered next year as it merely is due to the large amount of advances made during the year on which interest had not yet begun to accrue. The average rate of interest received on the mean balances for the past 10 years is Rs. 5-10-1.

The large amount advanced in loans during the year under report is due to the failure of the monsoon in 1918 with a consequent bad kharif and poor rabi. There was great scarcity of fodder during the year and large sums were advanced for the purchase of fodder, for the import of which from canal irrigated districts concession rates for railway freight were granted to a number of districts during the year. Further with good rains in the earlier part of the monsoon season of 1919 there arose a considerable demand for advances for seed and for purchase of cattle to replace those that died or were sold in the period of fodder scarcity, two consecutive inferior harvests having caused a heavy drain on the resources of the zamindars. The demand for loans was heaviest in the south-eastern and south-western districts, Gurgaon (Rs. 1,40,000), Muzaffargarh (Rs. 1,35,000), Multan (Rs. 1,01,000), Rohtak (Rs. 84,000), Dera Ghazi Khan (Rs. 66,000), accounting for nearly one half of the total amount advanced. Advances were also heavy in Montgomery (Rs. 61,780), the advances being made both in the area oustide the irrigation limits of the Lower Bari Doab Canal and in the Lower Bari Doab Canal Colony. The advances were in most cases utilized for the purposes for which they were obtained. In Mianwali the Deputy Commissioner reports that it is not always possible to eliminate the applicant who really wants a cheap loan for private purposes only from *bonâ fide* applicants, as gambling rife amongst the Pathans of the district, specially in the villages which suffer most in a bad year so that the problem of selecting suitable recipients is not an easy one.

Forest Act and Government Lands. Statement XXIII.

26. The work of defining the limits of forest areas the trees on which belong to Government in Kangra Proper was completed and it is hoped that disputes about the rights of ownership of such trees in future will be few. This laborious work was done with very great care and it is satisfactory to find that there are no signs of any tendency on a large scale to contest the new entries in the Civil Courts. The work of delimiting the portions of these areas which will in future be under the control of the Forest Department and of the Deputy Commissioner respectively was also completed during the year by Mr. Mitchell, Assistant Commissioner, and Mr. Walters, Deputy Conservator of Forests, and their joint report on the delimitation in the Hamirpur and Nurpur tahsils was submitted to Government by the Financial Commissioner. Orders were passed by the Government on this report shortly after the close of the year and proposals were approved for the transfer of 139,795 acres of forest land to the control of the Deputy Commissioner, 37,799 acres remaining in charge of the Forest Department. The similar report for the remaining three tahsils has recently been submitted for the orders of Government. The forests already transferred to the Deputy Commissioner's control as an experimental measure in Nurpur tahsil in 1915 are reported to be in good condition and it is very satisfactory that the naib-tahsildar in charge has been able to secure the co-operation of the people in their successful management. Messrs. Mitchell and Walters also submitted their report on the delimitation of areas to be submitted to a scheme of rotational closure in Kangra Proper and this report is now under the consideration of the Financial Commissioner in consultation with the Conservator of Forests. The management of the Shahpur Kandi forests is reported to have been satisfactory. The income from these forests during the year was Rs. 5,304 and expenditure Rs. 3,720, leaving a net profit to the right-holders of Rs. 1,584 which they have decided to deposit in the Elliott Pahari Shamlat Bank. Resin and tapping work continues to be profitable and it is hoped to extend it from 5,000 to 10,200 blazes during the current year without increasing the existing establishment. An area of 45,687 acres of the Government Thal Rakhs in the Mianwali tahsil was leased out for cultivation during the year on a consolidated rate of Rs. 2 per acre matured. Owing to the failure of the monsoon, however, only about 4,000 acres were sown; on this an assessment of Rs. 5,562 was made, a decrease as compared with the preceding year of 4,897 acres in the area sown and of Rs. 12,314 in the revenue assessed. In the Bhakkar Thal rakhs an area of 3,806 acres was leased out for cultivation but no portion of it was sown owing to

want of rain. Orders have been passed with the approval of Government of India for the disforestation of the remaining area of the Montgomery reserved forest amounting to some 4,000 acres. This reserve situated near Montgomery town formed a rendezvous for stolen animals and also offered shelter to nomad graziers whose cattle emerged at night and destroyed the crops of the neighbouring colonists. The Commissioner thinks that the sooner the remaining small reserves scattered through the colony are disforested the better as they are proving a source of trouble for the same reasons. He also thinks that in addition to other disadvantages their existence retards the process of weaning the graziers of the Bar from their pastoral habits and prevents them from settling down to an agricultural life. The area under temporary cultivation in the Montgomery district decreased from 141,713 acres in 1917-18 to 93,112 acres for the year under report owing to a severe influenza outbreak at sowing time as well as to inadequate rainfall. In the Karnal district 18 squares of waste land were allotted during the year to 10 persons for meritorious service in recruiting. The total income from the forest and waste lands in this district during the year rose from Rs. 7,737 to Rs. 12,747 owing to the sale of trees in Bir Barason, and the sale of grass from the encamping-grounds. In Hoshiarpur the income from unclassed forests and other Government land under the control of the Collector decreased during the year by Rs. 3,428, *i.e.*, from Rs. 10,696 to 7,268, the decrease being chiefly due to the fact that a considerable number of chil trees had been sold at a price of Rs. 9,380 in 1917-18. In Ludhiana the total income from Government waste lands has risen from Rs. 3,573 to Rs. 12,644 owing to larger sales of wood from the Bhattian Rakh. The decrease in the income of the Gujranwala district is due to the fact that proprietary rights in a large area were granted to tenants, and in consequence the amount recovered as malikana during the year was Rs. 22,385 as against Rs. 1,16,625 during the last year. A considerable increase in the income of the Gujrat district is due to increase in cultivation owing to the extension of canal irrigation while in the Shahpur district an increase of income is due to leases for temporary cultivation sanctioned in order to increase the production of food stuffs. The arrangements in connection with the camel-browsing scheme for the 53rd Camel Corps in this district, referred to in last year's report, have been carried into effect. No explanation has been furnished for an increase of income from Government waste lands in the Multan district from Rs. 8,36,844 to Rs. 14,47,427, but it is probably due to an extension of cultivation following on the development of irrigation from the Lower Bari Doab Canal. There is an increase of Rs. 61,342 in the income, as compared with 1917-18, from forests and other lands under the control of the Collector in the Dera Ghazi Khan district, due to the fact that the Dhundi canals flowed throughout the twinter with a consequent good rabi harvest in the Dhundi Estate. Three forest fires broke out in the eastern, and 24 in the western circle of the Rawalpindi district, and 1,169 acres of forest area were burnt. Generally the fires were accidental and the adjoining villages proved helpful in extinguishing them. An area amounting to 9,476 acres was burnt during the year in the Kangra district. The Divisional Forest Officer reports that the fires in this area were due to incendiarism, that the forests were set on fire with the object of improving the grass and the grazing, and that the villagers for the most part gave little assistance in extinguishing the fires. Proposals to close some of these areas as punitive measure are under consideration. The total income from all unclassed forests and from other Government lands under the control of the Collectors amounted to Rs. 84,70,127 as against Rs. 75,10,170 in the preceding year.

Punjab Land Preservation Chos Act.

27. Government passed orders during the year approving of a proposal that action under section 5 of the Chos Act should be taken in the Rupar and Kharar tahsils and provided a grant to meet the esitmated expenditure on compensation. As the estimate for such compensation was however framed some years ago, it was at the same time directed that restrictions under section 5 should not be notified and enforced until the estimate had been revised and the amount of compensation had been ascertained and accepted by the Financial Commissioner or Government. Delay occurred in carrying out the orders of Government because the local officers formed the opinion that proceedings for the complete acquisition of the area to be afforested under the Land Acquisition Act were preferable to action under the Chos

Act and accordingly submitted a proposal to that effect. The Financial Commissioner however is of opinion that satisfactory afforestation of the Swaliks is quite possible under the Chos Act and he does not consider that action under the Land Acquisition Act is preferable nor is it for various reasons in itself desirable. He has forwarded the proposal of the local officers with an expression of his views to Government for such instructions as it may think fit to issue and meanwhile has directed that action under the existing orders of Government should be proceeded with and the revised estimate for compensation under section 5 of the Chos Act prepared. The appointment of a naib-tahsildar to supervise the area notified under section 4 of the Chos Act in the Rupar and Kharar tahsils and the protective and reclamation work undertaken elsewhere in the Rupar sub-division has been sanctioned by Government up to April 1922, while the employment of the existing forester and 6 forest guards has been extended for the same period. The proposal of the Financial Commissioner that a forest officer should be deputed to report on remedial measures in the Morni ilaqa and the Naraingarh, Jagadhri and Ambala tahsils have been approved by Government and it is intended that a forest officer shall be placed on this special duty as soon as one is available. The States of Patiala and Nalagarh have also been addressed through their Political Agents with a view to securing co-operation in preventive and remedial measures in the areas of these States which adjoin the Ambala district. Great efforts have been made to plant grasses in the hill torrent beds in Rupar and Kharar tahsils with the object of preventing further soil erosion. Plantations made by the Canal Department in the month of March succeeded whereas a large proportion of plants planted by the district staff during the rains failed. The Commissioner thinks therefore that the spring is the right time to plant. Ten cases were instituted in this district under the Chos Act, of which 6 ended in the conviction and 4 in the acquittal of the accused. In Hoshiarpur the experiments referred to in last year's report were continued in the Maili Cho with varying success. In the Maili village, where the people co-operated wholeheartedly, excavation and embankment works were entirely successful with the result that further erosion has been stopped and some 50 acres will be reclaimed, a most satisfactory result and creditable to all concerned. It is to be hoped that it will afford encouragement to similar efforts elsewhere. As regards the hill areas in this district the improvement in the condition of villages to which the provisions of section 5 of the Chos Act were applied fifteen years ago is being maintained. The most gratifying feature is that the villagers now appreciate the financial advantage to be derived from conserving grass and trees and some villagers are of their own accord adopting restrictions on grazing. An allotment of Rs. 5,000 for grants to villages for reclamation of Cho beds in the Ambala and Hoshiarpur districts was made for the current year and Government has been asked to provide an equal amount in next year's budget for the same purpose.

General statement of owned and mortgaged area. Statement III.

28. The total area of the Province according to the entries in the latest revenue records is 56,269,000 acres or 31,600 acres less than in 1917-18. The small decrease is the net result of adjustments in district figures as previously reported rendered necessary mainly by errors brought to light in the re-measurement of certain villages. The reason for the very great increase reported last year in the area of the Montgomery district was further investigated and it was ascertained that the increase was almost entirely due to the fact that the district figures for the first time included the area of all Government waste and forest lands, this area having been erroneously excluded in the figures reported in previous years. Of the total area nearly 34½ million acres are owned by agricultural tribes, 5¼ million acres by "others" and a little over 16½ million acres consist mainly of common lands, villages sites and Government property. The figures for cultivated area show an increase of 149,000 acres over the area of nearly 29 million acres shown in statement III of the last year's report. The districts which show any considerable increase are Gujrat, Montgomery, Lyallpur, Lahore, and Dera Ghazi Khan. The increase of 13,600 acres in Gujrat, however, is merely due to a correction of previously reported figures as the result of re-measurement of certain Colony chaks in the Upper Jhelum Colony. Extensions of canal irrigation from the Lower Bari Doab Canal brought nearly 36,000 acres of waste land under the plough in Montgomery district while 13,000 acres were given out for temporary cultivation in the Lyallpur district in order to increase the area under food-grains. No satisfactory explanation is given of an increase of over 13,000 acres in the Lahore and of the large increase of 67,600

acres in the Dera Ghazi Khan district. As regards the latter further enquiries will be made from the Deputy Commissioner. The cultivated area under mortgage shows an increase of 36,060 acres as compared with last year and the percentage of this area to the total cultivated is now 10·9, exactly the same as the similar percentage in 1917-18.

Transfers. Statements XXIV, XXV, XXVI and XXVII.

29. The cultivated area (ownership) sold during the year was 142,169 acres or about 42,000 acres more than in the preceding year for which year the figures were the lowest for 22 years. Sales of uncultivated land (ownership) are almost the same in area as in 1917-18, 71,796 acres as compared with 71,803 acres. Almost the whole increase of 42,000 acres in the cultivated area sold is accounted for by the figures for Montgomery and Multan districts, in which districts 51,035 acres cultivated were sold in 1918-19 as compared with 9,627 acres in 1917-18, the increase being due to sales of proprietary rights in Government land to Colonists and Crown tenants. The total cultivated (ownership) area reported as redeemed (including areas redeemed but remortgaged) during the year was 261,920 acres against 200,855 acres in the preceding year and the mortgage debt discharged was Rs. 2,16,03,780 against Rs. 1,77,00,000 in 1917-18 or an increase of 39 lakhs. Nearly every district shares in the increase which, however, is most marked in the case of the Multan, Hissar, Rohtak and Mianwali districts. In the last three districts the increase is ascribed to the general rise in the money value of agricultural land which enabled mortgagors to redeem old mortgages of their land by re-mortgaging a small portion of that land to a third party. No reason is assigned by the Deputy Commissioner for the increase in Multan. In the other districts the increase is the result either of profits due to the prevailing high prices of agricultural staples or of the savings of men on military service. A report was submitted by the Financial Commissioners to Government during the year showing the results of the enquiry referred to in the two previous years' reports regarding the continued decrease in the area reported as redeemed during the period from the year 1912-13 to the year 1916-17. The conclusion which the Financial Commissioners arrived at was that the decline was temporary and that war conditions furnished the cause which had operated in various ways to discourage redemption. These conditions they held were not due to want of funds resulting from economic depression but to a certain degree of distrust in the future political stability of the country which was felt during the first three years of the war and which was itself due to the impression that the British Empire was not certain to be victorious. Funds therefore otherwise available for expenditure on redemption of mortgaged land were, it seemed to them, probably put into hoard pending the clearance of the political horizon. Another contributory factor was the great Punjab crisis of 1913-14 which adversely affected the money market and made money tight all round. This tightness continued throughout the war as the rate of interest sufficiently demonstrated. In any case the redemption and mortgage figures for the seven years ending 1918-19 when considered in combination did not, in the Financial Commissioners' opinion afford any ground for apprehending any general deterioration in the economic position of the land-owner of the Province. The figures for 1917-18 showed a tendency to a reversion to the pre-war standard of redemption and it was anticipated by Mr. Fagan that the results of the agricultural year now under report would tend to show further progress back to this standard. This anticipation has been justified by the figures noted above in this paragraph. The Redemption of Mortgages Act is reported to be working well and to be a valuable and popular enactment. The cultivated area (ownership) mortgaged during the year was 210,543 acres against 199,779 acres in the previous year. It was less by 51,000 acres round than the area reported as redeemed during the year, but as noted above the latter area always includes the area of lands redeemed but re-mortgaged and at the end of the year the total area under mortgage was 36,000 acres greater than the total area under mortgage at the close of 1917-18. Though we have no figures available for the total subsisting mortgage debt for the whole province, a comparison of the figures for redemptions and new mortgages shows that that debt has considerably increased in the course of the year under report. The mortgage debt redeemed during the year amounted to Rs. 216 lakhs, whereas the mortgage debt freshly incurred by new mortgages or by re-mortgages of redeemed areas amounted to nearly 311 lakhs of rupees. This great increase in the total mortgage debt is no doubt largely due to the great progressive rise in the value of land, the new mortgages and re-mortgages having been made on the basis of the high land values now prevailing

while the redemptions have been largely of areas mortgaged for considerably less values. This conclusion is borne out by the fact that the mortgage money of the new mortgages and re-mortgages averages Rs. 148 per acre mortgaged, while the mortgage money discharged by redemptions averages only Rs. 82 per acre redeemed. It is scarcely practicable to deal fully with the economic bearings of an increase such as the above. It indicates scope for detailed enquiries such as those to be undertaken by the recently constituted Economic Board. It may, however, be pointed out that a large portion of the funds involved in the increase have been supplied by mortgagees who are themselves members of the agricultural tribes, while in so far as other mortgages are concerned the mortgages are, under the provisions of the Alienation of Land Act, subject to a process of automatic redemption in the cases in which the mortgagors are members of these tribes. Such considerations combined with the lowered value of money tend to dispel any such conclusion as that the large increase in mortgage debt necessarily and of itself indicates a deterioration in agricultural prosperity, a phenomenon which is shown by many other signs not to be a fact. The area transferred by gifts has increased from 75,000 acres last year to nearly 80,000 acres in the year under report. These gifts are as usual mainly transfers for religious and charitable purposes and transfers to relations. The area transferred by exchanges was nearly 35,000 acres against 32,000 acres in 1917-18 These exchanges were mostly effected in order to consolidate holdings and thus facilitate their efficient cultivation. It is highly desirable in the interest of efficient and economic agriculture to encourage exchanges for this purpose and the Financial Commissioner is at present, in conjunction with the newly-constituted Economic Board, making inquiries in order to ascertain what difficulties in practice prevent these exchanges from being more generally resorted to.

Value of land.
Statements XXVI and XXVII.

30. The average recorded price of cultivated land has fallen from Rs. 252 per acre in 1917-18 to Rs. 184 only in the year under report and is the lowest figure reached since 1913-14, except in 1914-15 when it was Rs. 180. The provincial average price shown in statement XXVI is never however a satisfactory guide to the actual selling price of land as it is arrived at by applying the total price paid to the area of cultivated land sold and this tends to show a lower price per acre than is actually the case. Moreover a considerable amount of Government land was sold during the year to Crown tenants in the Sohag Para and Sidhnai Colonies at merely nominal rates which depressed the provincial average sale price. Further it is obvious that an average price for the whole province can have little real meaning. The majority of the districts report a rise in the value of land owing to the continued high prices of agricultural produce. In the Lower Bari Doab Colony the prices realised at the auction sale of agricultural land were unexpectedly high, an area of nearly 8,868 acres being sold at an average price of Rs. 493 per acre, while the highest price realised was Rs. 1,018 per acre for a lot of 25 acres in a village one mile from Khanewal Railway station. The sale price for the Province as a whole represents 127 years' purchase of the land revenue assessed as against 171 years' last year. The mortgage value of land, the ownership of which was mortgaged during the year, was 310·76 lakhs against 329·86 lakhs in 1917-18 and represents 97 times the land revenue assessment of the land against 91 times in the previous year. The average mortgage money per acre on the whole area mortgaged was Rs. 124 against Rs. 140 last year.

The large and continuous rise in land values which has occurred during recent years in this province is an economic phenomenon which deserves careful consideration. A full discussion of the subject is not possible in, nor indeed appropriate to, an annual report. It is hoped that it will in due course receive adequate treatment at the hands of the newly constituted Economic Board. It is obvious, however, that the rise is in fact at any rate due to the increase in the cash value of the net rental of agricultural land which has resulted from the largely increased prices of agricultural staples. Another important contributory factor lies in the fact that the acquisition of land is, in the present backward industrial and commercial state of the province, the main channel for the investment of the fund of capital which it is so rapidly accumulating.

Land Alienation Act.
Statements XXV and XXVI.

31. During the year the provisions of the Act other than those of section 10 were extended to the Kotgarh Ilaqa of the Kot Khai tahsil of the Simla district and 11 agricultural tribes were notified under sec-

tion 4 in one local group in that ilaqa. The Arain tribe was added to the local groups in Kangra proper and in Kulu Agricultural tribes gained by purchase a net increase of 41,000 acres against a gain of 9,000 acres in 1917-18 and 21,000 acres in 1916-17, but lost by mortgage and redemption taken together 49,600 acres against a loss of 28,000 acres in the previous year and of 45,000 acres in 1916-17. Sales by agricultural tribesmen show an increase this year of 8,000 acres from 146,000 acres to 154,000 acres as compared with the year previous and sales to them have increased from 155,000 acres to 195,000 acres. Sales to "others" show an increase from 34,000 acres to 37,400 acres. A small number of benami transactions have been detected in some districts and other attempts continue to be made to evade the provisions of the Act but to no very serious extent. The Act continues to be widely appreciated by those whom it was intended to protect.

Business Returns. Statements XXVIII and XXIX.

32. The total number of revenue cases disposed of during the year was 148,573 or a decrease of 13,752 cases as compared with the figures for 1917-18. This decrease is mainly due to fewer institutions in every class of case, except in those under the Alienation of Land Act and under the Redemption of Mortgages Act. Decrease is especially marked in cases under the Tenancy Act. The main auses which led to fewer institutions were the influenza epidemic, bad harvests, which rendered landlords unwilling to eject tenants whom they might not be able to replace and the disturbances of April. Cases under the Alienation of Land Act increased from 3,771 to 4,503, the principal districts which show an increase in disposals under this head being Ferozepore, Sialkot, Shahpur and Rawalpindi. The reports of none of these districts contain any explanation of this increase. Cases under the Redemption of Mortgages Act increased from 2,464 to 4,498, the increase in the cases disposed of under this Act in the Ferozepore, Sialkot, Shahpur and Gujrat districts together amounting to 1,336 as compared with the figures for these districts for the preceding year. The causes of the increase appear to be the prosperity of the zamindar class owing to the high prices they now obtain for their surplus produce and the large amounts remitted by men in military service for the redemption of their mortgaged holdings. The number of pending cases fell from 17,104 to 14,906. Disposal of Revenue Court and Revenue Officers' cases were respectively 13 and 7 per cent, less than in 1917-18, but this result is not unsatisfactory when the hindrance to work caused by the influenza epidemic and the April disturbances is taken into account. The disposal of petitions from men on military service still throws much extra work on district officials, but generally received careful attention. In the Hoshiarpur district alone 2,484 soldiers' petitions were received and of this number nearly 2,200 were disposed of; while 331 applications relating to pensions were also received in the District Office. In the Courts of Commissioners and Financial Commissioners 729 Revenue Judicial appeals were decided during the year against 1,157 in 1,917-18, and the number of pending cases has been reduced from 127 to 92. Four thousand seven hundred and twenty-six Revenue Executive appeals were decided as compared with 2,891 in the preceding year and there were 414 cases pending at the close of the year against 201 cases last year. The number of appeals pending for more than three months was 44 against 30 at the end of 1917-18.

Tour of Commissioners.

33. *Ambala.*—Mr. H. A. Casson, C.S.I., I.C.S., was Commissioner throughout the year, out of which he spent 110 days on tour.

Jullundur.—The Hon'ble Mr. C. J. Hallifax, C.B.E., I.C.S., was Commissioner for 33 days and spent 9 days on tour. Mr. C. A. Barron, I.C.S., was Commissioner for 187 days, spending 9 days on tour. Mr. H. D. Watson, I.C.S., was Commissioner for 15 days and did no touring. Lieutenant-Colonel P.S.M Burlton, I.A., was Commissioner for 130 days, out of which he remained 41 days on tour.

Lahore.—Mr. C. M. King, C.I.E., I.C.S., was Commissioner for 662 days, spending 21 days on tour. The Hon'ble Mr. C. J. Hallifax, C.B.E., I.C.S., was Commissioner for 38 days and did no touring. Mr. A. J. W. Kitchin, I.C.S., was Commissioner for 61 days and remained 21 days on tour.

Rawalpindi.—Lieutenant-Colonel Sir F. Popham Young, K.B E., C.I.E., I.A., was Commissioner for 359 days and spent 59 days on tour. Lieutenant-Colonel A. E. Barton, I.A., was Commissioner for 6 days and did no touring.

Multan.—Lieutenant-Colonel C. Powney Thompson, I.A., was Commissioner throughout the year, and remained 111 days on tour.

244 FC—276—17-3-20—SGPP Lahore.
